**Redefining Tandem Language and Culture Learning in Higher Education** Claire Tardieu, Céline

Horgues, 2019-08-21 This book provides a comprehensive critical account of tandem learning charting its evolution from its origins in European educational settings to modern programs offering new perspectives on the approach's role within higher education. Taking stock of the ways in which increased globalization has produced new linguistic and sociocultural realities, the volume begins by looking back at the development of tandem learning over the last several decades, growing out of a need to create more opportunities for L2 learners to communicate in their target language. The book then examines the different learning objectives and learning outcomes of tandem learning arrangements, moving toward a discussion of tandem learning's potential role in shaping language policy and the unique challenges involved in implementing tandem programs at higher education institutions. The final section of the book brings the previous discussions together to consider new tools and technology and the ways in which they can better equip language educators to implement tandem learning in their own practice. Highlighting tandem learning's potential to promote multilingual and multicultural learning on a global scale, this volume will be of particular interest to students and researchers in intercultural communication, language education, multilingualism, and applied linguistics.

**Rethinking Higher Education in Post-Apartheid South Africa** Emmet

Tadesse Woldegiorgis, Logan Govender, Dennis Zami Atibuni, 2025-07-25 This book explores the opportunities and epistemological and structural challenges facing higher education in postcolonial South Africa and argues for a fundamental transformation to meet the needs of the 21st century. Taking the concept of transformation as a unifying thread, this book discusses the evolving trajectories of higher education in South Africa with particular emphasis on the decolonial initiatives that have emerged in the post-Apartheid era. During this time, there have been persistent calls for South Africa to move beyond Eurocentric education programmes and curricula in favour of a system that reflects the continent's culture and identities of all South Africans. The book argues that incremental reforms of existing structures are insufficient and that instead a deeper, more fundamental shift in higher education structures, values, and systems is needed. Overall, the book calls for a comprehensive transformation to expand access for historically disadvantaged communities, enhance quality and competitiveness, address past injustices, and improve the quality and capacity to act together for a more sustainable and just future. Also exploring the digital transformations which have accelerated in the wake of the COVID-19 pandemic, this book will be an essential read for researchers and policymakers working on higher education in South Africa.
