Rem Koolhaas/OMA Roberto Gargiani, 2008-01-01 Projekter og bygninger af den hollandske arkitekt Rem Koolhaas og de vrigte medlemmer af OMA gennemgås i kronologisk orden *Building Institution* Kim Förster, 2024-02-21 Building Institution chronicles the expansion of architecture as a profession and discipline in the postmodern era Kim Förster traces the compelling history of the Institute for Architecture and Urban Studies which was active in New York from 1967 to 1985 Drawing on extensive archival research and oral histories he constructs a collective biography that details the Institute's diverse roles and the dynamic interplay between research and design education culture and publishing By exploring the transformation of cultural production into a practice as well as the culturalization and global postmodernization of architecture the volume contributes significantly to the institutional history of architecture *Forming National Identity in Iran* Ali Mozaffari, 2014-06-20 Modern Iran is a country with two significant but competing discourses of national identity one stemming from ancient pre-Islamic customs and mythology the other from Islamic Shi'i practices and beliefs At one time co-existing and often mutually reinforcing in more modern times they have been appropriated by intellectuals and the state who have drawn upon their narratives and traditions to support and authenticate their ideologies The result has been an often confused notion of identity in Iran In this essential work Ali Mozaffari explores the complex processes involved in the formation of Iranian national identity He lays particular stress upon the importance of place for it is through the concept of place that collective national identity and ideas of homeland are expressed and disseminated The author reveals the ways in which homeland is conceived both through designated permanent sites and ritual performance illustrating his arguments through an analysis of the ancient Achaemenid capital of Persepolis and the Shi'i rituals of Moharram In a final part of the book he extends his analysis to the Ancient Iran Museum and the Islamic Period Museum housed in the National Museum of Iran showing how the major transformations of twentieth century Iran which have so far been perceived in terms of political discourses and historical events are in fact concerned with conceiving place *Forming National Identity in Iran* offers powerful insights into the forces shaping national identity in Iran which makes it a valuable contribution to the cultural and political importance of place *Modern Architecture, Empire, and Race in Fascist Italy* Brian L. McLaren, 2021-02-22 In *Modern Architecture Empire and Race in Fascist Italy* Brian L. McLaren examines the architecture of the late Fascist era in relation to the various racial constructs that emerged following the occupation of Ethiopia in 1936 and intensified during the wartime This study is conducted through a wide ranging investigation of two highly significant state sponsored exhibitions the 1942 Esposizione Universale di Roma and 1940 Mostra Triennale delle Terre Italiane d'Oltremare These exhibitions and other related imperial displays are examined over an extended span of time to better understand how architecture art and urban space the politics and culture that encompassed them the processes that formed them and the society that experienced them were racialized in varying and complex ways **Automatic Architecture** Sean Keller, 2018-02-12 In the 1960s and 70s

architects influenced by recent developments in computing and the rise of structuralist and poststructuralist thinking began to radically rethink how architecture could be created. Though various new approaches gained favor, they had one thing in common: they advocated moving away from the traditional reliance on an individual architect's knowledge and instincts and toward the use of external tools and processes that were considered objective, logical, or natural. Automatic architecture was born. The quixotic attempts to formulate such design processes extended modernist principles and tried to draw architecture closer to mathematics and the sciences. By focusing on design methods and by examining evidence at a range of scales from institutions to individual buildings, Automatic Architecture offers an alternative to narratives of this period that have presented postmodernism as a question of style. As the methods and techniques traced here have been more deeply consequential than the many stylistic shifts of the past half century, Sean Keller closes the book with an analysis of the contemporary condition suggesting future paths for architectural practice that work through but also beyond the merely automatic.
