accounts of the most important international developments in an area that now occupies a critical place in many fields of academic endeavors. While gays and lesbians have shared many aspects of life their histories and cultures developed in profoundly different ways. To reflect this crucial fact the encyclopedia has been prepared in two separate volumes assuring that both histories receive full unbiased attention and that a broad range of human experience is covered. Written for and by a wide range of people. Intended as a reference for students and scholars in all fields as well as for the general public the encyclopedia is written in user friendly language. At the same time it maintains a high level of scholarship that incorporates both passion and objectivity. It is written by some of the most famous names in the field as well as new scholars whose research continues to advance gender studies into the future.

*American Women During World War II* Doris Weatherford, 2009-10-16 *American Women during World War II* documents the lives and stories of women who contributed directly to the war effort via official and semi official military organizations as well as the millions of women who worked in civilian defense industries ranging from aircraft maintenance to munitions manufacturing and much more. It also illuminates how the war changed the lives of women in more traditional home front roles. All women had to cope with rationing of basic household goods and most women volunteered in war related programs. Other entries discuss institutional change as the war affected every aspect of life including as schools hospitals and even religion. *American Women during World War II* provides a handy one volume collection of information and images suitable for any public or professional library.

**Transnational Interconnections of Nature Studies and the Environmental Humanities** Sophia Emmanouilidou, Sezgin Toska, 2020-02-24 How is ecotinking articulated in varied research fields? What are the conjunctions and concurrences of academic endeavors in the attempt to curb environmental destruction? This collection of essays offers a multifaceted exploration of the basic tenets of environmentalism proposed by academic curricula across the world. Ecodestruction, the wilderness, rampant pollution, tourism, developments, sustainability, educational interventions and the plurivocal turn to ecotheoretical textual analysis are some of the critical perspectives and scientific findings investigated here. The book introduces a multilateral understanding of environmental consciousness and suggests that the study of nature should not be compartmentalized into separate fields of analyses but aim for the interconnections between disciplines. Given that the physical cosmos is an unambiguous and finite host of humanity's endeavours, the volume appeals to academics, researchers and professionals with a particular interest in the current environmental crisis. Offers solid insights into the ways human societies construe nature and hopefully will embark on the protection of the ecosphere.

attention in narrow and stereotypical ways on critical issues On the other they render other problems facing Filipino communities invisible This landmark book the first wide ranging edited collection on Filipinos in Canada explores gender migration and labour youth spaces and subjectivities representation and community resistance to certain representations Looking at these from the vantage points of anthropology cultural studies education geography history information science literature political science sociology and women and gender studies Filipinos in Canada provides a strong foundation for future work in this area
