## **Scented Ape The Biology And Culture Of Human Odour:**

*The Scented Ape* David Michael Stoddart, 1990-11-29 Both men and women devote time and effort to removing natural body odour and replacing it with sexual attractant odours derived from plants and animals we seem to need to smell of something other than people Yet of all the apes we are the most richly endowed with scent producing glands This book examines the sense of smell in humans comparing it with the known functions of the same sense in other animals Odorous cues play a role in sexual physiology and behaviour in animals and there are claims that odour can play the same role in humans The place of odours and scents in aesthetics and in psychoanalysis serves to illustrate the link between the emotional centres and the brain The book presents arguments to explain the way in which our ancestral past has given rise to our modern day olfactory enigmas The material is presented with as much explanation of the technical detail as possible to make the book accessible to a wide readership *The Scented Ape* David Michael Stoddart, 1990 **Shadows of Forgotten**

**Ancestors** Carl Sagan, Ann Druyan, 1993-09-07 NATIONAL BESTSELLER Exciting and provocative A tour de force of a book that begs to be seen as well as to be read The Washington Post Book World World renowned scientist Carl Sagan and acclaimed author Ann Druyan have written a Roots for the human species a lucid and riveting account of how humans got to be the way we are *Shadows of Forgotten Ancestors* is a thrilling saga that starts with the origin of the Earth It shows with humor and drama that many of our key traits self awareness technology family ties submission to authority hatred for those a little different from ourselves reason and ethics are rooted in the deep past and illuminated by our kinship with other animals Sagan and Druyan conduct a breathtaking journey through space and time zeroing in on critical turning points in evolutionary history and tracing the origins of sex altruism violence rape and dominance Their book culminates in a stunningly original examination of the connection between primate and human traits Astonishing in its scope brilliant in its insights and an absolutely compelling read *Shadows of Forgotten Ancestors* is a triumph of popular science *Chemical*

*Signals in Vertebrates* 12 Marion L East, Martin Dehnhard, 2013-02-26 Three invited international experts present overviews of recent developments in key fields and will submit chapters for the book Jane Hurst from Liverpool University in the UK presents an overview on the function mechanisms and evolution of chemical signals Penelope Hawkins from the University of Western Australia will detail the importance of male odors in female mate choice and the priming of female reproduction and Francesco Bonadonna from CNRS CEFE Montpellier in France presents an overview of the importance of chemical signals for the formation and maintenance of pair bonds parent offspring recognition and navigation in seabirds Select submissions are invited by the scientific committee to contribute chapters *Human Evolution* Bernard Campbell, 2017-09-04 In this new fourth edition Campbell has revised and updated his classic introduction to the field *Human Evolution* synthesizes the major findings of modern research and theory and presents a complete and integrated account of the evolution of human beings New developments in microbiology and recent fossil records are incorporated into the enormous range of this volume with

the resulting text as lucid and comprehensive as earlier editions The fourth edition retains the thematic structure and organization of the third with its cogent treatment of human variability and speciation primate locomotion and nonverbal communication and the evolution of language supported by more than 150 detailed illustrations and an expanded and updated glossary and bibliography As in prior editions the book treats evolution as a concomitant development of the main behavioral and functional complexes of the genus Homo among them motor control and locomotion mastication and digestion the senses and reproduction It analyzes each complex in terms of its changing function and continually stresses how the separate complexes evolve interdependently over the long course of the human journey All these aspects are placed within the context of contemporary evolutionary and genetic theory analyses of the varied extensions of the fossil record and contemporary primatology and comparative morphology The result is a primary text for undergraduate and graduate courses one that will also serve as required reading for anthropologists biologists and nonspecialists with an interest in human evolution

**Scent from the Garden of Paradise. Musk and the Medieval Islamic World** Anya H. King, 2017-01-09

Since antiquity musk has been a valued perfume and medicine Because the musk deer only lives in Central Eurasia people in other locations had to trade for its musk For medieval Islamic civilization musk became the most important of all aromatics The musk trade thus illuminates the nature of medieval Asian trade and musk's cultural effects on the Islamic world

**Scent from the Garden of Paradise Musk and the Medieval Islamic World** examines the history of musk from its origins in Asia to its uses in the medieval Middle East surveys the Islamic literature on musk and discusses the roles of musk in perfumery and medicine as well as the symbolic importance of musk in Islam

