Love Canal Science Politics And People:

Love Canal Adeline Levine,1982 **Love Canal** Richard S. Newman,2016-04-12 A history of the Love Canal region from the nation's founding and the utopian city planned for the Niagara area to the building of the region's chemistry industry to the environmental disaster at Love Canal and its aftermath The Social and Cultural Construction of Risk B.B. Johnson,V.T. Covello,2012-12-06 The Social and Cultural Construction of Risk Issues Methods and Case Studies Vincent T Covello and Branden B Johnson Risks to health safety and the environment abound in the world and people cope as best they can But before action can be taken to control reduce or eliminate these risks decisions must be made about which risks are important and which risks can safely be ignored The challenge for decision makers is that consensus on these matters is often lacking Risks believed by some individuals and groups to be tolerable or acceptable such as the risks of nuclear power or industrial pollutants are intolerable and unacceptable to others This book addresses this issue by exploring how particular technological risks come to be selected for societal attention and action Each section of the volume examines from a different perspective how individuals groups communities and societies decide what is risky how risky it is and what should be done The writing of this book was inspired by another book Risk and Culture An Essay on the Selection of Technological and Environmental Dangers Published in 1982 and written by two distinguished scholars Mary Douglas a British social anthropologist and Aaron Wildavsky an American political scientist the book received wide critical attention and offered several provocative ideas on the nature of risk selection perception and acceptance **Reversibility of Chronic Disease and Hypersensitivity, Volume 4** William J. Rea,Kalpana D. Patel,2017-11-22 Reversibility of Chronic Disease and Hypersensitivity Volume 4 The Environmental Aspects of Chemical Sensitivity is the fourth of an encyclopedic five volume set describing the basic physiology chemical sensitivity diagnosis and treatment of chronic degenerative disease studied in a 5x less polluted controlled environment This text focuses on treatment techniques strategies protocols prescriptions and technologies Distinguishing itself from previous works on chemical sensitivity it explains newly understood mechanisms of chronic disease and hypersensitivity involving core molecular function The authors discuss new information on ground regulation system genetics the autonomic nervous system and immune and non immune functions The book also includes the latest technology and cutting edge techniques numerous figures and supporting research **Love Canal Revisited : Race, Class, and Gender in Environmental Activism** Elizabeth D. Blum,2008 Historical snapshots of the Love Canal area Gender at Love Canal Race at Love Canal Class at Love Canal Historical implications of gender race and class at Love Canal Citizen Democracy Stephen E. Frantzich,2008-08-15 Through a series of carefully chosen vignettes Stephen E Frantzich portrays citizens from every walk of life rich and poor old and young black and white male and female left and right famous and obscure engaged in extraordinary civic activity Their causes run the gamut from civil rights to flag burning from the Internet to the environment but their common cause is the fact that they creatively entered the arena of national public

policy making and made a difference Environmental Health Perspectives ,2003-07 **Toxic burn [electronic resource]** Thomas C. Shevory,2007 *Crazy for Democracy* Temma Kaplan,2016-01-08 Crazy for Democracy vividly shows through the lives of six women in the United States and South Africa just what can be and is being accomplished to change our lives At a time when we re depressed about democracy pessimistic about race relations and anxious about feminism Crazy for Democracy vividly shows through the lives of six women in the United States and South Africa just what can be and is being accomplished to change our lives In building real social movements to achieve a safe environment win human rights and safeguard their homes these grassroots feminist leaders have been creating democratic institutions to achieve social justice for us all Conservation and Environmentalism Robert C. Paehlke,2013-04-03 Focusing on both problems and solutions this authoritative reference work maintains a healthy balance between science and the social sciences in its coverage of all aspects of the environment The book is arranged alphabetically and is divided into three major sections Ecology Pollution and Sustainability The list of 240 contributors reads like a who s who of the world s leading conservation and environmental professionals Best Reference Source Outstanding Reference Source *Volatile Places* Valerie Gunter,Steve Kroll-Smith,2006-11-22 Volatile Places A Sociology of Communities and Environmental Controversies is a thoughtful guide to the spirited public controversies that inevitably occur when environments and human communities collide The movie An Inconvenient Truth based on the environmental activism of Al Gore and the devastation of Hurricane Katrina are specifically highlighted Authors Valerie Gunter and Steve Kroll Smith begin with a simple observation and offer a provocative case study approach to the investigation of community and environmental controversies Key Features Compels students with personal narrative Co author Valerie Gunter who was teaching at the University of New Orleans when Hurricane Katrina struck gives her personal standpoint of this tragedy Creates a dramatic story around the controversy Each case study illustrates a local environmental conflict and is written to capture students attention Provides a unique way to view environmental conflicts The book illustrates the importance of each perspective and local knowledge when making decisions about the environment Makes connections with previous chapters The chapters are integrated to create a strong sense for the multifaceted approach to the study of community and environmental controversies Includes portfolios in each chapter as well as concept and theory boxes Students are inspired to engage in spirited thinking original research and action Intended Audience This text is designed for advanced undergraduate and graduate courses in Environmental Sociology It is also an ideal text for Social Problems courses focusing on environmental issues *Uncertain Hazards* Sylvia Noble Tesh,2018-05-31 Ordinary citizens frequently organize around environmental issues on which little scientific evidence exists to back activists claims Should we then dismiss such claims as spurious Or should we side with citizens against the polluters Uncertain Hazards takes neither path In exploring the all too common problem of scientific uncertainty about links between pollution and public health Sylvia Noble Tesh shows that much of the problem can be traced to the newness of the

environmental movement The inability of scientists to find data corroborating citizens claims stems partly from the pre environmentalist assumptions still influencing the environmental health sciences Tesh says On the other hand the conviction of activists that industrial pollutants threaten their health results from the environmental movement s success in promoting new ideas about nature Tesh points to ways that environmentalist ideas have begun to affect science thus making more likely the discovery of links between exposure to industrial pollutants and a community s health problems Those ways include the expansion of diseases construed as environmental in cause the study of society s most vulnerable citizens in determining safe levels of pollution and a new focus on the effects of exposure to chemical mixtures Using community activists own words and experiences Tesh argues against the familiar charge that activists are naive about science It is inaccurate she says to characterize debates over the hazardous nature of pollution as debates between laypeople and experts Instead they are debates between two groups of experts It is also inaccurate however to see the conflict over environmental pollution only in scientific terms The conflict has culturally important moral dimensions and community activists draw heavily although often unconsciously on the lessons taught by environmentalism

Acceptable Risk? Lee Clarke,1989 Organizations and modern technology give us much of what we value but they have also given us Chernobyl Three Mile Island and Bhopal The question at the heart of this paradox is What is acceptable risk Based on his examination of the 1981 contamination of an office building in Binghamton New York Lee Clarke s compelling study argues that organizational processes are the key to understanding how some risks rather than others are defined as acceptable He finds a pattern of decision making based on relationships among organizations rather than the authority of individuals or single agencies **The Science of Public Policy** Tadao Miyakawa,1999 *The Environment Since 1945* Marcos Luna,2012 Examines numerous controversies in environmental politics and policy since 1945 including the Donora smog event of 1948 building dams in national parks the passage of the National Environmental Protection Act the banning of DDT the Love Canal crisis the Exxon Valdez oil spill the Makah whale hunt and environmental racism
