Scenarios In Public Policy:

Scenarios in Public Policy Gill Ringland, 2002-05-22 The history of scenario planning is rich and varied Throughout the ages people have tried to make decisions today by studying the possibilities of tomorrow When that tomorrow was more predictable and less fraught with uncertainty those possibilities had a good chance of being the right ones Now however the only given constant in a world of complexity is change itself In an environment where information technology is driving an information revolution and where the rules can be rewritten with breathtaking speed planning can seem more based on luck than foresight There are methods for coping with unpredictability The Scenario planning techniques described in this book will help to think about uncertainty in a structured way Based on Gill Ringland s previous book *Scenario Planning Managing for the Future* this updated and expanded version focuses specifically on scenarios in public policy The use of scenarios to create a framework for a shared vision of the future by promoting discussion and building consensus outside a business environment is examined Ringland also looks at the similarities between organizations which have used scenarios successfully such as the importance of communication via storyline and image *Scenarios in Public Policy* and its companion *Scenario Planning in Business* are both practical paperback books that each expand on specific areas of Scenario Planning They will appeal to managers looking to learn about and apply a particular aspect of scenario planning Reviews of Gill Ringland s previous work Nobody can ignore the future This book is a must read for any manager aspiring to put scenarios into practice Arie de Geus Former Director of Shell International Petroleum and author of *The Living Company* Gill Ringland offers us a mechanism by which to bring structure to information technology and other forms of complexity offering us the vital ability to understand the dynamics of change Oliver Sparrow Chatham House Forum

Handbook on Complexity and Public Policy Robert Geyer, Paul Cairney, 2015-05-29 Over recent years Complexity Science has revealed to us new limits to our possible knowledge and control in social cultural and economic systems Instead of supposing that past statistics and patterns will give us predictable outcomes for possible actions we now know the world is and will always be creative and surprising Continuous structural evolution within such systems may change the mechanisms descriptors problems and opportunities often negating policy aims We therefore need to redevelop our thinking about interventions policies and policy making moving perhaps to a humbler more learning approach In this Handbook leading thinkers in multiple domains set out these new ideas and allow us to understand how these new ideas are changing policymaking and policies in this new era Peter M Allen Cranfield University UK

Scenarios Kees van der Heijden, 2011-03-10 Scenario planning allows companies to move away from linear thinking and better understand external change Eight years and 30 000 copies after publication *Scenarios* is still acknowledged as the definitive work in the field Now Kees van der Heijden brings his

bestseller up to date following up on his original case studies and adding significant new material The Second Edition changes focus slightly by providing more in depth analysis and application of the concept of the strategic conversation While maintaining the underlying rigour of the first edition van der Heijden revisits the text to make it far more practical and accessible and in doing so gives you the tools you need to set out and negotiate a successful future course for your organization in the face of significant uncertainty

Scenario Based Strategy Paul de Ruijter,2016-04-01 We need strategy The world is changing the future uncertain What is required is vision What might the future bring Where is our business going What are our fundamental business values This book is a manual for all those who want to apply strategy in organisations It is intended for everyone who wants to put the future on the agenda to look beyond the short term and beyond mere profit It describes in practical terms the eight questions we must continually discuss in order to pursue a future proof strategy in a dynamic and uncertain world mission trends scenarios options vision roadmap action and monitoring If you are dissatisfied with an approach to strategy based on simple backward looking analysis management controls and problems solving after the fact but would like to make a positive contribution to thinking about the future Scenario based Strategy offers the instruments to turn your intention into practice The text provides examples from commercial to government and trade organizations showing how others have undertaken future explorations and how they used these explorations to create a dynamic strategy Paul de Ruijter has a deep insight into the theory alongside practical experience working with some of the most highly regarded and resilient organizations The result is a rich combination of methodology and practical engaging examples that shows you how to go about creating an agenda for the future

Greenhouse Gas Control Technologies B. Eliasson,P. Riemer,A. Wokaun,1999-05-20 These proceedings contain 270 papers outlining ideas and contributions to the new scientific technical and political discipline of Greenhouse Gas GHG Control The contributions were presented at the 4th International Conference on Greenhouse Gas Control Technologies GHGT 4 It was the largest gathering of experts active in this new and

fast developing field GHGT 4 was different from its predecessors in that it included all greenhouse gases not only CO₂ and all issues which could contribute to the mitigation of the greenhouse problem technical economic and political The main focus was on practical solutions and real demonstrations of mitigation technology being planned and implemented today It also addressed ways to increase the efficiency of power production and utilisation and looked at proposals to encourage the development of renewable energy sources During the Opening Session 10 keynote addresses were heard from prominent personalities in government industry and academia To tackle this very inter disciplinary problem and to achieve acceptable solutions it is essential for industry and government to initiate intense dialogue and cooperation Conferences like this can provide the opportunity for a meeting of minds between engineers and politicians in the face of global challenge The primary attributes of this global challenge are manifold the problem is global and international it is inter disciplinary both in substance and approach it covers technical political and economic issues and involves government science industry and academia it is complex and non linear and it will take the efforts of all parties involved to solve the problem These proceedings contain ideas for starting demonstration projects and for making better use of the power and flexibility of market measures They also show it is a problem we can influence and that there is a wealth of ideas The challenge now is to find the right partners to put these ideas into action

New Public Governance, the Third Sector, and Co-Production

Victor Pestoff, Taco Brandsen, Bram Verschuere, 2013-06-19 In recent years public management research in a variety of disciplines has paid increasing attention to the role of citizens and the third sector in the provision of public services Several of these efforts have employed the concept of co production to better understand and explain this trend This book aims to go further by systematizing the growing body of academic papers and reports that focus on various aspects of co production and its potential contribution to new public governance It has an interdisciplinary focus that makes a unique contribution to the body of knowledge in this field at the cross roads of a number of disciplines including business administration policy studies political science public management sociology third sector studies etc The unique presentation of them together in this volume both allows for comparing and contrasting these different perspectives and for potential theoretical collaboration and development More particularly this volume addresses the following concerns What is the nature of co production and what challenges does it face How can we conceptualize the concept of co production How does co production works in practice How does co production unfold in reality What can be the effects of co production And more specific firstly how can co production contribute to service quality and service management in public services and secondly what is the input of co production on growing citizen involvement and development of participative democracy
