School Boards Changing Local Control Series On Contemporary Educational Issues:

School Boards Patricia F. First, Herbert J. Walberg, 1992 Towards Coherence Between Classroom Assessment and Accountability National Society for the Study of Education, 2004-04-15 In analyses of the role of national educational assessment insufficient attention has been paid to the central place of the classroom Rather than encouraging a two way flow of information today s standards based frameworks tend to direct the flow of accountability from the outside into the classroom The authors of this volume emphasize that assessment as it exists in schools today consists mainly of the measurements that teachers themselves design evaluate and act upon every day Improving the usefulness of assessment in schools primarily requires assisting and harnessing this flood of assessment information both as a means of learning within the classroom and as the source of crucial information flowing out of classrooms This volume aims to encourage debate and reflection among educational researchers professionals and policymakers Five source chapters describe successful classroom assessment models developed in partnership with teachers while additional commentaries give a range of perspectives on the issues of classroom assessment standardized testing and accountability *Restructuring the Schools* John Joseph Lane, Edgar G. Epps, 1992 *The Construction of Children's Character* Alex Molnar, 1997 This volume provides an analysis of approaches to moral education in the 1960s and 1970s and then moves to a description and analysis of more contemporary efforts that characterize the current movement for character education It becomes clear however that the current movement is a misnomer for there are marked differences today among those who are concerned with the moral and character development of children And there are others who are critical of the idea that schools should be involved in character education at all Resources in Education , 2001-04 **The School Superintendent** Theodore J. Kowalski, 2006 The School Superintendent Theory Practice and Cases is both a textbook and reference for practitioners *Research in Education* , 1974 *Encyclopedia of Education Law* Charles J. desegregation and funding facing our schools dissatisfaction with public education has reached a new high Teachers decry inadequate resources while critics claim educators are more concerned with job security than effective teaching Though urban education has reached crisis proportions contending players have difficulty agreeing on a common program of action This book tells why Changing Urban Education confronts the prevailing naivete in school reform by examining the factors that shape reinforce or undermine reform efforts Edited by one of the nation s leading urban scholars it examines forces for change and resistance in urban education and proposes that the barrier to reform can only be overcome by understanding how schools fit into the broader political contexts of their cities Much of the problem with our schools lies with the reluctance of educators to recognize the profoundly political character of public education The contributors show how urban political contexts vary widely with factors like racial composition the role of the teachers union and relations between cities and surrounding metropolitan areas Presenting case studies of original field research in Baltimore Chicago Houston and six other urban areas they consider how resistance to desegregation and the concentration of the poor in central urban areas affect education and they suggest how cities can build support for reform through the involvement of business and other community players By demonstrating the complex interrelationship between urban education and politics this book shows schools to be not just places for educating children but also major employers and large spenders of tax dollars It also introduces the concept of civic capacity the ability of educators and non educators to work together on common goals and suggests that this key issue must be addressed before education can be improved Changing Urban Education makes it clear to educators that the outcome of reform efforts depends heavily on their political context as it reminds political scientists that education is a major part of the urban mix While its prognosis is not entirely optimistic it sets forth important guidelines that cannot be ignored if our schools are to successfully prepare children for the future Education Legislation, 1967, Hearings Before the Subcommittee on Education United States.
