## **Scandinavian Perspectives On The Evaluators Role In Informing Social Policy:**

**Values in Evaluation and Social Research** Ernest . House,Kenneth R. Howe,1999-08-03 Values in Evaluation is a breakthrough book that will change the way evaluators think about the relationship between facts and values Using the tools of philosophy and insights from evaluation practice the authors attack the inconsistencies in current thinking about the interplay of facts and values and give us an outline for reconstructing the approach to values within evaluation Gary T Henry Georgia State University This book as the title promises unfurls the concept of value in the practice of program evaluation The editors go well beyond recognizing that all data gathering and description are value laden and that all evaluators have value commitments shaping their designs They examine the ethical and political burdens accompanying any evaluation contract Out of an extended collaboration Kenneth R Howe and Ernest R House together redirect their advocacy toward the pursuit of democracy Robert E Stake University of Illinois Urbana Champaign The authors use the tools of philosophy and the insights from evaluation practice to cut through current confusion about values and the interplay of facts and values Four views of facts and values in evaluation are analyzed those rooted in a fact value dichotomy and those of radical constructivists postmodernists and deliberative democrats The arguments are tough the prose concise and the insights compelling     *Scandinavian Perspectives on the Evaluator's Role in Informing Social Policy ,1998*     **The SAGE**

**Handbook of Social Work Research** Ian Shaw,Katharine Briar-Lawson,Joan Orme,Roy Ruckdeschel,2009-11-27 This is an ambitious book It aims at nothing less than a comprehensive account of the state of the art of social work research internationally and an intellectually original statement that will help to define and shape social work research Those with a serious interest in social work research will agree that this is a major undertaking and one that should put social work research on the map Ian Sinclair University of York UK This terrific Handbook provides an essential map for navigating the complex currents of social work research today It resists polemical and simplistic binaries to chart a course that emphasizes diversity pluralism and sensitivity to political contexts in many featured exemplars As key chapters note inherent tensions at the heart of social work itself are mirrored in current debates about the purposes and methods of social work research Rather than patch over differences the volume invites us to understand historical roots of unresolvable tensions and live with them The international scope of the volume is unique scholars from more than a dozen different countries were involved and its broad scope counters the tendency toward parochialism of much North American literature The Handbook should be essential reading for students and academics Catherine Riessman Boston University USA The SAGE Handbook of Social Work Research provides a comprehensive internationally focused account of leading social work research offering an original and defining statement on contemporary theory and practice within the field The groundbreaking Handbook engages critically with the nature and role of social work research and evaluation in contemporary societies around the globe and asks four key questions What is the role and purpose of social work research What contexts shape the practice and purpose

of social work research How can we maximise the quality of the practice of social work research How can the aims of social work in its varied domains be met through social work research Ranging over local national and international issues and exploring questions of theory and practice this is a diverse and constructively organized overview of the field It will quickly be recognized as a benchmark in the expanding field of social work research setting the agenda for future work in the arena

**Evaluation** Jan-Eric Furubo,2018-02-06 Evaluation has come of age Today most social and political observers would have difficulty imagining a society where evaluation is not a fixture of daily life from individual programs to local authorities to parliamentary committees While university researchers grant makers and public servants may think there are too many types of evaluation rankings and reviews evaluation is nonetheless viewed positively by the public It is perceived as a tool for improvement and evaluators are seen as dedicated to using their knowledge for the benefit of society The book examines the degree to which evaluators seek power for their own interests This perspective is based on a simple assumption If you are in possession of an asset that can give you power why not use it for your own interests Can we really trust evaluation to be a force for the good To what degree can we talk about self interest in evaluation and is this self interest something that contradicts other interests such as the benefit of society Such questions and others are addressed in this brilliant innovative international collection of pioneering contributions     *Evaluation Models* D.L. Stufflebeam,George F. Madaus,T.

**Modernising the Knowledge Base of Social Work?** Hans-Uwe Otto,Andreas Polutta,Holger Ziegler,2009-06-04 The quest to create an evidence based Social Work practice is emerging strongly in different fields of Social Work and social policy In this volume internationally renowned proponents and opponents of this approach deliver profound analyses of the meaning and implications of an evidence based perspective which clearly challenges the nature of the knowledge base of the established Social Work practice and apparently reevaluates and reshapes the character of welfare professionalism Aus dem Inhalt What Knowledge Evidence based Practice Profession and Users Organising Measuring and Implementing Evidence Towards an Evidence based Professionalism     *Evaluation Theory, Models, and Applications* Daniel L. **International Perspectives on Evaluation Standards** Craig Russon, Gabrielle Russon, 2005-02-11 Prior to 1995 there were fewer than half a dozen regional and national evaluation organizations around the world. Today there are more than fifty attesting to a growing interest in the practice of program evaluation internationally. Many of these new organizations have undertaken efforts to develop their own standards or to modify existing sets most typically the Program Evaluation Standards of the Joint Committee on Standards for Educational Evaluation for use in their own cultural context. Following two introductory chapters one a conceptual overview and the second a history of the development and revisions of the Program Evaluation Standards this issue documents standards development efforts in three different settings Western Europe Africa and Australasia. In addition because nongovernmental organizations and governments have entered the standard setting business other chapters describe standards development activities by the European Commission and CARE International. The content points to the challenge of formalizing standards for program evaluation given cross cultural differences in values and to the continuing challenges related to implementing voluntary standards. This is the 104th issue of the quarterly journal New Directions for Evaluation.

**Global Advances in HIV / AIDS Monitoring and Evaluation**

Greet Peersman, Michel Carael, 2004-11-18 The focus of this issue is on global advances in conducting monitoring and evaluation M E of the global response to the HIV AIDS epidemic Only by implementing comprehensive and sustainable M E systems will we know how much progress we are making as nations and as a global community in combating this pandemic The chapters primarily focus on developing nations and are presented largely from the perspective of evaluators working for donors international agencies and national governments Although it is clear that a comprehensive M E system must eventually include both monitoring and evaluation the initial aim has been to establish a foundation derived largely from surveys and monitoring information To date much of the focus in M E has come from the global level because new global funding initiatives have been launched and required rapid scale up and the development of technical guidance international standards and indicators for monitoring progress and determining success At the regional and country levels the challenge has been to implement national M E plans and systems within a context of overall low M E capacity and a range of M E needs
