Reden Im Herbst:

What Remains Gerald Fetz, Patricia Herminhouse, 2025-11-01 Arguably the most important and influential German woman writer of the last century Christa Wolf was long heralded as die gesamtdeutsche Autorin an author for all of Germany but after 1989 in unified Germany Wolf found herself suddenly embroiled in controversies that challenged her integrity and consigned her to an ideologically suspect identity as DDR Schriftstellerin GDR writer or Staatsdichterin state poet What Remains Responses to the Legacy of Christa Wolf asks the question of what truly remains of her legacy in the annals of contemporary German culture and history Unlike most of what appeared in the wake of Wolf's death however the contributions to this international volume seek neither to monumentalize her nor to dismantle her stature but to employ a range of methodologies comparative intertextual psychoanalytic historical transcultural to offer sensitive assessments of Wolf's major literary texts as well as of her lesser known work in genres such as film and essay

Rereading East

Germany Karen Leeder, 2016-01-14 This volume is the first to address the culture of the German Democratic Republic GDR as a historical entity but also to trace the afterlife of East Germany in the decades since the fall of the Berlin Wall An international team of outstanding scholars offers essential and thought provoking essays combining a chronological and genre based overview from the beginning of the GDR in 1949 to the unification in 1990 and beyond with in depth analysis of individual works A final chapter traces the resonance of the GDR in the years since its demise and analyses the fascination it engenders The volume provides a rereading of East Germany and its legacy as a cultural phenomenon free from the prejudices that prevailed while it existed offering English translations throughout a guide to further reading and a chronology

Rifts in Time and in the Self Cheryl Dueck, 2021-11-01 The fall of the Berlin Wall in November 1989 marked the end of East Germany's socialist regime and a new beginning for a unified German Federal Republic Cultural historians agree that the event caused one of the deepest rifts in time and thinking seen by an entire generation of Germans a rift that left its mark on the psyche of every citizen challenging notions of the personal and the political and crashing traditional understandings of the individual and the collective self In this bold rethinking of the question Cheryl Dueck goes beyond the social political and psychological discourses that Marx and Freud Foucault and Lacan viewed as the initiators of modern socialist identities to explore the literature and discourse of the quest for unity of the female subject Reading such authors as Christa Wolf Brigitte Reimann Helga K nigsdorf and Helga Schubert Dueck traces the striking fissures which run through time and through the female self haunting women within the socialist project The book shows how two generations of women writers have struggled consciously and systematically in their letters aesthetic writings and literary production to create a new language to express their own sense of self within a restrictive socialist and patriarchal system Rifts in Time and in the Self offers an unprecedented look at the reconceptualizations of the female subject during several phases of GDR history and women writers persistent attempt to carve out spaces of identity and community

Language and German Disunity

Patrick Stevenson, 2002 This book investigates the history of national disunity in Germany since the end of the Second World War from a linguistic perspective what was the role of language in the ideological conflicts of the Cold War and in the difficult process of rebuilding the German nation after 1990 In the first part of the book Patrick Stevenson explores the ways in which the idea of the national language contributed to the political tensions between the two German states and to the different social experiences of their citizens He begins by showing how the modern linguistic conflict between east and west in Germany has its roots in a long tradition of debates on the relationship between language and national identity He then describes the use of linguistic strategies to reinforce the development of a socialist state in the GDR and argues that they ultimately contributed to its demise The second part considers the social and linguistic consequences of unification The author discusses the challenges imposed on east Germans by the sudden formation of a single speech community and examines how conflicting representations of easterners and westerners for example in personal interactions the media and advertising have hindered progress towards national unity German division and reunification were crucial to the development of Europe in the second half of the twentieth century This fascinating account of the relationship between language and social conflict in Germany throws new light on these events and raises important questions for the study of divided speech communities elsewhere The book will interest sociolinguists historians sociologists and political scientists

Between Sarmatia and Socialism John P. Wiczorek, 2021-11-08 Interest in Johannes Bobrowski 1917 1965 has suffered from an impression of the complexity of his works and of the narrowness of his focus on The Germans and their Eastern European neighbours The current study re-examines aspects of Bobrowski's Sarmatian works especially their chronological development but places them within the wider context of the whole of his oeuvre It looks at the long period of development before he discovered his theme in the early 1950s and examines his development after *Sarmatische Zeit* and *Schattenland* Str me seeing the volume *Wetterzeichen* as moving increasingly away from the past and towards more contemporary issues His short stories and novels are related to the issues confronting him in East Germany and develop increasingly into responses to immediate poetic and social problems Far from being a remote and backward orientated Sarmatian Bobrowski emerges as a writer attempting to communicate with a society which he felt threatened to ignore basic human needs and aspirations The study makes use of material from Bobrowski's *Nachlaß* to present a figure looking for and offering patterns for orientation in his East German society but with renewed relevance for post-unification Germany

