bestselling and paradigm shifting first book *Other People's Children* focused on cultural slippage in the classroom between white teachers and students of color Now in *Multiplication Is for White People* Delpit reflects on two decades of reform efforts including No Child Left Behind standardized testing the creation of alternative teacher certification paths and the charter school movement that have still left a generation of poor children of color feeling that higher educational achievement isn't for them In chapters covering primary middle and high school as well as college Delpit concludes that it's not that difficult to explain the persistence of the achievement gap In her wonderful trademark style punctuated with telling classroom anecdotes and informed by time spent at dozens of schools across the country Delpit outlines an inspiring and uplifting blueprint for raising expectations for other people's children based on the simple premise that multiplication and every aspect of advanced education is for everyone

Culturally Affirming Literacy Practices for Urban Elementary Students Lakia M. Scott, Barbara Purdum-Cassidy,2016-08-17 The nation s demographic of public schools are more ethnically racially and linguistically diverse than ever before Strauss 2014 However there are still educational policies and practices that call to question whether traditionally marginalized students receive an equitable education This is demonstrated in national achievement trends which highlight disproportionality ratings among minoritized student groups Also when examining school discipline policies expulsion ratings special education services and school choice movements all seem to handicap educational opportunity for low income Black and Brown students As American schools become more and

more diverse it is imperative that the literacy practices used to teach young students of color reflect the nation's changing demographic. This book provides practical insights guided by conceptual and contextual knowledge in understanding how to teach urban African American and Hispanic/Latino students by discussing issues associated with critical pedagogies, literacy, and culturally appropriate instructional strategies that have demonstrated success for traditionally marginalized student populations. This book examines culturally affirming literacy practices from three main components: 1. scholarship, 2. the field of practice, and 3. teacher education models. Each of these three are significant in understanding how to teach minoritized populations. As such, chapters have been organized into three main sections that address scholarship and research trends in the field and implications for teacher education models all in order to advance the literacy achievement of African American and Hispanic/Latino students.
