On The Soul Trans Sachs:

Contemporary Encounters with Ancient Metaphysics Abraham Jacob Greenstine, 2017-03-31 Like the ancient inquiries into the nature of things contemporary continental realism and materialism from Deleuze to the Speculative Realists embraces a commitment to investigate beings without subordinating it to analyses of language consciousness texts or the social This pens e brute traditionally known as metaphysics dares to question the one and the many the potential and the actual the material and immaterial and the world itself This apparent kinship is not merely thematic since contemporary thinkers explicitly and repeatedly return to the texts and figures of the Greco Roman world In this volume leading philosophers address these varied volatile and novel interactions and themselves contribute to reconceiving and redeploying the problems of ancient metaphysics Alongside this are 2 original and previously unpublished translations of essays by Gilles Deleuze and Pierre Aubenque

Unconscious Thought in Philosophy and Psychoanalysis John Shannon Hendrix, 2015-07-28 The book explores concepts throughout the history of philosophy that suggest the possibility of unconscious thought and lay the foundation for ideas of unconscious thought in modern philosophy and psychoanalysis The focus is on the workings of unconscious thought and the role it plays in thinking language perception and human identity

Politics, Nature, and Piety: On the Natural Basis of Political Life Laurence Berns, 2022-11-15 The writings in this volume are the fruit of a lifetime devoted to the study of ancients and moderns both poetic and philosophic Full of insights into foundational texts ranging from Aristotle s Poetics to the Declaration of Independence they are marked by an admirable clarity of thought and expression and a persistent effort to engage the reader as a fellow thinker I rejoice that the writings of Laurence Berns are now available in a single volume Peter Kalkavage Tutor St John s College and author of The Logic of Desire An Introduction to Hegel s Phenomenology of Spirit The essays in Politics Nature and Piety take up the central question of political philosophy What is the good life and what place do nature politics and piety have in that life The unity of

the essays Alex Priou writes in his introduction lies in the various tensions explored between ancients and moderns religion and philosophy magnanimity and prudence justice and friendship and most fundamentally spiritedness and the intellect Laurence Berns proves an excellent guide for beginning one's study of the great books of political philosophy from Plato to the present

Intimacy Christopher Lauer, 2016-02-25 An important contribution to the burgeoning field of the ethics of recognition this book examines the contradictions inherent in the very concept of intimacy Working with a wide variety of philosophical and literary sources it warns against measuring our relationships against ideal standards since there is no consummate form of intimacy After analyzing ten major ways that we aim to establish intimacy with one another including gift giving touching and fetishes the book concludes that each fails on its own terms since intimacy wants something that is impossible The very concept of intimacy is a superlative one it aims not just for closeness but for a closeness beyond closeness Nevertheless far from a pessimistic diagnosis of the human condition this is a meditation on how to live intimately in a world in which intimacy is impossible Rather than contenting itself with a deconstructive approach it proposes to treat intimacy dialectically For all its contradictions it shows intimacy is central to how we understand ourselves and our relations to others

E-Co-Affectivity Marjolein Oele, 2020-04-01 Offers an interdisciplinary investigation of affectivity in various forms of life E Co Affectivity is a philosophical investigation of affectivity in various forms of life photosynthesis and growth in plants touch and trauma in bird feathers the ontogenesis of human life through the placenta the bare interface of human skin and the porous materiality of soil Combining biology phenomenology Ancient Greek thought new materialisms environmental philosophy and affect studies Marjolein Oele thinks through the concrete living places that show the receptive responsive power of living beings to be affected and to affect She focuses on these localized interfaces to explain how affectivity emerges in places that are always evolving creative porous and fluid Every interface is material but is also more than its current materiality in cocreating place time and being After extensively describing the effects of the milieu and community within which each example of affectivity takes place in the final chapter Oele adds a prescriptive ethical lens that formulates a new epoch beyond the Anthropocene one that is sensitive to the larger ecological communal concerns at stake This is a very welcome contribution to environmental philosophy The strikingly original thesis is evident in the book's title what we call ecology is a co affectivity the mutuality of affecting and being affected on the part of species biological kingdoms ecosystems etc Here Marjolein Oele melds biology and ontology in new and creative ways enriching both fields Her book performs the very theme it explores it stages a co affective relation between philosophy and the life sciences

