*School Choice: Separating Fact from Fiction* Patrick J. Wolf, 2020-05-21 School choice is a hot topic in the United States Private school vouchers public charter schools open enrollment and homeschooling all regularly appear on the policy agenda as ways to improve the educational experience and outcomes for students parents and the broader society Pundits often make claims about the various ways in which parents select schools and thus customize their child s education What claims about school choice are grounded in actual evidence This book presents systematic reviews of the social science research regarding critical aspects of parental school choice How do parents choose schools and what do they seek What effects do their choices have on the racial integration of schools and the performance of the schools that serve non choosing students What features of public charter schools are related to higher student test scores What effects does school choice have on important non cognitive outcomes

including parent satisfaction student character traits and how far students go in school What do we know about homeschooling as a school choice This book originally published as a special issue of the Journal of School Choice provides evidence based answers to those vital questions

**School's Choice** Wagma Mommandi, Kevin Welner, 2021 Access issues are pivotal to almost all charter school tensions and debates How well are these schools performing Are they segregating and stratifying Are they public and democratic Are they fairly funded Can apparent successes be scaled up Answers to all these core questions hinge on how access to charter schools is shaped This book describes the incentives and pressures on charter schools to restrict access and examines how charters navigate those pressures explaining access restricting practices in relation to the ecosystem within which charter schools are created It also explains how charters have sometimes responded by resisting the pressures and sometimes by surrendering to them The text presents analyses of 13 different types of practices around access each of which shapes the school's enrollment The authors conclude by offering recommendations for how states and authorizers can address access related inequities that arise in the charter sector School's Choice provides timely information on critical academic and policy issues that will come into play as charter school policy continues to evolve

**Book Features** Examines how charter schools control who gains and retains access Explores policies and practices that undermine equitable admission and encourage opportunity hoarding Offers a set of policy recommendations at the state and federal level to address access related issues

**The End of Desegregation?** Stephen J. Caldas, Carl Leon Bankston, 2003 After over half a century of court directed efforts to redress the historical educational chasm between blacks and whites in the United States both the past achievements and the future direction of school desegregation are uncertain Too often the early gains made in racially desegregating America's schools seem to have been halted and in many cases reversed Urban school decay is once again on the rise with predictable consequences For the very poorest minority students who have limited educational options apart from dangerous deteriorating neighbourhood schools drop out rates are high standardised test scores are abysmally low and violence is an everyday fact of life The gulf between the unskilled marginalised students being warehoused in these predominantly poor minority schools on the one hand and the increasingly high tech society they cannot compete in on the other is growing This ground breaking book presents the viewpoints and research of some of the most prominent scholars in the field of school desegregation It covers virtually the entire spectrum of thinking and scholarship on school desegregation and its promise success necessity pitfalls and failures

*Excellence Through Equity* Alan M. Blankstein, Pedro Noguera, Lorena Kelly, 2016-02-26 Excellence Through Equity is an inspiring look at how real world educators are creating schools where all students are able to thrive In these schools educators understand that equity is not about treating all children the same They are deeply committed to ensuring that each student receives what he or she individually needs to develop their full potential and succeed To help educators with what can at times be a difficult and challenging journey Blankstein and Noguera frame the book with five guiding principles of Courageous Leadership Getting to your core Making organizational meaning Ensuring constancy and consistency of purpose Facing the facts and your fears Building sustainable relationships They further emphasize that the practices are grounded in three important areas of research that are too often disregarded 1 child development 2 neuroscience and 3 environmental influences on child development and learning You ll hear from Carol Corbett Burris Michael Fullan Marcus J Newsome Paul Reville Susan Szachowicz and other bold practitioners and visionary thinkers who share compelling and actionable ideas strategies and experiences for closing the achievement gap in your classrooms and school Ensuring that all students receive an education that cultivates their talents and potential is in all our common interest As Andy Hargreaves writes in the coda The opportunity for all Americans is to articulate and believe in an inspiring vision of educational change that is about what the next generation of America and Americans should become not about a target or ranking that the nation should attain From the Foreword by Archbishop Desmond Tutu Letting go of a system of winners and losers in favor of what is proposed in this book is a courageous leap forward that we all must take together Let this bold practical book be a guide and may you travel into this new exciting vista in which every child can succeed

