Scaling Up Education Reform Russell Bishop, Dominic O'Sullivan, Mere Berryman, 2010-01-01 What is school reform What makes it sustainable Who needs to be involved How is scaling up achieved This book is about the need for educational reforms that have built into them from the outset those elements that will see them sustained in the original sites and spread to others Using the Te Kotahitanga Project as a model the authors branch out from the project itself to seek to uncover how an educational reform can become both extendable and sustainable Their model can be applied to a variety of levels within education classroom school and system wide It has seven elements that should be present in the reform initiative from the outset These elements include establishing goals and a vision for reducing disparities embedding a new pedagogy to depth in order to change the core of educational practice developing new institutions and organisational structures to support in class initiatives developing leadership that is responsive proactive and distributed spreading the reform to include all teachers parents community members and external agencies developing and using appropriate measures of performance as evidence for modifying core classroom and school practices creating opportunities for all involved to take ownership of the reform in such a way that the original objectives of the reform are protected and sustained This book is an essential read for anyone who is involved in the process of trying to achieve sustainable school reform that addresses the question of how mainstream schools can effectively address the learning needs of students currently not well served by education The authors of this book are descended from a number of Maori tribes in New Zealand They are part of the growing ethnic revitalisation movement that has seen Maori people seeking their own solutions to the ongoing social economic and political disparities that continue to plague Maori

people in Aotearoa New Zealand This book focuses on their attempts to work within and change mainstream classrooms to include all children in the benefits that education has to offer **Education Reform and the Concept of Good Teaching**

Derek Gottlieb, 2014-08-27 In an effort to address the problems confronting the American education system the Obama administration has issued structural and systematic reforms such as Race to the Top These initiatives introduce new statistics and accountability systems to gauge what constitutes good teaching both from an administrative standpoint and the perspective of teacher training programs This volume offers a direct critique of this approach concluding that it does not respond adequately to the issues of education reform but rather raises new problems and actively stymies progress The author argues that at the heart of the confusion lies a misguided and rationalistic view of teaching and learning He draws on the philosophical strategies of Ludwig Wittgenstein to break down the guiding assumptions of Race to the Top allowing both the positive and the negative aspects of the policies to be heard The author then proposes a different view of teaching and learning which considers how to effectively address the problems Race to the Top seeks to confront Resources in Education ,1998 **Scaling Up Urban School Reform** Temple University. Laboratory for Student Success,1998*

Facing the Challenges of Whole-school Reform Mark Berends, Susan J. Bodilly, Sheila Nataraj Kirby, 2002 About a decade ago New American Schools NAS set out to address the perceived lagging performance of American students and the lackluster results of school reform efforts As a private nonprofit organization NAS's mission was and is to help schools and districts raise student achievement levels by using whole school designs and design team assistance during implementation Since its inception NAS has engaged in a development phase 1992 1993 a demonstration phase 1993 1995 and a scale up phase 1995 present Over the last ten years RAND has been monitoring the progress of the NAS initiative This book is a retrospective on NAS and draws together the findings from RAND research The book underscores the significant contributions made by NAS to comprehensive school reform but also highlights the challenges of trying to reform schools through whole school designs Divided into sections on each research phase the book concludes with an afterword by NAS updating its own strategy for the future This book will interest those who want to better understand comprehensive school reform and its effects on teaching and learning within high stakes accountability environments