**Communicating** Ruth Finnegan, 2023-10-30

Treatments of human communication mostly draw on cognitive and word centred models to present it as predominantly a matter of words This Finnegan argues seriously underestimates the far reaching multi modal qualities of human interconnecting and the senses of touch olfaction and above all audition and vision that we draw on In an authoritative and readable account Ruth Finnegan brings together research from linguistic and sensory anthropology material culture non verbal communication computer mediated communication and strikingly research on animal communication such as the remarkable gesture systems of great apes She draws on her background in classical studies and her long anthropological experience to present illuminating examples from throughout the world past and present The result is to uncover an amazing array of sounds sights smells gestures looks movements touches and material objects used by humans and other animals to interconnect both nearby and across space and time She goes on to first explore the extra sensory modes of communication now being revealed in the extraordinary new science research and then in an incendiary conclusion to deny the long prevailing story of human history by questioning whether orality really came before literacy whether it was really through the acquisition of language that our prehistoric cave painting ancestors made a sudden leap into being true humans and finally astonishingly to ask whether human communicating had its first roots not after all in verbal language but something else Not to be missed this

highly original book brings a fresh perspective on among other things that central topic of interest today the dawn of human history and on what being homo sapiens really means This revised and updated edition has additional illustrations updated chapters and a new concluding chapter A provocative and controversial account that will stir worldwide debate this book is an essential transdisciplinary overview for researchers and advanced students in language and communication anthropology and cultural studies

Mummies, Cannibals and Vampires Richard Sugg, 2012-04-27 Mummies Cannibals and Vampires charts in vivid detail the largely forgotten history of European corpse medicine when kings ladies gentlemen priests and scientists prescribed swallowed or wore human blood flesh bone fat brains and skin against epilepsy bruising wounds sores plague cancer gout and depression One thing we are rarely taught at school is this James I refused corpse medicine Charles II made his own corpse medicine and Charles I was made into corpse medicine Ranging from the execution scaffolds of Germany and Scandinavia through the courts and laboratories of Italy France and Britain to the battlefields of Holland and Ireland and on to the tribal man eating of the Americas Mummies Cannibals and Vampires argues that the real cannibals were in fact the Europeans Medicinal cannibalism utilised the formidable weight of European science publishing trade networks and educated theory For many it was also an emphatically Christian phenomenon And whilst corpse medicine has sometimes been presented as a medieval therapy it was at its height during the social and scientific revolutions of early modern Britain It survived well into the eighteenth century and amongst the poor it lingered stubbornly on into the time of Queen Victoria This innovative book brings to life a little known and often disturbing part of human history

Adam's Nose, And The Making Of Humankind Michael Stoddart, 2015-02-12 This book is about the evolution of the sense of smell from its bacterial origin 3 4 billion years ago to today s modern sophisticated humans with an insatiable appetite for perfumes and fragrances It explains how smell works and how animals sense the environment The relationship between sex and smell drives much of animal behaviour and the significance of the human loss of the vomeronasal organ a part of the sense of smell in animals that responds to sex smells is identified as a seminal event in the making of humankind Humans are far more than animals however and Adam s Nose explores incense and perfumes as well as the odour imagery in art literature and poetry It is written for readers interested in what makes us human and does not presuppose a high level of scientific understanding The text is comprehensive and provides key references to the relevant scientific literature The book will appeal to scientists and students in a range of biological disciplines including human evolution anthropology olfactory communication animal behaviour perfumery and aromatherapy

*Communicating* Ruth H. Finnegan, 2002 Annotation Focusing on embodied and material processes rather than cognitive or mentalist models and on practice rather than text this book reveals why a limited view of human communication is unsatisfactory

Intercultural Communication James W. Neuliep, 2016-12-27 In the fully updated Seventh Edition of Intercultural Communication A Contextual Approach bestselling author James W Neuliep provides a clear contextual model visually depicted by a series of concentric circles for examining communication within

cultural microcultural environmental sociorelational and perceptual contexts Students are first introduced to the broadest context the cultural component of the model and progress chapter by chapter through the model to the most specific dimensions of communication Each chapter focuses on one context and explores the combination of factors within that context including setting situation and circumstances Highlighting values ethnicity physical geography and attitudes the book examines means of interaction including body language eye contact and exchange of words as well as the stages of relationships cross cultural management intercultural conflict and culture shock

**Magic of Fashion** Brian Moeran, 2015-10-31 Why do women all over the world read fashion magazines like Vogue Elle Harper s Bazaar and Marie Claire How do editorial art and advertising staff put together the monthly editions of each title in France Hong Kong Japan the UK and the U S Based on the author s two decades of ethnographic fieldwork and content analysis and drawing on anthropological theories The Magic of Fashion argues that the fashion industry makes commercial use of practices and rituals commonly found in magical and religious rites to enchant its readers The book argues that fashion magazines make use of professional magicians editors art directors photographers business executives who perform magic like practices to create the fantasies glamour seduction and transformations characterizing the fashion and beauty industries discusses how such beauty products as hair gels and glossy photos among many others are used to captivate and mesmerize readers much as incenses magical elixirs and spells enchant worshippers explains how fashion magazines entice readers with an alchemy of refined and powerfully addictive contrasts designed to be irresistible and seductive suggests that such forms of manipulation derived from shamanism and animism can be found in all forms of cultural production

