*Getting Started for Internet of Things with Launch Pad and ESP8266* Rajesh Singh, Anita Gehlot, Lovi Raj Gupta, Bhupendra Singh, Priyanka Tyagi, 2022-09-01 Getting Started for Internet of Things with Launch Pad and ESP8266 provides a platform to get started with the Ti launch pad and IoT modules for Internet of Things applications The book provides the basic knowledge of Ti launch Pad and ESP8266 based customized modules with their interfacing along with the programming The book discusses the application of Internet of Things in different areas Several examples for rapid prototyping are included this to make the readers understand the concept of IoT The book comprises of twenty seven chapters which are divided into four sections and which focus on the design of various independent prototypes Section A gives a brief introduction to Ti launch pad MSP430 and Internet of Things platforms like GPRS NodeMCU and NuttyFi ESP8266 customized board and it shows steps to program these boards Examples on how to interface these boards with display units analog sensors digital sensors and actuators are also included this to make reader comfortable with the platforms Section B discusses the communication modes to relay the data like serial out PWM and I2C Section C explores the IoT data loggers and shows certain steps to design and interact with the servers Section D includes few IoT based case studies in various fields This book is based on the practical experience of the authors while undergoing projects with students and partners from various industries Getting Started with the MSP430 Launchpad Adrian Fernandez, Dung Dang, 2013-04-19 This book explores the world of microcontroller development through friendly lessons and progressively challenging projects which will have you blink LEDs make music with buzzers interact with different sensors like accelerometers and temperature sensors This book is focused on the MSP EXP430G2 LaunchPad Evaluation Kit which is a complete microcontroller development platform that includes everything you need to start creating microcontroller based projects Many of the 25 projects will also leverage external components such as the highly integrated Educational BoosterPack which is a modular extension to the LaunchPad and includes many components such as an RGB LED character LCD potentiometer This book provides helpful guides that break down hardware circuits through visual diagrams and includes fully commented code examples Concepts are broken down and explained in an easy to follow language and analogies to help you understand the principles behind each project system The projects will encourage you to use and even combine the fundamental concepts to develop your ideas in creating new microcontroller solutions Coverage includes Digital Input Output buttons LEDs turning anything into a button Analog Input Output sensors temperature accelerometer potentiometer etc Programming fundamentals conditional branches loops flow logic number systems Pulse Width Modulation PWM square wave buzzer analog signal simulation Serial Communication UART SPI I2C Code development using Energia a

free open source code editor and compiler Debugging through serial communication with a computer Interfacing with external components such as LEDs buzzers potentiometers sensors more With the help of this book you will be challenged to think about developing your own unique microcontroller based application and you will be equipped to start solving various problems adding intelligence to existing products or even developing your own innovative creations with a LaunchPad development kit Includes over 25 projects which focuses on a learn by doing approach Contains easy to follow diagrams and code examples Covers Programming fundamentals such as conditional branches and loops flow logic number systems
