Probabilistic Indexing for Information Search and Retrieval in Large Collections of Handwritten Text Images Alejandro Héctor Toselli,Joan Puigcerver,Enrique Vidal,2024-04-10 This book provides a comprehensive presentation of a recently introduced framework named probabilistic indexing PrIx for searching text in large collections of document images and other related applications It fosters the development of new search engines for effective information retrieval from manuscripts which however lack the electronic text transcripts that would typically be required for such search and retrieval tasks The book is structured into 11 chapters and three appendices The first two chapters briefly outline the necessary fundamentals and state of the art in pattern recognition statistical decision theory and handwritten text recognition Chapter 3 presents approaches for indexing as opposed to spotting each region of a handwritten text image which is likely to contain a word Next Chapter 4 describes models adopted for handwritten text in images namely hidden Markov models convolutional and recurrent neural networks and language models and provides full details of weighted finite state transducer WFST concepts and methods needed in further chapters of the book Chapter 5 explains the set of techniques and algorithms developed to generate image probabilistic indexes which allow for fast search and retrieval of textual information in the indexed images Chapter 6 then presents experimental evaluations of the proposed framework and algorithms on different traditional benchmark datasets and compares them with other approaches while Chapter 7 reviews the most popular keyword spotting approaches Chapter 8 explains how PrIx can support classical free text search tools while Chapter 9 presents new methods that use PrIx not only for searching but also to deal with text analytics and other related natural language processing and information extraction tasks Chapter 10 shows how the proposed solutions can be used to effectively index very large collections of handwritten document images before Chapter 11 eventually summarizes the book and suggests promising lines of future research The appendices detail the necessary mathematical foundations for the work and presents details of the text image collections and datasets used in the experiments throughout the book This book is written for researchers and post graduate students in pattern recognition and information retrieval It will also be of interest to people in areas like history criminology or psychology who need technical support to evaluate understand or decode historical or contemporary handwritten text *Consciousness* Quentin Smith,Aleksandar Jokic,2003-01-23

Consciousness is perhaps the most puzzling problem we humans face in trying to understand ourselves. It has been the subject of intense study for several decades but despite substantial progress the most difficult problems have still not reached any generally agreed solution. Future research can start with this book. Eighteen original specially written essays offer new angles on the subject. The contributors who include many of the leading figures in philosophy of mind discuss such central topics as intentionality, phenomenal content, knowledge of mental states, consciousness and the brain, and the relevance of quantum mechanics to the study of consciousness.

Goal-oriented Business Process Modeling Ilia Bider, Paul Johannesson, 2005. The objective of this e book is to try to clarify the connection between the notions of goal and business process. The issue is a follow up to the discussions at the Workshop on Goal Oriented Business Process Modelling held in London on 2 September 2002. The papers cover a wide spectrum of topics related to the notions of goals in the business process domain.
