This book contains 13 chapters that are grouped under three sections. Under the section Public Policies and Economic Issues of Singapore, Singapore's public policies in the areas of healthcare, Central Provident Fund and monetary policy are explored as well as issues concerning Singapore's economic development such as economic transformation, innovation and capital accumulation are discussed. The second section, Singapore and the Region in a Globalized World, looks at the challenges and opportunities presented to Singapore and the region in an increasingly globalized world. Current issues on the sub-prime crisis and Asian monetary integration are also discussed. The last section, Other Economic Issues, consists of papers in specific areas such as economics of medical decisions, economics of love and the role of exchange rates in foreign direct investment.

*Intellectual Property, Competition Law and Economics in Asia* R. Ian McEwin, 2011-10-07 This book results from a conference held in Singapore in September 2009 that brought together distinguished lawyers and economists to examine the differences and similarities in the intersection between intellectual property and competition laws in Asia. The prime focus was how best to balance these laws to improve economic welfare. Countries in Asia have different levels of development and experience with intellectual property and competition laws. Japan has the longest experience and now vigorously enforces both competition and intellectual property laws. Most other countries in Asia have only recently introduced intellectual property laws due to the Trade-Related Aspects of Intellectual Property Rights (TRIPS) Agreement and competition laws, sometimes due to the World Bank, International Monetary Fund or free trade agreements. It would be naïve to think that laws even if similar on the surface have the same goals or can be enforced similarly. Countries have differing degrees of acceptance of these laws, different economic circumstances and differing legal and political institutions. To set the scene, Judge Doug Ginsburg, Greg Sidak, David Teece and Bill Kovacic look at the intersection of intellectual property and competition laws in the United States. Next are country chapters on Asia, each jointly authored by a lawyer and an economist. The country chapters outline the institutional background to the intersection in each country, discuss the policy underpinnings theoretically as well as describing actual policy initiatives, analyse the case law in the area and make policy prescriptions.
