Health Information on the Internet Rowena Cullen, 2005-11-30 The accessibility of health information on the Internet has revolutionized access to clinical information for health practitioners and patients This access to information has the potential to make a major contribution to health care However the effective use of this accessibility depends on an understanding of all the issues involved from the underlying technologies and economic pressures to questions of how best to manage quality and privacy how people seek and use information and what the barriers to its use are Cullen's book also examines the extent of health information on the Internet the providers of websites and their content and outlines the nature of the paradigm shift affecting knowledge in the health sector

Doing Business on the Internet Fay Sudweeks, Celia T. Romm, 2012-12-06 FAY SUDWEEKS AND CELIA ROMM At the turn of the twenty first century global communication is changing the fabric of society at a rate never experienced before The Internet in particular has redrawn the map of global economy To be competitive in today's marketplace companies need to expand commercial activities beyond national borders The global network of electronic infrastructure has played a significant role in this expansion but the technology itself is not the factor driving the business revolution The changes are driven by the interaction of information technology and customer demand Customers are not only adapting to new technologies they are demanding more and more global competition Electronic commerce therefore is arguably the most important economic trend of our time Its presence on the Internet in particular is becoming crucial to the effective functioning of organisations especially in a world where companies need to deal with suppliers customers partners and their own units distributed across the world A global business industry created by the Internet is no longer a projected vision of technocrats it is a reality The Internet is already playing a significant role in determining corporate strategy and in creating values

Children, Risk and Safety on the Internet Livingstone, Sonia,Haddon, Leslie,2012-07-18 As internet use is extending to younger children there is an increasing need for research focus on the risks young users are experiencing as well as the opportunities and how they should cope With expert contributions from diverse disciplines and a uniquely cross national breadth this timely book examines the prospect of enhanced opportunities for learning creativity and communication set against the fear of cyberbullying pornography and invaded privacy by both strangers and peers Based on an impressive in depth survey of 25 000 children carried out by the EU Kids Online network it offers wholly new findings that extend previous research and counter both the optimistic and the pessimistic hype It argues that in the main children are gaining the digital skills coping strategies and social support they need to navigate this fast changing terrain But it also identifies the struggles they encounter pinpointing those for whom harm can follow from risky online encounters Each chapter presents new findings and analyses to inform both researchers and students in the social sciences and policy makers in government industry or child welfare who are working to enhance children s digital experiences

The Law of Contributory Liability on the Internet Berrak Genç-Gelgeç,2022-01-10 This book explores the contributory liability of Internet intermediaries that arises from trademark infringements committed by third parties on the Internet providing a comprehensive analysis of the law applicable to the matter in an EU context It also considers the applicable laws of Germany and England to demonstrate how the rules are implemented in national laws as the

current state of the law is two tiered In providing a framework of the law applicable to online contributory trademark liability the book also addresses ongoing and emerging issues that are specific to trademark law and proposes specific solutions to the issues arising in the context of online contributory trademark liability The liability of Internet intermediaries has been a popular and lively subject from different substantive rights angles However trademark law has not received a great deal of attention from either scholars or legislators As such this book fills a gap in the literature by undertaking a trademark specific examination and will be of great interest to all those involved in the research and legal practice of trademark law **Data**

Revocation on the Internet Olga Kieselmann, 2018-01-30 After publishing data on the Internet the data publisher loses control over it However there are several situations where it is desirable to revoke published information To support this the European Commission has elaborated the General Data Protection Regulation GDPR In particular this regulation requires that controllers must delete data on user s demand However the data might already have been copied by third parties Therefore Article 17 of the GDPR includes the regulation that a controller must also inform all affected third parties about revocation requests Hence the controllers would need to track every access which is hard to achieve This technical infeasibility is a gap between the legislation and the current technical possibilities To close it we provide a distributed and decentralized Internet wide data revocation service DRS which is based on the combination of the technical mechanisms and the obligation to follow the legal regulations With the DRS the user can notify automatically and simultaneously all affected controllers about her revocation request Thus we implicitly provide the notification of third parties about the user s request

Environmental Management Tools on the Internet Michael Katz, 2019-03-29 The Internet is so huge and its growth so explosive that it is growing faster than most of us can keep up Environmental Management Tools on the Internet is your one stop source when moving through and around the World Wide Web in search of the very best in environmental data free of cost This manual does more than emphasize the tools you need to find valuable information The manual shows a number of sites where no cost data can be obtained off the Internet in categories such as water land soil air hazardous waste release and risk and general environment just to name a few Environmental Management Tools on the Internet is a tool that will be useful on a day to day basis by scientists and environmentalists engineers consultants educators and students alike

Belief and Misbelief Asymmetry on the Internet Gérald Bronner, 2015-12-15 This book discusses the media beliefs the news the Internet etc but it should not be seen as yet another critique of the media system exploring with indignant fascination the idea of a machination against truth set up to serve a society of domination These kinds of theories whether they pertain to conspiracy theories or more subtly to a self styled critical way of thinking have always seemed to be the expression of a form of intellectual puerility This is not to say that attempts at manipulating opinions do not occur or that our world is free from compromised principles or indeed corruption far from it but none of this is the key issue In fact reality can somehow be even more unsettling than those myths however sophisticated they may be that envisage the media system hand

in hand with industry science and so forth all in agreement so as to lead the people away from the truth It is more unsettling because the processes described in this book and that allow falsehood and dubiousness to take hold of the public sphere are boosted by the development of IT the workings of our minds and the very nature of democracy And finally it is more unsettling because we are all responsible for what is going to happen to us

