Mathis,Tina M. Trujillo,2016-06-01 Over the past twenty years educational policy has been characterized by top down market focused policies combined with a push toward privatization and school choice The new Every Student Succeeds Act continues along this path though with decision making authority now shifted toward the states These market based reforms have often been touted as the most promising response to the challenges of poverty and educational disenfranchisement But has this approach been successful Has learning improved Have historically low scoring schools turned around or have the reforms had little effect Have these narrow conceptions of schooling harmed the civic and social purposes of education in a democracy This book presents the evidence Drawing on the work of the nation s most prominent researchers the book explores the major elements of these reforms as well as the social political and educational contexts in which they take place It examines the evidence supporting the most common school improvement strategies school choice reconstitutions or

massive personnel changes and school closures From there it presents the research findings cutting across these strategies by addressing the evidence on test score trends teacher evaluation miracle schools the Common Core State Standards school choice the newly emerging school improvement industry and re segregation among others The weight of the evidence indisputably shows little success and no promise for these reforms Thus the authors counsel strongly against continuing these failed policies The book concludes with a review of more promising avenues for educational reform including the necessity of broader societal investments for combatting poverty and adverse social conditions While schools cannot single handedly overcome societal inequalities important work can take place within the public school system with evidence based interventions such as early childhood education detracking adequate funding and full service community schools all intended to renew our nation s commitment to democracy and equal educational opportunity

Performative Approaches to Education Reforms Dorthe Staunæs,Katja Brøgger,John Benedicto Krejsler,2020-05-21 The purpose of this book is to investigate with conceptualization how reforms change educational organizations and subjectivities and how educational organizations change reforms The book gives an account of the power of conceptual endeavors with close readings of empirical material The book elaborates this through empirical investigations of the intertwinement of different educational reforms of policies standards and everyday educational lives across the globe As well as telling stories of reforms and how they transform and are transformed by the educational organizations and subjects they engage the book highlights how a careful enactment of methodologies and critiques might enable a tracing of not only intended but also unintended effects of reforms In this way the book explores performative approaches to education reform and thus attempts to nuance the idea of causality and linearity in the implementation of education reforms Engaging with performative approaches this book scrutinizes how reforms are involved with the creation and shaping of the world and thus offers insight into what happens when reforms are borrowed translated and taken up in a range of ways This book was originally published as a special issue of the International Journal of Qualitative Studies in Education

Harris,2020-07-15 In the wake of the tragedy and destruction that came with Hurricane Katrina in 2005 public schools in New Orleans became part of an almost unthinkable experiment eliminating the traditional public education system and completely replacing it with charter schools and school choice Fifteen years later the results have been remarkable and the complex lessons learned should alter the way we think about American education New Orleans became the first US city ever to adopt a school system based on the principles of markets and economics When the state took over all of the city's public schools it turned them over to non profit charter school managers accountable under performance based contracts Students were no longer obligated to attend a specific school based upon their address allowing families to act like consumers and choose schools in any neighborhood The teacher union contract tenure and certification rules were eliminated giving schools autonomy and control to hire and fire as they pleased In Charter School City Douglas N Harris provides an inside look at how and why these reform decisions were made and offers many surprising findings from one of the most extensive and rigorous evaluations of a district school reform ever conducted Through close examination of the results Harris finds that this unprecedented experiment was a noteworthy success on almost every measurable student outcome But as Harris shows New Orleans was uniquely situated for these reforms to work well and that this market based reform still required some specific and active roles for government Letting free markets rule on their own without government involvement will not generate the kinds of changes their advocates suggest Combining the evidence from New Orleans with that from other cities Harris draws out the broader lessons of this unprecedented reform effort At a time when charter school debates are more based on ideology than data this book is a powerful evidence based and in depth look at how we can rethink the roles for governments markets and nonprofit organizations in education to ensure that America's schools fulfill their potential for all students

Leading from the Inside Out David Grubb, Lynda Tredway, 2015-12-03 This book proposes that the collective responsibility of teachers as classroom and school leaders working together to solve their own problems provides the fulcrum of school change It makes the case that teachers and school leaders do not operate in a vacuum but rather they work within the larger context of policy and other social influences Grubb and Tredway provide the building blocks of history policy and social analysis that are necessary if teachers are to be effective in the collective school a place where adults thrive as learners and are able to co create joyful learning experiences for children and youth By encouraging teachers to move out of the individual classroom and to think critically and institutionally about the schools they would like to work in about their own responsibilities for creating such schools about the range of policies from outside the school and how they can influence those policies rather than being subjected to them this book shows that a teacher s influence is not limited to the classroom and students but can significantly shape and inform external policies and decisions