Wealth and the Will of God Paul G. Schervish, Keith Whitaker, 2010-03-22 How six great thinkers and Christian theologians addressed issues surrounding wealth charitable giving and human purpose *Wealth and the Will of God* looks at some of the spiritual resources of the Christian tradition that can aid serious reflection on wealth and giving Beginning with Aristotle who is crucial for understanding later Christian

thought the book discusses Aquinas Ignatius Luther Calvin and Jonathan Edwards Though the ideas vary greatly the chapters are organized to facilitate comparisons among these thinkers on issues of ultimate purposes or aspirations of human life on the penultimate purposes of love charity friendship and care on the resources available to human beings in this life and finally on ways to connect and implement in practice our identified resources with our ultimate ends In Pursuit of the Good Eric Salem,2010 What is friendship What is the best life How does one decide Try Salem on Aristotle

Phenomenology and the Non-Human Animal Corinne Painter,Christian Lotz,2007-07-26 The question of the relation between human and non human animals in theoretical ethical and political regards has become a prominent topic within the philosophical debates of the last two decades This volume explores in substantial ways how phenomenology can contribute to these debates It offers specific insights into the description and interpretation of the experience of the non human animal the relation between phenomenology and anthropology the relation between phenomenology and psychology as well as ethical considerations *Ontologies of Nature* Gerard Kuperus,Marjolein Oele,2017-10-04 This volume contains essays that offer both historical and contemporary views of nature as seen through a hermeneutic deconstructive and phenomenological lens

It reaches back to Ancient Greek conceptions of physis in Homer and Empedocles encompasses 13th century Zen master Dogen and extends to include 21st Century Continental Thought By providing ontologies of nature from the perspective of the history of philosophy and of contemporary philosophy alike the book shows that such perspectives need to be seen in dialogue with each other in order to offer a deeper and more comprehensive philosophy of nature The value of the historical accounts discussed lies in discerning the conceptual problems that contribute to the dominant thinking underpinning our ecological predicament as well as in providing helpful resources for thinking innovatively through current problems thus recasting the past to allow for a future yet to be imagined The book also discusses contemporary continental thinkers who are more critically aware of the dominant anthropocentric and instrumental view of nature and who provide substantial guidance for a sensible innovative ontology of nature suited for an ecology of the future Overall the ontologies of nature discerned in this volume are not merely of theoretical interest but strategically serve to suspend anthropocentrism and spark ethical and political reorientation in the context of our current ecological predicament Karman Giorgio

Agamben,2023-05-25 The renowned Italian philosopher offers a penetrating analysis of judgment guilt free will and society in this brief yet profoundly original treatise What does it mean to be responsible for our actions In this brief and elegant study Giorgio Agamben traces our most profound moral intuitions back to their roots in the sphere of law and punishment Moral accountability human free agency and even the very concept of cause and effect all find their origin in the language of the trial which Western philosophy and theology both transform into the paradigm for all of human life In his search for a way out of this destructive paradigm Agamben not only draws on minority opinions within the Western tradition but engages at length with Buddhist texts and concepts for the first time In sum Karman deepens and rearticulates some of Agamben's core

insights while breaking significant new ground *Montesinos' Legacy* Dana E. Aspinall, Edward C. Lorenz, J. Michael Raley, 2015-01-21 Montesinos Legacy brings scholars together in honor of the 500th anniversary of Dominican Antonio de Montesinos famous sermon in defense of the rights of the indigenous Amerindians The collection addresses the historical context for this sermon but also the continued relevance of Montesinos today Montesinos Legacy examines the origins of human rights concepts in the West the rights of indigenous peoples the role of the Church in human rights and human rights in Latin America *Touch and the Ancient Senses* Alex Purves, 2017-11-17 Unlike the other senses touch ranges beyond a single sense organ encompassing not only the skin but also the interior of the body It mediates almost every aspect of interpersonal relations in antiquity from the everyday to the erotic just as it also provides a primary point of contact between the individual and the outside world The essays in this volume explore the ways in which touch plays a defining role in science art philosophy and medicine and shapes our understanding of topics ranging from aesthetics and poetics to various religious and ritual practices Whether we locate the sense of touch on the surface of the skin within the body or less tangibly still within the emotions the sensory impact of touching raises a broad range of interpretive and phenomenological questions This is the first volume of its kind to explore the sense of touch in antiquity bringing a variety of disciplinary approaches to bear on the sense that is usually disregarded as the most base and obvious of the five In these pages by contrast we find in touch a complex and fascinating indicator of the body's relation to object environment and self *Why Photography Matters* Jerry L. Thompson, 2015-11-20 A lucid and wide ranging meditation on why photography is unique among the picture making arts Photography matters writes Jerry Thompson because of how it works not only as an artistic medium but also as a way of knowing With this provocative observation Thompson begins a wide ranging and lucid meditation on why photography is unique among the picture making arts He constructs an argument that moves with natural logic from Thomas Pynchon and why we read him for his vision and not his command of miscellaneous facts to Jonathan Swift to Plato to Emily Dickinson who wrote Tell all the Truth but tell it slant to detailed readings of photographs by Eugène Atget Garry Winogrand Marcia Due Walker Evans and Robert Frank Forcefully and persuasively he argues for photography as a medium whose business is not constructing fantasies pleasing to the eye or imagination but describing the world in the toughest and deepest way *The Anthology of Babel* Ed Simon, 2020-01-21 Why should there only be literary scholarship about authors who actually lived and texts which exist Where are the articles on Enoch Campion Linus Withold Redondo Panza Darshan Singh or Heidi B Morton That none of these are real authors should be no impediment to interpreting their invented writings In the first collection of its kind The Anthology of Babel publishes academic articles by scholars on authors books and movements that are completely invented Blurring the lines between scholarship and creative writing The Anthology of Babel inaugurates a completely new literary genre perfectly attuned to the era we live in a project evocative of Jorge Louis Borges Umberto Eco and Italo Calvino