**Primates, Pathogens, and Evolution** Jessica F. Brinkworth, Kate Pechenkina, 2013-08-30 The immune systems of human and non human primates have diverged over time such that some species differ considerably in their susceptibility symptoms and survival of particular infectious diseases Variation in primate immunity is such that major human pathogens such as immunodeficiency viruses herpesviruses and malaria inducing species of Plasmodium elicit striking differences in immune response between closely related species and within primate populations These differences in immunity are the outcome of complex evolutionary processes that include interactions between the host its pathogens and symbiont commensal organisms The success of some pathogens in establishing persistent infections in humans and other primates has been determined not just by the molecular evolution of the pathogen and its interactions with the host but also by the evolution of primate behavior and ecology microflora immune factors and the evolution of other biological systems To explore how interactions between primates and their pathogens have shaped their mutual molecular evolution Primates Pathogens and Evolution brings together research that explores comparative primate immune function the emergence of major and neglected primate diseases primate microorganism molecular interactions and related topics This book will be of interest to anyone curious as to why infectious diseases manifest differently in humans and their closest relatives It will be of particular interest to scholars specializing in

human and non human primate evolution epidemiology and immunology and disease ecology Primates Pathogens and Evolution offers an overview and discussion of current findings on differences in the molecular mechanics of primate immune response as well as on pathogen mediated primate evolution and human and non human primate health Sexual Essays James Giles,2017-11-22 Sexuality is a basic feature of human life Gender sexual and romantic attraction sexual excitement and sexual desire and fantasies all move in various degrees through our daily awareness However despite this pervasiveness there is much disagreement surrounding the nature of such things and experiences This book explores just these issues in an attempt to get clear about this enigmatic aspect of our existence Through a series of interrelated essays internationally acclaimed philosopher James Giles takes the reader on a fascinating journey to the depths of experiential social biological and evolutionary aspects of sexual life Presenting his arguments and ideas in a clear and easy to follow language Giles criticizes several popular views clearing the way for his own unique vision of human sexuality Often controversial always engaging these pages will prove to be absorbing reading for anyone who has ever pondered the nature of sexuality and why it fills our lives in the way it does Impulse David Lewis,2013-10-01 Impulse explores what people do despite knowing better along with snap decisions that occasionally enrich their lives This eye opening account looks at two kinds of thinking one slow and reflective the other fast but prone to error and shows how our mental tracks switch from the first to the second leading to impulsive behavior **Chance in the House of Fate** Jennifer Ackerman,2001 Recent discoveries in molecular biology have shown that genes governing life processes in widely different organisms from yeast to humans are essentially alike That is the underlying theme of this book as it looks for meaning in the natural world while exploring complex questions in molecular genetics Ackerman a former staff writer for National Geographic and a nature author Notes from the Shore weaves her own personal experiences into this popular account of the natural history of heredity When she is pregnant with her first child Ackerman worries that the baby will inherit the gene that caused the retardation of her younger sister Topics range from development and sex determination to biological clocks and cell death and more **The Sex Imperative** Kenneth E. Maxwell,2013-11-11 The sex imperative the irresistible impulse to engage in sexual relations has enabled animals to share their genes and evolve Maxwell traces the progress of sex from the simple sharing of genes between cells to the elaborate courtship rituals that developed so sperm could merge with egg In the effort to join sperm and egg species have developed some astounding and unusual sexual adaptations As Maxwell vividly describes the sex lives of various creatures he attests to the resiliency and amazing adaptability of life to its everchanging environment By focusing on the diversity of animal sexual relationships Maxwell enables us to question the very basis of sexuality What is sex Why did it evolve How does sexuality and survival shape the social behavior of animals and humans The sex imperative is indeed the driving force behind Darwin s theory of random variation and natural selection better known as survival of the fittest Maxwell goes so far as to investigate our latest accomplishment in the science of begetting offspring genetic engineering This awe inspiring and

unique work celebrates the power and wonder of life and sexuality of all creatures including humans After reading this engrossing and illuminating work no one will ever think of evolution in the same way Jacket      **The Sharpest Point** Chris Gehman, Steve Reinke, 2005 Editors Chris Gehman and Steve Reinke bring together a collection of critical essays and artists projects that is indispensable to anyone who in this new digital era has begun to question the modern cinematic experience

**Religion and Drama in Early Modern England** Elizabeth Williamson, 2016-04-08 Offering fuller understandings of both dramatic representations and the complexities of religious culture this collection reveals the ways in which religion and performance were inextricably linked in early modern England Its readings extend beyond the interpretation of straightforward religious allusions and suggest new avenues for theorizing the dynamic relationship between religious representations and dramatic ones By addressing the particular ways in which commercial drama adapted the sensory aspects of religious experience to its own symbolic systems the volume enacts a methodological shift towards a more nuanced semiotics of theatrical performance Covering plays by a wide range of dramatists including Shakespeare individual essays explore the material conditions of performance the intricate resonances between dramatic performance and religious ceremonies and the multiple valences of religious references in early modern plays Additionally Religion and Drama in Early Modern England reveals the theater's broad interpretation of post Reformation Christian practice as well as its engagement with the religions of Islam Judaism and paganism      **The Aroma of Righteousness** Deborah A. Green, 2011 Studies aroma in Jewish life and literature in Palestine in the late Roman and early Byzantine periods Uses the history and material culture of perfume and incense as a lens to view daily activities Provided by publisher
