Operations Management Michael Lewis, Nigel Slack, 2003      *Living in Smart Cities* Thomas Menkhoff, Siew Ning Kan, Hans-Dieter Evers, Yue Wah Chay, 2017-12-28 Cities around the world are becoming increasingly popular as economic powerhouses and magnets for migrants from rural and suburban areas. All big cities in First and Third World countries as well as emerging markets such as New York, London, Tokyo, Paris, Shanghai, Hong Kong, Singapore, New Delhi, Jakarta etc. have to cope with high population density and serious challenges such as air pollution or traffic congestion. How do we pack more people into big cities and yet continue to realise a high quality of life? How do we plan, create and manage good cities which are safe, spacious, green, connected, fair and resilient? How can cities create economic wealth while still fulfilling the vision of sustaining our Green Planet? What are best practice designs and innovative technical smart city solutions which could be leveraged to tackle these challenges and how can they be successfully commercialised? These are some of the questions the reader addresses from a multi-disciplinary perspective with special reference to Singapore whose development from regional entrepôt to First World Metropolis continues to impress business and societal leaders around the world. The book's contents are broadly structured according to the following aspects: i) definition and taxonomy of innovative ii) governance planning and selected design principles of innovative and iii) in-depth study of selected smart city dimensions such as governance, clustering, connectivity, mobility, ageing, water, sports and safety.      **Singapore** International Monetary Fund, Monetary and Capital Markets Department, 2019-07-15 This Detailed Assessment of Observance on the Committee on Payment and Settlement Systems International Organization of Securities Commissions Principles for Financial Market Infrastructures on Singapore discusses that the Monetary Authority of Singapore MAS has taken important steps to address the recommendations made for capital market financial market infrastructures (FMIs). MAS has led efforts to develop international guidance on the cyber resilience for FMIs and moved swiftly to strengthen Singapore's governance and resiliency of the payment system. The assessment of New MAS Electronic Payment and Book Entry System (MEPS) finds that most of the principles are observed; however, it also identifies opportunities for further improvement relative to international best practices. One of the several observations is that the legal basis is sound with further enhancements made for insolvency protection, designation criteria and administrative powers for MAS. Also, governance arrangements are clear and transparent and should continue to ensure the independence of the oversight and supervisory functions for MEPS.      **Anaerobic Digestion** Sevcin Aydin, 2024-02-07 This book provides comprehensive insights into the biotechnological process of converting organic matter into biogas, which is an essential renewable energy resource for addressing challenges related to fossil fuel depletion and environmental pollution.
