Mackintosh, 2015-10-16 In 2007 2008 the global financial and economic system was in turmoil This volume focuses on how the global financial architecture was redesigned following the financial crash of 2008 Its central claim is that the reforms constituted a paradigm shift a move from the dominance of market authority to the re assertion of state authority over financial markets and actors The book underscores that the cycle of boom and bust of crisis response reform and eventual relapse are not only economic but also conceptual and ideological Ideas matter in the political and economic calculus of policy making Economies are underpinned by and linked to ideological narrative a prevailing policy consensus that places limits on policy actions and options and constitutes a dominant
