Shadow Warrior The Autobiography Of Greenpeace International Founder David McTaggart:

Shadow Warrior David Fraser McTaggart, Helen Slinger, 2002 He's cold He's calculating He's Machiavellian He's unremorseful He's unremitting I mean he will just do it whatever he's got to do and then he'll invite you out for a beer Peter Wilkinson one of McTaggart's most trusted colleagues David McTaggart captured public attention in 1972 and 1973 when he sailed his small boat into a French nuclear testing site at Mururoa atoll In 1973 McTaggart successfully delayed the test and led the French to send seven commandos to ram his ketch Vega and attack the crew McTaggart almost lost his right eye in the scuffle Fortunately for McTaggart the whole incident was captured on still camera and caused an international uproar and to the founding of Greenpeace International For more than three decades this restless and driven man took on the world's rich and powerful In the process he not only created a long list of friends but an equally impressive list of enemies He retired to Italy in 1991 and died in a car crash in March 2001 aged 68 The bulk of his autobiography was written before his death and completed from notes *Make It a Green Peace!* Frank Zelko, 2013-04-03 Make it a Green Peace explores the complex intellectual and cultural roots of Greenpeace tracing the development of the organization from its emergence amidst the various protest movements of the 1950s and 1960s to the end of its volatile dramatic and at times quirky first decade in 1980

Environmentalism David Peterson Del Mar, 2014-05-22 Environmental movements have produced some impressive results including cleaner air and the preservation of selected species and places But movements that challenged western prosperity and comfort seldom made much progress and many radical environmentalists have been unabashed utopianists In this short guide Peterson del Mar untangles this paradox by showing how prosperity is essential to environmentalism Industrialisation made conservation sensible but also drove people to look for meaning in nature even as they consumed its products more relentlessly Hence Englandled the way in both manufacturing and preserving its countryside and the United States created a matchless set of national parks as it became the world's pre eminent economic and military power Environmentalism considers both the conservation and preservation movements and less organized forms of nature loving from seaside vacations to ecotourism to argue that these activities have commonly distracted us from the hard work of creating a sustainable and sensible relationship with the environment *Planet Savers* Kevin

Desmond, 2017-09-08 Protecting the planet is everyone's work But we all have our own heroes in whatever area we are working Planet Savers brings together the varied stories of the hundreds of movers and shakers that have spoken up throughout history and taken action to defend the world from pollution deforestation species loss and climate change From Theodore Roosevelt to Al Gore from Francis of Assisi to David Attenborough and from hundreds more men and women that you will know little if anything about Scientists artists business people priests lawyers poets politicians activists and more from every continent of the world Their work has enthused us about the natural world and warned us that we must do much more to preserve it The Indian woman who became the world's first environmental martyr the Baptist Reverend who asked

What Would Jesus Drive the Quaker big game hunter who set up the first conservation organisation the Shakespearian actor who revolutionised organic gardening and the housewife whose campaign against toxic waste forced a President to act The book is a cornucopia of people who from time immemorial have put their careers reputations and lives on the line to protect our planet from its governing inhabitants the human race Today as thousands of species of animals and plants are faced with extinction thousands of years of indigenous knowledge is lost in the face of technological advance and we become more and more aware of the potential doomsday scenario of a warming world we need Planet Savers more than ever Our inspiration can be the 301 environmental lives portrayed in this book These people cared enough to do something about it Planet Savers is both a tribute and a catalyst a tribute to the people that loved the planet enough to want to act to save it and a catalyst for the people who will be inspired to act after reading it New Planet Savers are at work right now in rainforests and megacities in community centres and boardrooms at road protests and in courtrooms all over the world If this book has one great aim it is to inspire you the reader to join them It is a book that every home should own **Handbook of Inclusive Innovation**
