Reducing Risk And Liability Through Better Specifications And Inspection:

Reducing Risk and Liability Through Better Specifications and Inspection, 1982 **Engineering Construction Specifications** J. Goldbloom, 2012-12-06 For the past 25 years Joe Goldbloom and I have conducted a running debate over whether specifications writers engage in the unlawful practice of law Joe's position is that lawyers have no business writing specifications that being the designer's province Having been given the honor to write this foreword I have the opportunity for the last word at least for now Joe Goldbloom and I first met in 1964 while serving together on the ASCE Committee on Contract Administration Joe became my teacher mentor and friend Underlying our good natured debate was the serious issue of the technical qualifications required of a specifications writer As a matter of fact specifications writing traditionally has fallen in a crack between the two professions Specifications writing typically is neither taught in engineering school nor in law school Engineers are taught how to design lawyers are taught how to draft contracts Specifications writing requires mastery of the technical elements of design as well as the skills of contract drafting Specifications writing is neither glamorous nor sexy it is often viewed as a necessary evil of the designer's job ASCE Combined Index American Society of Civil Engineers, 1981 Indexes materials appearing in the Society's Journals Transactions Manuals and reports Special publications and Civil engineering **Asce Combined Index, 1982** American Society of Civil Engineers, 1983 **Journal of the Construction Division** American Society of Civil Engineers. Construction Division, 1982 **Specifying Buildings** Stephen Emmitt, 2008-05-09 Selecting the best materials techniques and systems for each project and then specifying them correctly to meet all the requirements of quality time value constructability maintenance and durability is a fundamental aspect of architectural design It also helps to determine the quality and environmental impact of the project Specifying Buildings A Design Management Perspective provides a unique insight into the entire specification process from selecting materials and products to writing the specification dealing with changes and minimising risk This new edition has been extensively revised and includes new case studies research findings and reviews to illustrate how to translate design intent into building assembly The book is structured to meet the needs of students on construction related programmes such as architecture engineering surveying and construction management It provides valuable insights and practical guidance with end of chapter exercises helping students achieve a thorough understanding of the specification process **Transactions of the American Society of Civil Engineers** American Society of Civil Engineers, 1983 Vols 29 30 contain papers of the International Engineering Congress Chicago 1893 v 54 pts A F papers of the International Engineering Congress St Louis 1904 *Bowker's Law Books and Serials in Print*, 1995 *Construction Project Administration* Edward R.