Incarnation, Pain, Theology Espen Dahl, 2024-06-15 How the phenomenology of pain allows us to rethink human

incarnation While the phenomenological tradition has carefully treated both the objective and the lived body Espen Dahl explores a dimension of the body that does not fall neatly into either category suggesting that philosophers should take account of the inner density of our organic material body By integrating the dimension of flesh and blood into the phenomenological notion of the body Dahl argues that it is possible to reach a more adequate notion of human incarnation The author explores the body in its subjectivity and its resistance in activity founded on passivity and in the ambiguous limits of its skin The phenomenon of pain is given particular attention in this investigation since pain is as Dahl argues what makes the body inescapably manifest in its otherwise hidden dimensions including its ambiguity and vulnerability Related to this focus Dahl also engages with the Christian theological concerns of incarnation pain and hope Phenomenologists have long drawn on this religious inheritance particularly in what has been dubbed the French theological turn In a similar manner Incarnation Pain Theology A Phenomenology of the Body draws on these theological sources while firmly holding to its philosophical commitments in methodological approach and analytic aims

The Nature of Living Being Daniel Carlos Mayer-Foulkes, 2023-06-01 This book proposes a bold idea Living beings are distinguishing distinctions Single cells and multicellular organisms maintain themselves distinct by drawing distinctions This is what organisms are and what they do From this starting point key issues examined range across ontology epistemology phenomenology logic and ethics Topics discussed include the origin of life the nature and purpose of biology the relation between life and logic the nature and limits of formal logic the nature of subjects the subject object relation subject subject relationships and the deep roots of ethics The book provides a radical new foundation to think about philosophy and biology and appeals to researchers and students in these fields It powerfully debunks mechanical thinking about living beings and shows the vast reservoir of insights into aliveness available in the arts and humanities

Being of Two Minds Jonathan Goldberg, 2022-09-20 Being of Two Minds examines the place that early modern literature held in Modernist literary criticism For T S Eliot Virginia Woolf and William Empson the early modern period helps model a literary future At stake in their engagements across time were ontological questions about literature and its ability to mediate between the one and the many the particular and the general life and death the past and the present If reading and writing literature enables the mind to be in two places at once creative experience serves as a way to participate in an expanded field of consciousness alongside mortality Goldberg reads the readings that these modernists performed on texts that Eliot claimed for the canon like the metaphysical poets and Jacobean dramatists but also Shakespeare Milton Montaigne and Margaret Cavendish Ontological concerns are reflected in Eliot's engagement with Aristotle's theory of the soul and Empson's Buddhism These arguments about being affect minds and bodies and call into question sexual normativity Eliot glances at a sodomitical male male mode of literary transmission Woolf produces a Judith Shakespeare to model androgynous being Empson refuses to distinguish activity from passivity to rewrite gender difference The work of one of our leading literary and cultural critics Being of Two Minds spans centuries to show

how the most compelling and surprising ideas about mind experience and existence not only move between early modernity high modernism and our own moment but are also constituted through that very movement between times and minds

When Souls Had Wings Terryl L. Givens, Terryl Givens, 2012-06-07 The idea of the pre existence of the soul has been extremely important widespread and persistent throughout Western history from even before the philosophy of Plato to the poetry of Robert Frost This book offers the first systematic history of this little explored feature of Western culture Terryl Givens underscores how durable and controversial this idea has been throughout history highlighting the theological dangers it has represented and revealing how prominently it has featured in poetry literature and art **Reality of Motion** Sudipta Chattapadhyay, 2018-09-30 I have tried to re examine the views of the great thinkers of the east and the west with a new interpretation to establish whether there is motion and if so whats are it s implications I have also tried to make philosophy closer to science