Ambiguous Memory Siobhan Kattago, 2001-07-30 *Ambiguous Memory* examines the role of memory in the building of a new national identity in reunified Germany The author maintains that the contentious debates surrounding contemporary monuments to the Nazi past testify to the ambiguity of German memory and the continued link of Nazism with contemporary German national identity The book discusses how certain monuments and the ways Germans have viewed them contribute to the different ways Germans have dealt with the past and how they continue to deal with it as one country Kattago concludes

that West Germans have internalized their Nazi past as a normative orientation for the democratic culture of West Germany while East Germans have universalized Nazism and the Holocaust transforming it into an abstraction in which the Jewish question is down played In order to form a new collective memory the author argues that unified Germany must contend with these conflicting views of the past incorporating certain aspects of both views Providing a topography of East West and unified German memory during the 1980s and the 1990s this work contributes to a better understanding of contemporary national identity and society The author shows how public debate over such issues at Ronald Reagan s visit to Bitburg the renarration of Buchenwald as Nazi and Soviet internment camp the Goldhagen controversy and the Holocaust Memorial debate in Berlin contribute to the complexities surrounding the way Germans see themselves their relationship to the past and their future identity as a nation In a careful analysis the author shows how the past was used and abused by both the East and the West in the 1980s and how these approaches merged in the 1990s This interesting new work takes a

sociological approach to the role of memory in forging a new integrative national identity Triumph of the Fatherland Brigitte F. Young,2010-05-06 The East German uprising of 1989 was not a male revolution Indeed one of the most significant aspects of the fall of East Germany compared to that of other East European nations was the presence of women demanding a political role in the newly emerging social order As one slogan proclaimed Without Women There Is No State Yet despite the determination of these women and of West German feminist groups to help shape the future of the German state their influence remained in the end very limited In Triumph of the Fatherland political scientist Brigitte Young draws on in depth interviews archival sources newspapers and her own observations from 1989 to 1991 to study the goals strategies and eventual fate of the German women s movements during this tumultuous period Young focuses on the relationship between the state and its citizenry outlining the mobilization of women in four states the East German and West German states before unification the stateless state in East Germany after the collapse of the Wall and the West German state during unification Ultimately she finds that the political opportunity structures opened during the stateless state closed again with unification resulting in what Young calls double gender marginalization Brigitte Young is Associate Professor Department of Political Science Otto Suhr Institute Free University Berlin Germany **Anna Seghers** ,2019-11-11 Anna Seghers The Challenge of History features essays by leading scholars devoted to this most important German writer whose novels and stories have been read by millions worldwide The volume is intended for teachers and students of literature and for general readers The contributions address facets of Seghers s large body of work which is characterized by reflections on political events shaping world history and written in a highly imaginative array of narrative styles The first section focuses on the author s famous novel The Seventh Cross Articles in the next two sections analyze her reactions to crises that marked the twentieth century and her connections to other relevant thinkers of her time The last section features new translations of Seghers s works

Christa Wolf Sonja E. Klocke,Jennifer R. Hosek,2018-03-19 Interest in Christa Wolf continues to grow Her classics are

being reprinted and new titles are appearing posthumously becoming bestsellers and being translated Energetic scholarly debates engage well known aesthetic and political issues that the public intellectual herself fore fronted This broad ranging introduction to the author her work and times builds upon and moves beyond such foundational interpretative frameworks by articulating the global relevance of Wolf s oeuvre today also for non German readers Thus it brings East German culture alive to students teachers scholars and the general public by connecting the socialist German Democratic Republic GDR and the lived experiences of its citizens to nations and cultures around the world The collection focuses on topical matters including the search for authenticity agency race cosmopolitanism gender environmentalism geopolitics war and memory debates as well as movie adaptations and Wolf s film work with DEFA marketing and international reception Our contributions by senior and emerging scholars from across the globe emphasize Wolf s position as an author of world literature and an important critical voice in the 21st century
