Excess Baggage Ellen Rosskam, Ray Elling, 2018-10-26 Based on groundbreaking research on the working conditions of airport check in workers in two countries a previously unstudied category of predominantly women workers Ellen Rosskam describes a form of work characterized as modern day Taylorism An occupation greatly affected by new forms of work organization and management practices caught in the throes of rapid change due to international competition alliances mergers and the application of cost efficiency strategies check in work has been undermined in recent years by the adverse effects of liberalization and technological change By peeling away the veneer of glamour associated with airport

check in work Roskam reveals how changes in work organization in this sector have de skilled disempowered and ultimately demoralized workers In Excess Baggage weaving through the psychological distress physical pain from musculoskeletal disorders strain and violence that check in workers experience and describe in their own words a picture emerges of a job perceived to be safe clean glamour girl work but which is comparable to industrial workplaces that require heavy manual lifting obligingly performed in skirts dresses and pretty little shoes

Gender and the Poetics of Excess Karen Jackson Ford,2011-02-25 The argument posed in this analysis is that the poetic excesses of several major female poets excesses that have been typically regarded as flaws in their work are strategies for escaping the inhibiting and sometimes inimical conventions too often imposed on women writers The forms of excess vary with each poet but by conceiving of poetic excess in relation to literary decorum this study establishes a shared motivation for such a strategy Literary decorum is one instrument a culture employs to constrain its writers Perhaps it is the most effective because it is the least definable The excesses discussed here like the criteria of decorum against which they are perceived cannot be itemized as an immutable set of traits Though decorum and excess shift over time and in different cultures their relationship to one another remains strikingly stable Thus nineteenth century standards for women s writing and late twentieth century standards bear almost no relation Emily Dickinson s do not anticipate Gertrude Stein s or Sylvia Plath s or Ntozake Shange s Yet the charges of indecorousness leveled at these women poets repeat a fixed set of abstract grievances Dickinson Stein Plath Jayne Cortez and Shange all engage in a poetics of excess as a means of rejecting the limitations and conventions of female writing that the larger culture imposes on them In resisting conventions for feminine writing these poets developed radical new poetics yet their work was typically criticized or dismissed as excessive Thus Dickinson s form is classified as hysterical and her figures tortured Stein s works are called repetitive and nonsensical Plath s tone is accused of being at once virulent and confessional Cortez s poems violent and vulgar Shange s work vengeful and self righteous The publishing history of these poets demonstrates both the opposition to such an aesthetic and the necessity for it

Gender Policy and HIV in China Joseph Tucker,Dudley L. Poston, Jr.,Qiang Ren,Baochang Gu,Xiaoying Zheng,Stephanie Wang,Chris Russell,2009-05-08 China s concentrated HIV epidemic is on the brink of becoming a generalized one and syphilis infection has become a major public health threat Social factors relating to gender and gender

inequality exacerbate the spread of HIV and sexually transmitted infections STI in China A better understanding of the proximate social determinants of HIV related to gender will be crucial to effectively curbing HIV and other STIs in China Aspects of China's governance including administrative procedures the developing legal system social institutions and the public health infrastructure are instrumental in shaping strategies and responses to HIV International studies suggest that women who are more economically and socially vulnerable may also have a greater risk of HIV infection yet few initiatives have focused on discrete areas where achievable and sustainable gender policy measures could be linked to the public health response This study presents perspectives ranging from criminology to social psychology to better understand how gender perspectives can inform HIV policy in the context of China *World Development Report 2012* World Bank,2011-09-01 This year's World Development Report looks at facts and trends regarding the various dimensions of gender equality in the context of the development process *World Development Report 2012* The International Bank for Reconstruction and Development / The World BankThe International Bank for Reconstruction and Development / The World Bank,2011-09-28 The lives of women around the world have improved dramatically at a pace and scope difficult to imagine even 25 years ago Women have made unprecedented gains in rights education health and access to jobs and livelihoods More countries than ever guarantee equal rights in property marriage and other domains Gender gaps in primary schooling have closed in many countries while in a third of all countries girls now outnumber boys in secondary school And more young women than men attend universities in 60 countries Women are using their education to participate more in the labor force they now make up for 40 percent of the global labor force and 43 percent of its farmers Moreover women now live longer than men in every region of the world Despite the progress gaps remain in many areas Women are more likely to die relative to males in many low and middle income countries than their counterparts in rich countries especially in childhood and during their reproductive years Primary and secondary school enrollments for girls remain much lower than for boys in many Sub Saharan African countries and some parts of South Asia as well as among disadvantaged populations Women are more likely than men to work as unpaid family laborers or in the informal sector to farm smaller plots and grow less profitable crops operate in smaller firms and less profitable sectors and generally earn less Women especially poor women have less say over decisions and less control over household resources And in most countries fewer women participate in formal politics than men and are underrepresented in the upper echelons The World Development Report 2012 Gender Equality and Development argues that closing these persistent gender gaps matters It matters because gender equality is a core development objective in its own right But it is also smart economics Greater gender equality can enhance productivity improve development outcomes for the next generation and make institutions more representative Building on a growing body of knowledge on the economics of gender equality and development the Report identifies the areas where gender gaps are most significant both intrinsically and in terms of their potential development payoff and where growth alone cannot

solve the issues It then sets forth four priorities for public action Reducing excess female mortality and closing education gaps where they remain Improving access to economic opportunities for women Increasing women s voice and agency in the household and in society Limiting the reproduction of gender inequality across generations **Sweet Excess** Ishita
