## Reducing Global Inequities:

Reducing Global Inequities William Howard Wriggins, Gunnar Adler-Karlsson, 1978 SCOTT copy 1 from the John Holmes Library collection

**Global Inequality Matters** D. Moellendorf, 2009-11-04 The globalization of trade investment and finance continues apace Many have benefited from this but deep inequalities persist This book argues that the interconnections established by globalization make possible a critique of its inequality For those who take seriously human dignity equality is a basic presumption of social institutions

*The Landscape of Global Health Inequity* Barbara W. K. Son, 2024-07-10 This book presents a unique overview of significant disparities in health which exist within complex and multifaceted contexts across different regions In the twenty first century global health inequity presents substantial health challenges encompassing diverse and interconnected ramifications across socioeconomic cultural and political dimensions Additionally it thoroughly explores the interconnected and multifaceted underlying factors that are widespread in developing nations The book puts forth essential and comprehensive recommendations that call for collaborative efforts at multiple levels including global national and local to identify and address issues effectively

**Economic Inequality - Trends, Traps and Trade-offs** Medani P. Bhandari, Shvindina Hanna, 2022-09-01 The book Economic Inequality Trends Traps and Trade offs presents the unexplored issues of economic inequality including case studies of various countries Inequality is a chronic divisive factor of society It is well known that inequalities such as economic social cultural religious geographical etc have been omnipresent in human society Inequalities can be found within each family each community and each nation and thus globally Inequality is a major cause of political economic social instability and creates crisis and conflict within society A major cause of inequality is unequal uneven biased power centric distributions of human economic social political cultural and spiritual human necessities The edited book examines the major parameters of the socio economic issues of inequality and focuses on the key economic issues of inequality namely income and wealth distribution equity equality of outcome and equality of opportunities Economic inequality is measured by wealth income disproportions in distribution and consumption patterns in a specific area Mostly inequality is measured using various statistical tools including the Gini Coefficient inequality adjusted human development index 2020 ratio Palma ratio Hoover index Galt score Coefficient of variation Theil index wage share etc However not all income can be measured by these tools By using case studies this book encourages us to reframe economic development through the lens of growing inequalities and disparities Economic growth per se is disproportional and the efforts of scholars practitioners and policymakers should be directed to empower the marginalized of society in a way that no one should be left behind UN Slogan

Understanding Inequality: Social Costs and Benefits Amanda Machin, Nico Stehr, 2016-04-14 The contributions in this book highlight contextualize and analyze different aspects of social inequality What are the various cause and effects of inequality How have these changed over recent decades Which social policies might be best able to intervene Written by authors from a variety of disciplines and geographical regions these

contributions provide a rich account of inequality within contemporary society The role of the state the media and the market in exacerbating and alleviating patterns of equality are all accessed alongside analysis of changing patterns of exclusion and hierarchy

**Inequalities of the World** Göran Therborn, 2006 A groundbreaking exploration of contemporary global inequality by leading scholars from across the world

Transitioning to Reduced Inequalities Sabin Bieri, Christoph Bader, 2023-02-09 The world has never been richer than today The distribution of our global wealth however is hugely biased Since 1980 the gains were mainly captured by the rich The top 1% obtained twice as much of the income growth as compared to the bottom 50% Nevertheless within economics debates about inequality have remained rather marginal despite long term research by renowned scholars such as Tony Atkinson Within the public arena concerns about inequality emerged as a result of a number of developments First the global financial crisis in 2008 exposed the risks of the financing of the economy secondly 2013 Thomas Picketty's book *Capital in the 21st century* demonstrated that against the trend of the overall 20th century capital returns outstrip the gains through economic growth in recent decades thus threatening social coherence and democratic institutions and thirdly the Millennium Campaign presented impressive achievements regarding poverty but stirred doubts whether the most deprived were left even further behind Since 2015 then the stated aim of SDG 10 is to reduce inequality within and among countries There is growing consensus that economic growth is not sufficient to reduce poverty and that our efforts to make it more inclusive so far were insufficient The very first step reduce inequality is to adopt a systemic perspective allowing an integrative analysis covering both ends of the ladder Policies should be universal in principle and pay attention to the needs of disadvantaged and marginalized populations Predicated on comparison inequality reminds us that it's not enough to study lower earners and the poor Instead the term demands that we expand our perspective scrutinizing how economic value is generated accumulated at whose cost and not least how the overall system could be made fairer

Transitioning to Reduced Inequalities therefore explores inequality trends worldwide offers a debate on different measures and comparative perspectives highlights key actors who either benefited or suffered from recent economic trends and explores policy options to reduce inequality and thus contribute to SDG 10 The volume considers particularly conceptual frameworks with regards to the inequality debate the relationship between poverty reduction economic growth and inequality measures of inequality overlooked bypassed groups in developing countries analysis on income wealth growth for different groups in the global north discussion about policies to reduce inequality and further research in the realm of inequality

Transitioning to Reduced Inequalities is part of MDPI's new Open Access book series Transitioning to Sustainability With this series MDPI pursues environmentally and socially relevant research which contributes to efforts toward a sustainable world
