The Global Banking Network: What is Behind the Increasing Regionalization Trend?

Mr.Eugenio M Cerutti,Haonan Zhou,2018-03-09 This paper analyses the nature of the increasing regionalization process in global banking Despite the large decline in aggregate cross border banking lending volumes some parts of the global banking network are currently more interlinked regionally than before the Global Financial Crisis After developing a simple theoretical model capturing banks internationalization decisions our estimation shows that this regionalization trend is present even after controlling for traditional gravitational variables e g distance language legal system etc especially among lenders in EMs and non core banking systems such as Australia Canada Hong Kong and Singapore Moreover this regionalization trend was present before the GFC but it has increased since then and it seems to be associated with regulatory variables and the opportunities created by the retrenchment of several European lenders The Global Enabling Trade Report 2008 ,2008

Visas and Walls Nazli Avdan,2019-02-01 Borders traditionally served to insulate nations from other states and to provide bulwarks against intrusion by foreign armies In the age of terrorism borders are more frequently perceived as protection against threats from determined individuals arriving from elsewhere After a deadly terrorist attack leaders immediately encounter pressure to close their borders As Nazli Avdan observes cracking down on border crossings and policing migration enhance security However the imperatives of globalization demand that borders remain open to legal travel and economic exchange While stricter border policies may be symbolically valuable and pragmatically safer according to Avdan they are economically costly restricting trade between neighbors and damaging commercial ties In Visas and Walls Avdan argues that the balance between economics and security is contingent on how close to home threats whether actual or potential originate When terrorist events affect the residents of a country or take place within its borders economic ties matter less When terrorist violence strikes elsewhere and does not involve its citizens the unaffected state s investment in globalization carries the day Avdan examines the visa waiver programs and visa control policies of several countries in place in 2010 including Turkey s migration policies analyzes the visa issuance practices of the European Union from 2003 until 2015 and explores how terrorism and trade affected states propensities to build border walls in the post World War II era Her findings challenge the claim that border crackdowns are a reflexive response to terrorist violence and qualify globalists assertions that economic globalization makes for open borders Visas and Walls encourages policymakers and leaders to consider more broadly the effects of economic interdependence on policies governing borders and their permeability

Thermonuclear Monarchy: Choosing Between Democracy and Doom Elaine Scarry, 2014-02-24 From one of our leading social thinkers a compelling case for the elimination of nuclear weapons During his impeachment proceedings Richard Nixon boasted I can go into my office and pick up the telephone and in twenty five minutes seventy million people will be dead Nixon was accurately describing not only his own power but also the power of every American president in the nuclear age Presidents Eisenhower Kennedy Johnson and Nixon each contemplated using nuclear weapons Eisenhower twice Kennedy three times Johnson once Nixon four times Whether later presidents from Ford to Obama considered using them we will learn only once their national security papers are released In this incisive masterfully argued new book award winning social theorist Elaine Scarry demonstrates that the power of one leader to obliterate millions of people with a nuclear weapon a possibility that remains very real even in the wake of the Cold War deeply violates our constitutional rights undermines the social contract and is fundamentally at odds with the deliberative principles of democracy According to the Constitution the decision to go to war requires rigorous testing by both Congress and the citizenry when a leader can single handedly decide to deploy a nuclear weapon we live in a state of thermonuclear monarchy not democracy The danger of nuclear weapons comes from potential accidents or acquisition by terrorists hackers or rogue countries But the gravest danger comes from the mistaken idea that there exists some case compatible with legitimate governance There can be no such case Thermonuclear Monarchy shows the deformation of governance that occurs when a country gains nuclear weapons In bold and lucid prose Thermonuclear Monarchy identifies the tools that will enable us to eliminate nuclear weapons and bring the decision for war back into the hands of Congress and the people Only by doing so can we secure the safety of home populations foreign populations and the earth itself

Brain Gain Darrell M. West, 2010-06-01 Many of America's greatest artists scientists investors educators and entrepreneurs have come from abroad Rather than suffering from the brain drain of talented and educated individuals

emigrating the United States has benefited greatly over the years from the brain gain of immigration. These gifted immigrants have engineered advances in energy, information technology, international commerce, sports, arts, and culture. To stay competitive, the United States must institute more of an open door policy to attract unique talents from other nations. Yet Americans resist such a policy despite their own immigrant histories and the substantial social, economic, intellectual, and cultural benefits of welcoming newcomers. Why? In *Brain Gain*, Darrell West asserts that perception or vision is one reason reform in immigration policy is so politically difficult. Public discourse tends to emphasize the perceived negatives. Fear too often trumps optimism and reason. And democracy is messy with policy principles that are often difficult to reconcile. The seeming irrationality of U.S. immigration policy arises from a variety of thorny and interrelated factors: particularistic politics and fragmented institutions; public concern regarding education and employment; anger over taxes and social services; and ambivalence about national identity, culture, and language. Add to that stew a myopic or worse press, persistent fears of terrorism, and the difficulties of implementing border enforcement and legal justice. West prescribes a series of reforms that will put America on a better course and enhance its long-term social and economic prosperity. Reconceptualizing immigration as a way to enhance innovation and competitiveness, the author notes, will help us find the next Sergey Brin, the next Andrew Grove, or even the next Albert Einstein.

Pierloot,2023-12-14 In Greene s writings we notice a genuine concern with social and political conflicts at different places in the world But at the same time they bear witness to a distinct involvement in problems of human nature and behaviour In this respect we can formulate some dominating preoccupations such as the stressing of antitheses and antagonisms which he calls himself cleavage the questioning of loyalty and the claiming of the right to disloyalty the repercussion of childhood experiences in particular the father son relationship on adult life and the transcendental dimension in human experience From a psychoanalytic viewpoint we analyse the various elaborations of these general themes in the work of Greene as symbolizations of specific unconscious phantasies defined in the writings of Freud Klein Fairbairn Kernberg Kohut and Winnicott This analysis of the imaginary world of an author is conceived as analogous to a clinical psychoanalysis It is a hermeneutical activity based on the countertransference experience evoked by the reading of the text while taking into account the manifold strategies of symbolizing in a literary work the choice of the genre themes

Integration at the Border Karin de Vries, 2013-07-22 A recent development in the immigration policies of several European states is to make the admission of foreign nationals dependent upon criteria relating to their integration. As the practice of integration testing abroad becomes more widespread, this book endeavours to clarify the legal implications which have hitherto remained poorly understood and studied. The book begins by looking at the situation in the Netherlands, which was the first EU Member State to introduce pre-entry integration requirements. It explores the historical and political origins of the Dutch Act on Integration Abroad and explains how, in this national context, integration has become a criterion for the selection of immigrants. It then examines how integration requirements must be evaluated from the point of view of European and international law, including human rights treaties, EU migration directives and association agreements, and the law on non-discrimination. The book identifies the legal standards set by these instruments with regard to integration testing abroad and draws conclusions as to the lawfulness of the Dutch approach.
