Forum, 1982 The theory and practice of examples in bilingual dictionaries Alfonso Rascón Caballero, 2024-07-22 The dictionary example is the culminating component of the information presented in articles of dictionaries intended for language learning This study analyses the example comprehensively its provenance its theoretical status its distinction from multiword lexical units to be presented as infralemmas types and specific functions The example not only illustrates the data provided by the definition the equivalent the grammatical collocational and pragmatic items but also provides valuable complementary

information on the use of each lexical unit described. Examples are models with which users can form other sentences but are also instantiations of the language that escape systematicity and reflect unpredictable but real uses.
