corporate training program the training can be delivered to each learner's desktop over the Web. But because e Learning is still in the revolution stage there are no clear standards and models for how to create and deliver e Learning successfully. Everyone is asking the same questions: how does web based training fit in with traditional classroom based training? What are the standards for designing high quality e Learning? How much interaction with an instructor do e Learning participants need? What is the role of the instructional designer in online learning? The ASTD e Learning Yearbook will be the first annual reference.

Labour Sector Reforms in India Sanjay Tiwari, 2007 *Managing Workforce Development in the 21st Century: Global Reflections and Forward Thinking in the New Millennium* Henry O'Lawrence, 2016. The book begins with the premise that workforce education is a global issue and is becoming increasingly competitive. It is important for the reader to understand the concept of work historically as well as its meaning and implications to individuals. Understanding this history leads to better instruction, education and training which can solve many human performance problems in the workplace. Workforce Education, Occupational Training, Instruction or Career Education, Vocational Education or Technical Education is used interchangeably throughout this book. The concept of today's workforce development is universal. As a college professor I believe I have an ethical obligation to promote learning to ensure health and safety, to protect the public and private trust and to promote the transfer of learning. A second premise of this book is that there are common issues and problems in the workplace. This book provides in a single volume the knowledge base common to all work settings for today's students regardless of their specialty. Thus the book was designed for students to think globally and to understand how to be and what it takes to be competitive in the global economy.
