interpretation is to convert raw image data into meaningful information Images are often interpreted manually In medicine for example a radiologist looks at a medical image interprets it and translates the data into a clinically useful form Manual image interpretation is however a time consuming error prone and subjective process that often requires specialist knowledge Automated methods that promise fast and objective image interpretation have therefore stirred up much interest and have become a significant area of research activity Early work on automated interpretation used low level operations such as edge detection and region growing to label objects in images These can produce reasonable results on simple images

but the presence of noise occlusion and structural complexity often leads to erroneous labelling. Furthermore, labelling an object is often only the first step of the interpretation process. In order to perform higher level analysis, a priori information must be incorporated into the interpretation process. A convenient way of achieving this is to use an explicit model to encode information such as the expected size, shape, appearance, and position of objects in an image. The use of explicit models was popularized by the active contour model or snake [98]. A snake deforms so as to match image evidence (e.g. edges) whilst ensuring that it satisfies structural constraints. However, a snake lacks specificity as it has little knowledge of the domain, limiting its value in image interpretation.

Embodying Music: A Textbook for Dalcroze Teacher Training towards the Dalcroze Professional Certificate Jeremy Dittus, 2025-04-08. Dalcroze Education is an experiential way of knowing music through the body. This dynamic and profound philosophy stems from an oral tradition that can be traced back to those who studied directly with mile Jaques Dalcroze in Geneva, Switzerland, during his lifetime 1865-1950. Recent trends in music education and Dalcroze students' stated needs have demanded more specificity and accessibility; these books aim to meet those needs by providing examples of many important skills necessary for a successful Dalcrozian without being narrow or prescriptive. Dalcroze Eurhythmics, Solfège, Improvisation, Plastique, Animé, and Pedagogy are all addressed in these volumes to prepare students to earn the Dalcroze Professional Certificate; students using this text should be enrolled at an authorized Dalcroze Training Center run by someone who holds the Diplôme Supérieur from l'Institut Jaques Dalcroze in Geneva, Switzerland. Students who use these books should already have had a fair amount of musical training; an undergraduate degree in music is recommended though not required as the starting point for readers of these texts. It is my hope that these books will enable individuals to gain access to la Mthode Jaques Dalcroze with more efficiency and facility while maintaining the high standards of musicianship that are required to offer joyful and musically inspiring coursework in Dalcroze Education.
