**Boundary Changes in Criminal Justice Organizations, Vol. 2, Criminal Justice 2000, (July 2000) ,2000** *Law and Neuroscience: Justice as a Challenge for Neurorights, Neurolaw, and Forensic Psychology* Eric García-López, Eduardo Demetrio Crespo, Cristina Nombela Otero ,Federica Coppola, 2025-05-29 Justice is one of the most complex issues in the study of Law Philosophical sociological and religious studies have attempted to articulate this value central to human coexistence throughout history More recently specialised sub disciplines such as Legal Psychology have significantly contributed to refining the relationship between Law and Justice by enriching the study of these normative domains with empirical knowledge about social interactions In more recent developments the discipline of Neurolaw has begun to offer new insights into the analysis of the longstanding and disputed issues surrounding Law and Justice Neurolaw can be defined as the analysis of Law and Justice from the perspective of Neuroscience and involves an understanding of human behavior through the study of the brain s interactions with the environment Neuroscience appears to provide a more up to date understanding of human behavior focussing on the legal and forensic implications Yet neuroscientific studies of crime fail to grasp the impact of broader socio contextual contingencies on human conduct including institutional failures gender dynamics and cultural power Such a failure evidences the limits of neuroscience as a complete epistemological tool It is too narrow to provide a complete understanding of complex human conduct like crime as it involves a careful examination of the variegated interactions between various social and biological levels This Research Topic addresses the need for developing a holistic theoretical framework that considers not only the biological nature of human beings but also the social cultural and political influences on human behavior Such a holistic approach is necessary to clarify some foundational philosophical questions including subjectivity and consciousness as well as the role that these concepts play within the notion of criminal liability and punishment In addition to these unresolved philosophical questions there is also the need for a revised legal and forensic approach that grasps a more nuanced and complex understanding of human conduct Topics for contributions include but are not limited to the following Neuroscience Law and Criminal Justice Neuroscience Law and Social Justice Neuroscience Law and Racial Justice Neuroscience and Restorative Justice Neurorights Neuroethics Criminal responsibility Decision making Juvenile Criminal Law and Punishment Free will Ethical legal and social repercussions of the neurotechnologies currently available as well as of those that are currently being developed We welcome submissions from authors with backgrounds in law justice philosophy forensic neuropsychology forensic cognitive social psychology forensic psychiatry criminology sociology addressing theoretical methodological or empirical issues related to these topics and other related ones Cross inter and multidisciplinary contributions are of course welcome

*Costs and Benefits of Preventing Crime* Brandon Welsh, 2018-03-08 What are the cost savings from preventing a typical burglary robbery assault or even a criminal career

Who benefits from these savings How often do the benefits from preventing crime or criminal behavior exceed the resources spent on preventing or controlling crime Is it more cost effective to invest in early childhood programs or juvenile boot camps to reduce criminal offending These are some of the important questions that face policymakers in crime and justice today Answering them is no easy task Nevertheless it is important to provide answers in order to ensure that the dollars devoted to crime reduction are spent as efficiently as possible The principle aim of Costs and Benefits of Preventing Crime is to report on and assess the present state of knowledge on the monetary costs and benefits of crime prevention programs Remarkably this crucial topic has rarely been studied up to the present time This book examines key methodological issues reports on the most up to date research findings discusses international policy perspectives and presents an agenda for future research and policy development on the economic analysis of crime prevention Throughout it addresses the important question of how governments should be allocating scarce resources to make crime prevention policy and practice more effective and to produce the greatest economic benefits to society The book brings together research and perspectives from across North America Europe and Australia
