Sea and the Second World War Marcus Faulkner,Alessio Patalano,2019-12-10 The sea shaped the course and conduct of World War II from the first moments of the German invasion of Poland on September 1 1939 to the Japanese surrender on September 2 1945 The impact could be felt far beyond the shoreline as the arms and armies carried across the oceans were ultimately destined to wage war ashore Populations and industries depended on the raw materials and supplies in a war that increasingly became a contest of national will and economic might Ultimately it was the war at sea that linked numerous regional conflicts and theaters of operation into a global war As the war grew in complexity and covered an increasingly larger geographical area the organization of the maritime effort and the impact it had on the formulation of national strategy also evolved This volume illustrates the impact of naval operations on the Second World War by highlighting topics previously neglected in the scholarship In doing so it provides new insights into political strategic administrative and operational aspects of the maritime dimension of the war *American Military Aviation* Charles Joseph Gross,2002
