thinking that are developed in detail over time As Bollas revisits the received truths and dogmas of his profession including his own prejudices he demonstrates the value of open intelligent uncertainty Interspersed with clinical preoccupations which highlight the richness as well as the bewildering complexity of psychoanalysis we find other ideas that reflect his early life as political activist literature professor and cultural critic Throughout the notebooks are enriched by references to the work of numerous writers in many fields who have influenced his thinking This work is essential reading for all with an interest in psychoanalysis which will enrich both academic study and clinical practice

Sexual Desire Roger Scruton, 2015-06-15 A dazzling treatise as erudite and eloquent as Simone de Beauvoir's *The Second Sex* and considerably more sound in its conclusion TLS When John desires Mary or Mary desires John what does either of them want What is meant by innocence passion love and arousal desire perversion and shame These are just a few of the questions Roger Scruton addresses in this thought provoking intellectual adventure Beginning from purely philosophical premises and ranging over human life art and institutions he surveys the entire field of sexuality equally dissatisfied with puritanism and permissiveness he argues for a radical break with recent theories Upholding traditional morality though in terms that may shock many of its practitioners his argument gravitates to that which is candid serene and consoling in the experience of sexual love

The Mind-Brain Continuum Susan Gordon, 2023-01-01 This insightful book proposes a holistic theory of the development of self drawing on interdisciplinary literature in existential phenomenology neurophenomenology intracrinology endocrinology and naturopathic medicine The psychoneurointracrine hypothesis bridges

the gap between the mind and brain providing a framework to explain the complex system that facilitates development of one's sense of self and well being. The book challenges assumptions in present day neuroscience and psychiatry placing the mind and brain on a continuum of health and growth rather than reducing the study of human consciousness to neurobiological terms and pathological classifications. In this landmark book Susan Gordon presents a bold hypothesis one that underscores the importance of psychoneuroendocrine activity and links it to female neurology and the development of one's sense of self. She brilliantly places this activity which serves as a mind body bridge within the frameworks of neurophenomenology and non linear dynamics. Her psychoneuroendocrine hypothesis is a tour de force one that is holistic integrating endocrinology with psychology and neurology. This hypothesis undercuts the current assumption that the mind is an epiphenomenon of the brain creating a paradigm that impacts science's understanding of behavior, experience, consciousness and human agency.

Stanley Krippner PhD, Affiliated Distinguished Faculty, California Institute of Integral Studies, San Francisco, CA. In her fascinating book Susan Gordon develops a novel theory about the biological connection between mind, brain and organism. Drawing on empirical research on the role of the female hormonal system in basal states of self and mood, she shows that the biochemistry of the endocrine system must be viewed as an indispensable foundation for the emergence of embodied self awareness. The homeostasis and hormonal balance of the organism is integral to the sense of well being and the development of meaning, but it is also continually modulated and influenced by the subject's experience of his or her world. In this way she makes a decisive contribution to a theory of embodiment that goes far beyond a computational theory of the brain to focus on the biochemical organismic processes at the root of the mind.

Implied Consent and Sexual Assault Michael Plaxton, 2015-11-01. In *R v Ewanchuk* the Supreme Court of Canada held that sexual touching must be accompanied by express contemporaneous consent. In doing so, the Court rejected the idea that sexual consent could be implied. *Ewanchuk* was a landmark ruling reflecting a powerful commitment to women's equality and sexual autonomy. In articulating limits on the circumstances under which women can be said to consent to sexual touching, however, the decision also restricts their autonomy specifically by denying them a voice in determining the norms that should govern their intimate relationships and sexual lives. In *Implied Consent and Sexual Assault* Michael Plaxton argues that women should have the autonomy to decide whether and under what circumstances sexual touching can be appropriate in the absence of express consent. Though caution should be exercised before resurrecting a limited doctrine of implied consent, there are reasons to think that sexual assault law could accommodate a doctrine without undermining the sexual autonomy or equality rights of women. In reaching this conclusion, Plaxton challenges widespread beliefs about autonomy, consent and the objectives

underpinning the offence of sexual assault in Canada Drawing upon a range of contemporary criminal law theorists and feminist scholars Implied Consent and Sexual Assault reconsiders the nature of mutuality in a world dominated by gender norms the proper scope of criminal law and the true meaning of sexual autonomy

The Living Mind Richard Dien Winfield, 2011-07-07 As enthusiasm for computational models of the mind has waned and the revolution in neuroscience has progressed attention in philosophy and cognitive science has shifted toward more biological approaches The Living Mind establishes that mind cannot be immaterial or reduced to mechanistic or cybernetic processes but must instead possess a subjectivity embodied in an animal organism On this basis the work proceeds to show why mind involves a pre-conscious psyche a non-discursive consciousness and self-consciousness and an intelligence overcoming the opposition of consciousness In so doing The Living Mind provides a detailed account of the psyche and consciousness paving the way for conceiving the psychological enabling conditions of rational theory and practice