**Emerging Evidence on Vouchers and Faith-based Providers in Education** Felipe Barrera Osorio, Harry Anthony Patrinos, Quentin Wodon, 2009-01-01 While public private partnerships in education in the United States have received a lot of attention research on such partnerships elsewhere has been limited even though such partnerships have been steadily gaining prominence particularly in developing countries Aiming to fill this gap this book presents fresh technically sound empirical evidence on the effectiveness and cost of

various public private education partnerships from around the world including voucher programs and faith based schools The evidence on the impact in terms of school performance targeting and cost of public priv Compendium of Studies on Tax Policy and the Economy ,1998 *The New Politics Of Race And Gender* Catherine Marshall,2002-11-01 What can schools do to eliminate sexism and racism By the 1990 s with shifting demographics disillusionment with conventional liberal policies and new political coalitions the politics of race and gender requires new analyses The chapters in this book demonstrate how the politics of race and gender enter into proposals for parental choice business involvement in schools definitions of good leadership special schools for minority children curriculum debates and debates about testing and accountability Catherine Marshall provides the political historical context of race and gender politics in schools and the following eighteen chapters provide a greater in depth analysis The chapters include work of scholars and policy analysts focusing on policy and policy implementation at all levels of school politics in the US Australia and Israel The book ends with critical policy analysis raising deep theoretical questions and pulling out the chronic race and gender issues in education politics Extending Educational Change Andy Hargreaves,2007-12-12 ANDY HARGREAVES Department of Teacher Education Curriculum and Instruction Lynch School of Education Boston College MA U S A ANN LIEBERMAN Carnegie Foundation for the Advancement of Teaching Stanford CA U S A MICHAEL FULLAN Ontario Institute for Studies in Education University of Toronto Canada DAVID HOPKINS Department for Education and Skills London U K This set of four volumes on Educational Change brings together evidence and insights on educational change issues from leading writers and researchers in the field from across the world Many of these writers whose chapters have been specially written for these books have been investigating helping initiate and implementing educational change for most or all of their lengthy careers Others are working on the cutting edge of theory and practice in educational change taking the field in new or even more challenging directions And some are more skeptical about the literature of educational change and the assumptions on which it rests They help us to approach projects of understanding or initiating educational change more deeply reflectively and realistically Educational change and reform have rarely had so much prominence within public policy in so many different places Educational change is ubiquitous It figures large in Presidential and Prime Ministerial speeches It is at or near the top of many National policy agendas Everywhere educational change is not only a policy priority but also major public news Yet action to bring about educational change usually exceeds people s understanding of how to do so effectively A Primer on America's Schools Terry M. Moe,2013-09-01 In this volume the eleven members of the Koret Task Force on K 12 Education provide a broad overview of the American education system pulling together basic facts about its structure and operation identifying key problems that hinder its performance and offering perspectives on the requirements of genuine reform The Fractured Schoolhouse Neal P. McCluskey,2022-09-15 American public schooling was established to unify diverse people and prepare citizens for democracy Intuitively it would teach diverse people the same values preferably in the same buildings with the goal that they

will learn to get along and uphold government by the people But intuition can be wrong significant evidence suggests that public schools have not brought diverse people together whether from legally mandated racial segregation espousing values many people could not accept or human beings simply tending to associate with others like themselves Indeed the basic reality that people have diverse values and desires has rendered public schooling not a unifying force but a battleground That public schooling is necessary for democracy is also not supported both because we do not have a commonly agreed upon definition of democracy and because public schooling violates the bedrock American value liberty that democracy is supposed to protect The Fractured Schoolhouse Reexamining Education for a Free Equal and Harmonious Society proposes that to fulfill the mission of public schooling we need what some might call its opposite school choice Education grounded in liberty would enable diverse people to pursue curricula and policies they think are right without having to impose them on others and by making separated groups equals and easing the creation of new identities it would foster bridge building
