and empowerment and the reclaiming by midwives of the normal birth and puerperium      **Empowering Decision-Making in Midwifery** Elaine Jefford, Julie Jomeen, 2019-08-29 Decision making pervades all aspects of midwifery practice across the world Midwifery is informed by a number of decision making theories but it is sometimes difficult to marry these theories with practice This book provides a comprehensive exploration of decision making for midwives irrespective of where in the world they practice or in which model of care The first part critically reviews decision making theories including the Enhancing Decision making Assessment in Midwifery EDAM tool and their relevance to midwifery It explores the links between midwifery governance including professional regulation and the law risk and safety and decision making as well as how critical thinking and reflection are essential elements of decision making It then goes on to present a number of diverse case studies demonstrating how they interrelate to and impact upon optimal midwifery decision making Each chapter presents examples that show how the theory translates into practice and includes activities to reinforce learning points Bringing together a diverse range of contributors this volume will be essential reading for midwifery students practising midwives and midwifery academics      *Journey to Birth* Sakina O'uhuru, 2013-09-05 This book is about my life journey as a home birth midwife It includes the many home births I attended during my sixteen years as a practitioner with particular attention to the last ten years During this journey I have learned a myriad of life lessons Most of them strengthened me and my ability to continue on this path There were incredible challenges both joyful and painful The most challenging lessons happened to be the most life changing and transformative Those lessons impacted my life tremendously first as a woman second as a mother and grandmother and most assertively as a basic human being      *The New Midwifery* Lesley Ann Page, Rona McCandlish, 2006-12-05 Practicing as a midwife today requires not only good clinical skills but also a broad understanding of the social and emotional changes a woman experiences before and after birth This book combines scientific knowledge with the more intangible skills needed for sensitive communication to provide the best possible care to the mother and her family The second edition of this celebrated text vividly explores the various skills and approaches that lead to successful midwifery practice and uses care stories to bring these to life Provides a refreshingly new approach to key areas of midwifery practice in a way that brings practice to life Illustrates and supports the fundamental changes currently taking place in midwifery around the world Builds on the most up to date evidence based research to suggest guidelines for best practices Explores the impact of parenthood and offers strategies for effectively supporting individuals during this period of transition Includes care stories case studies that highlight positive midwifery care and successful childbirth experiences Offers contrasting stories from around the world illustrating how maternity care in industrialized society differs from that in a non industrial or third world environment Provides up to date research and reference material      **Evidence Based Midwifery** Helen Spiby, Jane Munro, 2009-10-13 Evidence based practice is now widely accepted as a fundamental tenet of midwifery The importance of evidence in defining midwifery policy and practice in the UK health system and others is

acknowledged and enduring While the development and evaluation of research in midwifery is well charted the question of how such evidence is incorporated into practice has to date received less attention and discussion in the midwifery profession Answering this need Evidence Based Midwifery focuses on the dissemination and use of evidence for midwifery practice and explores midwives experiences in using the evidence base to inform policy and enhance clinical practice Written by a highly regarded and diverse group from the UK and international midwifery community Evidence Based Midwifery addresses issues of relevance to all midwives whether clinical practitioners or educators students or supervisors researchers or managers Issues that influence evidence based midwifery are discussed and topics covered include problem based learning implementation of evidence based guidelines and the involvement of service users Edited by founder members of the Evidence Based Midwifery Network International collaboration with contributions from the UK Greece Canada and the Netherlands Primary focus on the incorporation of evidence into midwifery practice Real life examples throughout

*Supporting Physiological Birth Choices in Midwifery Practice* Claire Feeley, 2023-02-28 Highlighting the experiences of midwives who provide care to women opting outside of guidelines in the pursuit of physiological birth Claire Feeley looks at the impact on midwives themselves and explores how teams and organisations support or discourage women s birth choices This book investigates the processes experiences and sociocultural political influences upon midwives who support women s alternative birthing choice and argues for a shift in perspective from notions of an individual s professional responsibility to deliver woman centred care to a broader collective responsibility The book begins by contextualising the importance of quality midwifery care with an exploration of the current debates to demonstrate how hegemonic birth discourse and maternity practices have detrimentally affected physiological birth rates and the wellbeing of women who opt outside of maternity guidelines It provides real life examples of how midwives can facilitate a range of birthing decisions within mainstream midwifery services Moreover an exploration of midwives experiences of delivering such care is presented revealing deeply polarised accounts from moral injury to job fulfilment The polarised accounts are then presented within a new model to explore how a midwife s socio political working context can significantly mediate or exacerbate the vulnerability conflict and stigmatisation that they may experience as a result of supporting alternative birth choices Finally this book explores the implications of the findings looking at how team and organisational culture can be developed to better support women and midwives making recommendations for a systems approach to improving maternity services Discussing the invisible nature of midwifery work what it means to deliver woman centred care and the challenges and benefits of doing so this is a thought provoking read for all midwives and future midwives It is also an important contribution to interprofessional concerns around workforce development sustainability moral distress and compassion in health and social care

Reflective Practice Beverley J. Taylor, 2000 Reflection is widely taught as a means for nurses and midwives to understand the impact of their actions and how to improve their professional practice

*Welcoming Baby* Debby Gould, 2011 A new look at how we welcome newborn babies into the world whatever context they are born in but particularly if they are born in a large maternity hospital Reflections exercises and ideas for midwives and other maternity professionals The deeply ingrained rational scientific culture we live in today suppresses our innate knowledge of how things could improve We focus on categorising through measuring counting and documenting what we do instead of realising deep inside that things must change with regard to our rituals around birth in hospital It s as if we don t quite know how to engender that change Experienced midwife Debby Gould considers the current situation and explores how change is not just possible but also beneficial for mother baby and healthcare professionals Questions and exercises are provided to stimulate reflection and seminar discussion Following a varied and distinguished career in many maternity contexts Debby Gould is currently Head of Midwifery for University College London Hospitals and has served two full terms in office as Deputy Chair then Chair on the Royal College of Midwives Council She is also named in Debrett s People of Today as one of the top 25 000 influential and successful people in the UK Her words are well worth reading
