It features CGT research from across the education sector, including studies based in primary schooling, post-primary, second-level schooling, and higher education. Across 5 parts and 20 chapters, the book makes explicit how CGT techniques and processes were implemented in the field, the ways in which challenges were navigated, and how educational researchers aligned their research processes to constructivist principles. It offers exemplars of good practice by educational researchers from Australia, Ireland, Italy, Norway, Sweden, Switzerland, the UK, and the USA. The Handbook synthesises learning from the experiences of CGT researchers in education to establish a framework of guidance for early-career and more experienced researchers. Additionally, it directly interrogates and considers how to address challenges in the implementation of high-quality CGT and looks to the future of the methodology in educational research. This Handbook provides guidance and education-specific examples to doctoral students and researchers who wish to use or are using CGT in educational research. It will also be of significant interest to qualitative researchers in other disciplines like sociology, psychology, and nursing. *IJER Vol 16-N4* International Journal of Educational Reform, 2008-06-04
