Lobban Jr.,2021-04-10 This new book descends from a former combined reference book on Ancient and Medieval Nubia but now expands and focuses primarily on Prehistoric and Ancient times It contextualizes the foundational roots of human evolution in the

Paleolithic and Mesolithic stone ages and on to the Neolithic revolution built on farming and livestock. Meanwhile Kerma was the most ancient African state and their relationship with dynastic Egypt. Precisely ancient Kerma was a serious political, economic, and military rival to Old and Middle Kingdoms of Egypt. But in the New Kingdom, the balance of regional forces was dramatically changed with Egyptians defeating Kerma and occupying and colonizing Kush/Nubia for 500 years. In the 11th century BCE, the political unity of Egypt withered away, and after recovering from foreign exploitation, Nubians began to reconstitute a small state at Kurru with renewed pyramid building, and then, finding no Egyptian resistance, these Nubian kings advanced on Egyptian Nubia and then on to Upper Egypt. Finally, Nubians were able to take over all of Egypt as the pharaohs of the 25th Dynasty. This so-called Ethiopian dynasty had the famed pharaohs of Piankhy, Shabaka, Shabataka, Taharka, and Tanutamun, ruling for various terms, three of whom are mentioned in the Biblical Old Testament. Even when Nubians were expelled from Egypt by foreign Assyrian invaders, they retreated to Napata to carry on their ancient state for three more independent centuries, as Egypt remained conquered by various foreigners for 2,500 years. Most notable of these foreign conquerors of Egypt were the Greeks, Ptolemies, and the Romans, who arrived as polytheists and left as Christians. During this Greco-Roman period in Egypt, Nubians strategically withdrew still further south to the Kingdom of Meroe. From the 4th century BCE to the 4th century CE, Meroe is also covered in great detail, as it was famed for many regnant queens, a unique and undeciphered writing system, iron production, and important monumental works, including more pyramids than found in Egypt. Yes, smaller and later, but many more pyramids that are still standing in several World Heritage sites in Nubia. After Meroe began a long decline, it was finally vulnerable to attack from Christian Axum in the 4th century CE. Two murky centuries of regional rule, known as the X Group, were to follow, but by the 6th century, Nubians recreated three Christian states, which are covered in detail in the following: *Historical Dictionary of Medieval Christian Nubia* and the *Historical Dictionary of Sudan* for Islamic and modern times.

**Exploring Earthiness** Anne Primavesi, 2014-08-28. If we see ourselves as Earth rather than Earth as existing for us, our perspective is transformed. A variety of religious, philosophical, cultural, and political self-perceptions that dominate our sense of human identity are deeply challenged by this shift in perspective. John Locke's doctrine of Earth as human property has been central to current presuppositions about ourselves, justified on the grounds of our possessing unique, divinely bestowed rational abilities. But today, the effects of that doctrine on Earth's resource base and on its other-than-human creatures directly challenge such assumptions. At the same time, contemporary scientific findings about the evolution of earthly life demonstrate that while we belong to Earth and nowhere else, Earth does not belong to us. Exploring this role reversal raises fundamental questions about current theological, philosophical, scientific, and economic presuppositions that underpin the business-as-usual viewpoint and human-centered aims of contemporary policies and lifestyles. It takes us beyond hierarchical Christian and philosophical doctrines toward a deeper, Earth-focused and peace-based understanding of what it means to be human today.
