Reform Of The Socialist System In Central And Eastern Europe:

Reform of the Socialist System in Central and Eastern Europe Martin J. Bull, Mike Ingham, 2016-07-27 This book analyzes the reform of the socialist system in Central and Eastern Europe and the former Soviet Union. Uniquely it adopts a multi-disciplinary perspective which includes authors from both Western Europe and the former Communist world. The volume contains analyses of the prospects for civil society, economic reform and privatisation, theories of economic transition and the role of the state, political change and the persistence of former Communist parties, the prospects for democracy in the former Soviet Union and gender aspects of labour market reform. *Banking Reforms in South-East Europe* Zeljko Šević, 2002-10-29 Sevic offers an accessible and closely argued account of financial sector reform processes in Southeast Europe. Sevic's book is the result of an extensive research project on banking sector reform in the Southeast European transitional economies undertaken since late 1998. An extensive look at this timely volume will pay handsome dividends and could help devise successful business plans. Jens Bastian, Southeast European and Black Sea Studies. The book will be a very agreeable reading to experts on the region. Its comprehensive analysis emphasises past and current conflicts, the recourse to currency board arrangements and the persisting asymmetries with reference to the functioning of the banking system in Central Europe. *Banking Reforms in South East Europe* is a book that college students in banking and financial markets and banking analysts should read. Bruno S. Sergi, South East Europe Review. *Banking Reforms in South East Europe* gives a critical and detailed overview of banking system restructuring in the transitional countries of South Eastern Europe: Albania, Bosnia and Herzegovina, Bulgaria, Croatia, Macedonia, Romania and Yugoslavia, and offers suggestions for future reforms. *Recent Reforms of the Urban Housing System in Central and East Europe* William C. Thiesenhusen, 2000. **Pressures for Reform in the East European Economies**, 1989. **Health Reforms in Post-Communist Eastern Europe** Tamara Popic, 2023-01-01 This book provides the first in-depth study of healthcare reforms in post-communist Eastern Europe. Combining insights from comparative politics and public policy analysis, it examines health reforms in Slovenia, the Czech Republic and Poland between 1989 and 2019. The book argues that the post-communist transformation of healthcare policy has entailed a process of policy learning and that the countries' reform pathways were shaped by a series of initiatives aimed at applying market-oriented policy ideas in healthcare. The success of these initiatives has been influenced by three factors: policy legacies, political competition and institutional configurations. The book offers a novel comparison of health reform in the region and policy changes more generally. It will appeal to scholars and students of public policy, health policy and European politics. **The Enlarged European Union** Peter Mair, Jan Zielonka, 2002. The European Union will be a much more diversified entity after the forthcoming eastward enlargement. The applicant states from Eastern Europe are much poorer than the current member states from Western Europe. Their democracy and in some cases even their statehood is newly established and presumably more fragile. Their economic, legal and administrative structures are less developed. This

collection of essays will try to examine the origin nature scale and implications of this divergence How much divergence is likely to be imported by the Union and will it hamper the process of European integration This volume looks at differences and similarities in the field of macro economics welfare systems democracy institutional infrastructure civic orientations and popular culture The book shows that the map of convergence and divergence in the future EU will be very complex and will not correspond exactly with the old east west divide Moreover the division lines are constantly changing with the enlargement process representing an important factor pushing individual states into a single regulatory frame if not in a common political direction However there are other unifying factors at play globalization produces different models and loyalties than Europeanization Moreover the European pulling effect works unevenly in different functional fields and in different countries There are also many factors that produce greater divergence rather than convergence across the European Union a certain degree of divergence is thus unavoidable The book shows in particular that certain types of divergence can be beneficial rather than merely detrimental in the process of European integration

Integrating Eastern Europe into the Global Economy: J.M. Van Brabant, 2012-12-06 This book is designed as a modest contribution to the ongoing deliberations about how to ease the fairly tight constraints on the external payments of many countries of the eastern part of Europe In the first instance this inquiry is addressed to those that have embarked on wide ranging systemwide reforms External constraints have been markedly hampering the introduction of market oriented economic mutations thereby raising the cost of transition far above levels expected at the outset of the present wave of uniquely restructuring the countries involved I explore here several angles of this discussion But three stand out One is the disintegration of the postwar framework for economic cooperation in that part of the world Another is the disarray brought about by incisive economic transformations in the area Finally various national regional and international interest groups are at work there hoping to mold somehow the drift of the reform or at least key components thereof in their own image In the process it is often forgotten as Ralf Dahrendorf 1990 p 41 so pointedly remarked that all systems mean serfdom including the natural system of a total market order in which no one tries to do anything other than guard certain rules of the game discovered by a mysterious sect of economic advisers

Pension Reforms in Central, Eastern, and Southeastern Europe Igor Guardiancich, 2013 This book traces and analyzes the legislation and implementation of pension reforms in four Central Eastern and Southeastern European countries Croatia Hungary Poland and Slovenia By comparing the political economy of their policymaking processes it seeks to pinpoint regularities between institutional settings actor constellations decision making strategies and reform Guardiancich employs a historical institutionalist framework to analyze the policies actors and institutions that characterized the period between the collapse of socialism and the global financial crisis of 2008 2011 He argues that viable pension reforms should not be seen simply as an event but rather as a continuing process that must be fiscally socially and politically sustainable In particular the primary goal of a pension scheme is to reduce poverty provide

adequate retirement income and insure against the risks of old age within given fiscal constraints and this will happen only if the scheme enjoys continuing political support at all levels To this end the author individuates those institutional characteristics of countries that increase the consistency of reforms and lower the likelihood of policy reversals in time Pension Reforms in Central Eastern and Southeastern Europe will be of interest to students and scholars of political science political economy social policy and economics

The Post-Socialist City Kiril Stanilov, 2007-08-13 In the large body of literature produced during the last fifteen years on the transformation of Eastern European societies after the fall of communism studies investigating changes in urban form and structure have been quite rare Yet a profound reorganization of the manner in which urban space is appropriated has taken place impacting the life of over 200 million urban residents in the region The patterns of spatial organization which have been established during this fairly limited but critical timeframe are likely to set the direction of future urban development in CEE cities for a long time This book focuses on the spatial transformations in the most dynamically evolving urban areas of post socialist Central and Eastern Europe linking the restructuring of the built environment with the underlying processes and forces of socio economic reforms We hope that the detailed accounts of the spatial transformations in a key moment of urban history in the region will enhance our understanding of the linkages between society and space adding to the knowledge that is needed for resolving the difficult challenges facing cities throughout the globe in the beginning of the twenty first century

The Transformation of Economies in Central and Eastern Europe Alan H. Gelb, Cheryl Williamson Gray, 1991 [Small Transformations](#) János Mátyás Kovács, 2003 East Central Europe is about to bring its welfare reforms to the European Union Nevertheless in the course of the Accession one could hardly fix the European standards of social policy or examine to what degree the newcomers may have approached them Evidently there has always been a variety of welfare regimes in the EU Moreover today s experts in post communist

countries do not find stable policies and institutional arrangements in the West but rather another reform process the domestication of the classical welfare states True the general trends are not dissimilar partial retrenchment decentralization marketisation and privatisation of public welfare services as well as an upsurge of the voluntary sector are the main characteristic features of regulating welfare on both sides of the former Iron Curtain These issues are addressed by the contributors of this volume leading representatives of their professions in an unprecedented way In avoiding the convenient cliché
