*Combat Biplanes of World War II* Peter C. Smith, 2015-09-30 Aviation and maritime historian Peter C Smith reveals how both Allied and Axis powers used World War I era aircraft in *Combat Biplanes of World War II* The era of the combat biplane is usually thought to have been between 1914 and 1938 By the outbreak of World War II most of the advanced air forces of the world had moved on to monoplane aircraft for their front line battle forces both in bomber and fighter capacities Yet despite this many biplanes did still survive both in front line service and in numerous subsidiary roles and not just as training machines but as fully operational warplanes Thus in 1939 the majority of major European powers still retained some albeit few biplane aircraft Great Britain had the bulk of such obsolescent machines including the Gladiator Swordfish Walrus Vildebeeste and Audax while the inferior Albacore meant to replace the Swordfish had yet to enter service Germany still managed to conduct missions in which biplanes like the He 50 He 51 and Hs 120 excelled Both France and Italy had active biplanes Mussolini s Regia Aeronautica attaching great importance to the type as a fighter aircraft as late as 1941 while the Soviet Union also retained some machines like the Po 2 in front line service right through the war and beyond By the time Japan and the United States entered the war two years later they had mainly rid themselves of biplanes but even here a few specialized types lingered on *Combat Biplanes of World War II* describes many of these gallant old warriors representing the author s own personal selection from a surprisingly large range of aircraft that despite all predictions fought hard and well

**Task Force 58** Rod Macdonald, 2023-01-04. The new breed of American fast aircraft carriers could make thirty-three knots and each carried almost 100 strike aircraft. Brought together as Task Force 58, also known as the Fast Carrier Task Force, this awesome armada at times comprised more than 100 ships carrying more than 100 000 men afloat. By 1945, more than 1 000 combat aircraft, fighters, dive and torpedo bombers, could be launched in under an hour. The fast carriers were a revolution in naval warfare; it was a time when naval power moved away from the big guns of the battleship to air power projected at sea. Battleships were eventually subordinated to supporting and protecting the fast carriers, of which at its peak Task Force 58 had a total of seventeen. This book covers the birth of naval aviation, the appearance of the first

modern carriers in the 1920s through to the famous surprise six carrier \_Kido Butai\_ Japanese raid against Pearl Harbor on 8 December 1941 and then the early US successes of 1942 at the Battles of the Coral Sea and Midway The fast carriers allowed America in late 1942 and early 1943 to finally move from bitter defence against the Japanese expansionist onslaught to mounting her own offensive to retake the Pacific Task Force 58 swept west and north from the Solomon Islands to the Gilbert and Marshall Islands neutralising Truk in Micronesia and Palau in the Caroline islands before the vital Mariana Islands operations the Battle of Saipan the first battle of the Philippine Sea and the Great Marianas Turkey Shoot The strikes by Task Force 58 took Allied forces across the Pacific to the controversial Battle of Leyte Gulf and to Iwo Jima and Okinawa Task Force 58 had opened the door to the Japanese home islands themselves allowing US bombers to finally get close enough to launch the devastating nuclear bombing raids on Hiroshima and Nagasaki Task Force 58 participated in virtually all the US Navy s major battles in the Pacific theatre during the last two years of the war Having spent many years investigating naval shipwrecks across the Pacific many the result of the devastating effectiveness of Task Force 58 diver and shipwreck author Rod Macdonald has created the most detailed account to date of the fast carrier strike force the force that brought Japan to its knees and brought the Second World War to its crashing conclusion **White's Aviation** ,1945 **The 25 Most Influential Aircraft of All Time** Walter Boyne,Philip Handleman,2018-03-01 The 25 Most Influential Aircraft of All Time conveys the fascinating progression of flying technology from flimsy wood and fabric biplanes to thunderous supersonic wonders Aviation s most historically relevant and arguably most influential aircraft planes like the elliptical winged Spitfire the blisteringly fast X 15 and the ubiquitous Learjet are dramatically showcased in individual chapters Factors like performance price operational efficiency and perceptions in popular culture are examined People are just as important as hardware in the discussion of the world s greatest aircraft The larger than life characters who designed and built these aeronautical marvels men like the reclusive Howard Hughes and the demanding Clarence Kelly Johnson are an indispensable part of the story So too are the fearless pilots like Charles Lindbergh and Chuck Yeager who gave life to the shining examples of a new and dynamic industry The authors have flown or flown in many of the featured aircraft and they knew many of the luminous personalities involved enabling them to share unique perspectives The preface is written by William Lloyd Stearman a former staff member of the National Security Council and the son of famed industry engineer Lloyd Stearman The introduction is written by Norman R Augustine the retired Chairman and CEO of Lockheed Martin Corporation The foreword is written by Burt Rutan the renowned aircraft designer and founder of Scaled Composites Each aircraft is magnificently illustrated in color mostly with paintings by leading aviation artists **U.
