Shadow Sisters Stephen Marley, 1999-12-31 **Brothers and Sisters** Henry Abramovitch, 2014-10-07 Growing up we typically spend more time with our brothers and sisters than we do with our parents In an age of divorce mobility and alienation the sibling bond is often the only one that really lasts Given that brothers and sisters are such a fundamental aspect of human existence it is remarkable that they have received so little in depth attention in the field of psychology Henry Abramovitch's *Brothers and Sisters* explores the tension between the myth and reality of brothers and sisters in a variety of cultures and through the poignant brother sister stories in the Bible Abramovitch looks at the developmental sequence in the sibling relationship as brothers or sisters struggle to find their place with each other concluding with a very personal account of his own relationship with his brother and sister

The past 20 years have witnessed a turn towards the sensuous particularly the aural as a viable space for critical exploration in History and other Humanities disciplines This has been informed by a heightened awareness of the role that the senses play in shaping modern identity and understanding of place and increasingly how the senses are central to the memory of past experiences and their representation The result has been a broadening of our historical imagination which has previously taken the visual for granted and ignored the other senses Considering how crucial the auditory aspect of life has been a shift from seeing to hearing past societies offers a further perspective for examining the complexity of historical events and experiences Historians in many fields have begun to listen to the past developing new arguments about the history and the memory of sensory experience This volume builds on scholarship produced over the last twenty years and explores these dimensions by coupling the history of sound and the senses in distinctive ways through a study of the sound of violence the sound of voice mediated by technologies and the expression of memory through the senses Though sound is the most developed field in the study of the sensorium many argue that each of the senses should not be studied in isolation from each other and for this reason the final section incorporates material which emphasizes the sense as relational **Sister**