Governance, Regulation and Powers on the Internet Eric Brousseau, Meryem Marzouki, Cécile Méadel, 2012-04-23 Digital technologies have prompted the emergence of new modes of regulation and governance since they allow for more decentralized processes of elaboration and implementation of norms Moreover the Internet has been raising a wide set of governance issues since it affects many domains such as individual rights public liberties property rights economic competition market regulation conflict management security and the sovereignty of states There is therefore a need to understand how technical political economic and social norms are articulated as well as to understand who the main actors of this process of transformation are how they interact and how these changes may influence international rulings This book brings together an international team of scholars to explain and analyse how collective regulations evolve in the broader context of the development of post modern societies globalization the reshaping of international relations and the profound transformations of nation states Harmful Content on the Internet and in Video Games Great Britain. Parliament. House of Commons. Culture, Media and Sport Committee, 2008 The Internet has become an indispensable tool for communications research and commerce But this report addresses the growing public concern at the Internet's dark side the easy availability of hardcore pornography which people may find offensive the uploading by ordinary people of film of real fights bullying or alleged rape or the setting up of websites encouraging others to follow extreme diets or self harm or even commit suicide In particular there is increasing anxiety among parents about the use of social networking sites and chatrooms for grooming and sexual predation The Committee welcomes the Government commissioned report by Dr Tanya Byron on the risks posed by the Internet to children and agrees that a UK Council for Child Internet Safety should be established Sites which host user generated content typically photos and videos uploaded by members of the public have taken some steps to set minimum standards for that content The Committee recommends that proactive review of content should be standard practice for such sites and calls for provision of high profile facilities for reporting abuse or unwelcome behaviour directly to law enforcement and support organisations There is a distinct issue about labelling of video games to indicate the nature of their content Two systems currently exist side by side the industry awards its own ratings and the British Board of Film Classification awards classifications to a small number of games which feature content unsuitable for children The dual system is confusing and BBFC should have responsibility for rating games with content appropriate for adults or teenagers

Infrastructure for Electronic Business on the Internet Veljko Milutinovic, 2001-06-30 Design is an art form in which the designer selects from a myriad of alternatives to bring an optimum choice to a user In many complex of optimum is difficult to define Indeed the users

systems the notion themselves will not agree so the best system is simply the one in which the designer and the user have a congruent viewpoint Compounding the design problem are tradeoffs that span a variety of technologies and user requirements The electronic business system is a classically complex system whose tradeoff criteria and user views are constantly changing with rapidly developing underlying technology Professor Milutinovic has chosen this area for his capstone contribution to the computer systems design This book completes his trilogy on design issue in computer systems His first work Surviving the Design of a 200 MHz RISC Microprocessor 1997 focused on the tradeoffs and design issues within a processor His second work Surviving the Design of Microprocessor and Multiprocessor Systems 2000 considers the design issues involved with assembling a number of processors into a coherent system Finally this book generalizes the system design problem to electronic commerce on the Internet a global system of immense consequence The Impact of the Internet on the Marketing of Travel Intermediaries Michael Ott,2002-03-07 Inhaltsangabe Abstract In recent years more and more people expressed their concerns about some companies performance Mainly not about their financial performance but about their social performance About their attitude towards the environment About the treatment of employees Consumers governments environmentalists trade unions but also managers felt that there is a need for change in business life This paper investigates two questions In general how does the marketing of travel intermediaries change when business is conducted over the internet In detail how can travel intermediaries build customer loyalty an the internet Why do these two issues pose problems that require a thorough analysis First the internet provides a new platform for dealing with travel services Although the internet travel market still represents only a small fraction of the total travel market many travel intermediaries entered it in anticipation of huge profits The number of travellers who use the internet to obtain travel services and the money they spend on line for travel purposes is growing rapidly But competition and marketing in the on line travel market is strongly affected by the unique characteristics of the internet In order to stay in business in the long run a deeper understanding of the effects of the internet an the travel industry and an the marketing of individual travel firms is necessary Also the internet threatens to eliminate intermediaries by linking service providers and customers directly Therefore an evaluation of the marketing impacts of the internet is even more vital for travel intermediaries Second a key element of every on line marketing strategy is customer loyalty Many internet travel intermediaries are able to attract a large number of visitors to their web pages But most of these internet users are not loyal and visit the web page only once Since a loyal customer base is essential to generate revenues an the internet the concept of customer loyalty will be analyzed in the on line context The first part of this thesis evaluates the influences of the internet an the marketing of on line travel intermediaries Chapter 1 highlights the important characteristics of the internet These unique features have effects an industries and an individual companies which are analyzed in Chapter 2 Chapter 3 uses the framework of the previous chapter to demonstrate the impacts of the internet an the travel industry and **Finding and Using Health and Medical**
