## **School Experience:**

School Experience Peter Woods, Martyn Hammersley, 2017-04-28 First published in 1977 this volume brings together a range of viewpoints informed by reports of empirical research which bear on the experience of school. Each chapter demonstrates the application of the new sociology of education in its various guises to the world of teachers and pupils. In doing so they exemplify the fields of investigation opened up by these theoretical developments and also suggest directions ahead. The tensions in the articles reflect the tensions that existed in the sociology of education. By bringing them together the aim of this volume is to contribute to a more soundly based sociology of education. **Researching School Experience** Martyn Hammersley, 1999-09-09 This book brings together material from a wide range of studies, mainly qualitative in character, concerned with exploring what actually goes on in learning situations and explores the perspectives of teachers and students. **SchoolX: How principals can design a transformative school experience for students, teachers, parents - and themselves** Jethro Jones, 2020-08-07 How can we transform the school experience for all stakeholders? Jethro Jones has the answer: design thinking. SchoolX shows principals how to become designers, not just managers or leaders. It introduces readers to the design thinking process, an iterative and innovative way to approach the challenges the school leader faces. Drawing on the wisdom of the dozens of leaders he has interviewed for his Transformative Principal podcast, Jones shows principals how to put themselves in the shoes of the people in their school communities, using that empathy to drive radical change. But crucially, Jones argues that it is only once leaders improve their own experience that they can transform the experiences of others. **Personalizing the High School Experience for Each Student** Joseph DiMartino, John H. Clarke, 2008 Discusses the six most pervasive problem areas in high school education today and what schools are doing to connect with students, personalize learning, differentiate instruction, and make high school curriculum more relevant. *The Charter School Experience* Michael Bitz, 2016-10-26 *The Charter School Experience: Voices from the Field* is a unique book that presents readers with balanced perspectives from teachers, students, parents, and school leaders at charter schools across the United States. Through first-person narratives, the book highlights the delicate intricacies of what makes a school charter succeed or fail. Unlike a book written by academics far removed from the practice of education, this book gives voice to the people most impacted by charters: the families and educators who have embraced these schools for better or worse and who now have enriching stories to tell. These experiences, embodied in introspective and moving chapters, go well beyond the news headlines and politicized studies that have spotlighted charters in the past. In this book, teachers highlight their successes and failures in charter school classrooms; parents explore decisions to enroll in charter schools; leaders discuss the social missions of charters; and students write about how charter schools have impacted their lives. The result is an engaging collection of ideas for a wide audience, including people researching, attending, and making policy on charter schools in the United States and around the world. *International Handbook of Jewish Education* Helena

Miller, Lisa D. Grant, Alex Pomson, 2011-04-02 The International Handbook of Jewish Education a two volume publication brings together scholars and practitioners engaged in the field of Jewish Education and its cognate fields world wide Their submissions make a significant contribution to our knowledge of the field of Jewish Education as we start the second decade of the 21st century The Handbook is divided broadly into four main sections Vision and Practice focusing on issues of philosophy identity and planning the big issues of Jewish Education Teaching and Learning focusing on areas of curriculum and engagement Applications focusing on the ways that Jewish Education is transmitted in particular contexts both formal and informal for children and adults Geographical focusing on historical demographic social and other issues that are specific to a region or where an issue or range of issues can be compared and contrasted between two or more locations This comprehensive collection of articles providing high quality content constitutes a definitive statement on the state of Jewish Education world wide as well as through a wide variety of lenses and contexts It is written in a style that is accessible to a global community of academics and professionals
