images of modern peoples on every inhabited continent of our planet. These vintage photographs carefully selected from hundreds of thousands range from mundane record-keeping pictures to glorious aesthetic treats and they are in demand by international scholars and students and researchers worldwide. One of the most powerful of media to convey information about and to advance understanding of foreign peoples and places is photography. Soldiers, missionaries, merchants, and other travelers carried out early anthropological photography in distant lands. Field photography was extremely difficult when the Museum began its research program in the late 1880s, requiring the transport of a complete dark room and other heavy equipment. The Museum's intrepid adventurers sought scientific accuracy with no artifice that may have obscured the realism of the image. An engaging narrative essay highlighting the Museum's fieldwork explains the contexts of the range of photographs from the Museum's Archives and the role of photography in studying human cultures.

Treasured Christina Riggs, 2022-02-01. A bold new history of the discovery of King Tut and the seismic impact it left on modern society. When it was discovered in 1922 in an Egypt newly independent of the British Empire, the 3,300-year-old tomb of Tutankhamun sent shockwaves around the world. The boy king became a household name overnight and kickstarted an international obsession that continues to this day. From pop culture and politics to tourism and the heritage industry, it's impossible to imagine the past century without the discovery of Tutankhamun, yet so much of the story remains untold. In *Treasured*, Christina Riggs weaves compelling historical analysis with tales of lives touched or changed forever by an encounter with the boy king. Who remembers that Jacqueline Kennedy first welcomed the young pharaoh to America? That a Tutankhamun revival in the 1960s helped save the ancient temples of Egyptian Nubia? Or that the British Museum's landmark Tutankhamun exhibition in 1972 remains its most successful ever? But not everything about King Tut glitters: tours of his treasures in the 1970s were linked to Big Oil; his mummified remains have been exploited in the name of science; and accounts of his tomb's discovery exclude Egyptian archaeologists. *Treasured* offers a bold new history of the young pharaoh who has as much to tell us about our world as his own.

Traveling Prehistoric Seas Alice Beck Kehoe, 2016-07. Alice Kehoe uses critical analysis of large bodies of interdisciplinary evidence to help scholars and students reevaluate the highly controversial theory that people sailed large distances across oceans in ancient times.

Race and Nation in Puerto Rican Folklore Rafael Ocasio, 2020-08-14. *Race and Nation in Puerto Rican Folklore* Franz Boas and John Alden Mason in Puerto Rico explores the historic research trip taken to Puerto Rico in 1915. As a component of the Scientific Survey of Puerto Rico and the Virgin Islands, Boas intended to perform field research in the areas of anthropology and ethnography while other scientists explored the island's natural resources. A young anthropologist working under Boas, John Alden Mason, rescued hundreds of oral folklore samples ranging from popular songs, poetry, conundrums, sayings, and most particularly folktales while documenting native Puerto Rican cultural practices. Through his extensive excursions, Mason came in touch with the rural lives of Puerto Rican peasants, the *j baros* who served as both his cultural informants and writers of the folklore samples. These stories, many of which are still part of the island's

literary traditions and collected in a bilingual companion volume by Rafael Ocasio reflect a strong Puerto Rican identity coalescing in the face of the U S political intervention on the island A fascinating slice of Puerto Rican history and culture sure to delight any reader
