September Moon:

The Full Moon Yearbook Julie Peters, 2023-11-28 When the full moon rises in the night sky it's hard not to be captivated by the light that streams down on earth from our closest celestial neighbour. Even in the modern age, drenched in artificial light, the full moon has a magic that speaks to our most primal selves. This magic was recognised throughout human history and lives on in the names various cultures have given each full moon as it rises above us. The Full Moon Yearbook combines Native American culture, Medieval Celtic Culture, East Asian culture, and Witchcraft to dive into the stories that have led to names like February's Budding Moon or November's Frost Moon. Over thirteen chapters, the names and mythology associated with each full moon are explored, as well as corresponding crystals, rituals, and yoga practices to make engaging with the energy of the full moon natural and fun. That thirteenth chapter is dedicated to the Blue Moon, and in The Full Moon Yearbook, readers will discover the reason why this mysterious moon appears in our night skies along with its even more elusive friend, the Black Moon. Alongside the folk names, The Full Moon Yearbook highlights some of the goddesses that have been dedicated to or personified the moon in ancient religions, bringing their stories to life. With the international perspective, lunar festivals and customs from around the world, and practical makes and recipes to help celebrate the full moon, are included in this illustrated guide showing how important the full moon has been throughout history to humankind. The Full Moon Yearbook is perfect for anyone who has ever felt a pull towards living in harmony with the moon and longs to be living a lunar-inspired life.

Practical Water Brenda Hillman, 2012-01-01 Winner of the Los Angeles Times Book Award for Poetry 2009, Runner up for the Northern California Book Award for Poetry 2009. Practical Water is like Brenda Hillman's previous two books, *Cascadia* and *Pieces of Air in the Epic*, both an elemental meditation and an eco-poetics. This time her subject is water. Taoist water, baptismal water, water from the muses, fountains, the practical waters of hydrology from which we draw our being, and the still water in a glass in a Senate chamber. Not since Allen Ginsberg tried to levitate the Pentagon has American poetry seen the likes of the hallucinatory wit and moral clarity that Hillman brings to Washington in her poems about Congressional Hearings on the Iraq War. Here, also, because it is about many kinds of power, is a sequence of twinned lyrics for the moon, governess of tides, and night vision for visible and invisible faces. Violence and the common world, fact and dream, science and magic, intuition and perception are reconfigured as the poet explores matters of spirit in political life and earthly fate. If it is time to weep by the waters of Babylon, it is also time to touch water's living currents. No one is reimagining the possibilities of lyric poetry with more inventiveness; this is masterful work by one of our finest poets.

trace an actual connectedness between the disposition of the heavenly bodies at the moment of a birth and the known life and character of the individual then born and an exact correspondence between the course of events in that life with the changes occurring in the heavens subsequent to the moment of birth we shall do well to accept the fact for what it is worth and arrange our philosophic notions accordingly As far back as the year B C 2154 we find mention of the great importance attaching to the celestial phenomena in the minds of Chinese rulers It is recorded in the Historical Classic of China that at that time the astrologers Hi and Ho neglected their duties so that when on the 10th of October there was a great eclipse of the Sun at Peking between seven and nine o'clock in the morning the people were wholly unprepared for it and ran about here and there in the utmost consternation For this offence Hi and Ho were deprived of their offices their estates were confiscated and they were driven from the kingdom Among the Hindus we have the classical writers Garga Parashara and Mihira together with their legions of commentators The Assyrian records are full of astrological allusions regarding the influence of planetary conjunctions and stellar positions The Greek mythology is nothing but a vast system of cosmographical astrology and there is no other history in it than what you may read in the constellations of the heavens and the corresponding evolution of the human race Aristotle made it a part of his philosophy Hipparchus Hippocrates Thales Galenius and others subscribed an intelligent belief in its principles To Claudius Ptolemy however we are indebted for the first concise and scientific statement of its principles and practice so far as Europe is concerned He wrote the Tetrabiblos or Four Books and laid the foundations of a true astrological science Julius Firmicus confirmed Ptolemy and enlarged upon his observations The subsequent discovery of the planets Uranus and Neptune by Herschel and Adams widened the field of research and gave to later astrologers the clue to much that hitherto had been imperfectly understood Not that these discoveries overturned the whole system of astrology as some have imagined and foolishly stated or that they negated the conclusions drawn from the observed effects of the seven anciently known bodies of the solar system but it became possible after a lapse of time to fill in the blank spaces and to account for certain events which had not been traced to the action of any of the already known planets
