Self-Knowledge for Humans Quassim Cassam,2014-11-27 Human beings are not model epistemic citizens Our reasoning can be careless and uncritical and our beliefs desires and other attitudes aren't always as they ought rationally to be Our beliefs can be eccentric our desires irrational and our hopes hopelessly unrealistic Our attitudes are influenced by a wide range of non epistemic or non rational factors including our character our emotions and powerful unconscious biases Yet we are rarely conscious of such influences Self ignorance is not something to which human beings are immune In this book Quassim Cassam develops an account of self knowledge which tries to do justice to these and other respects in which humans aren't model epistemic citizens He rejects rationalist and other mainstream philosophical accounts of self knowledge on the grounds that in more than one sense they aren't accounts of self knowledge for humans Instead he defends the view that inferences from behavioural and psychological evidence are a basic source of human self knowledge On this account self knowledge is a genuine cognitive achievement and self ignorance is almost always on the cards As well as explaining knowledge of our own states of mind Cassam also accounts for what he calls substantial self knowledge including knowledge of our values emotions and character He criticizes philosophical accounts of self knowledge for neglecting substantial self knowledge and concludes with a discussion of the value of self knowledge This book tries to do for philosophy what behavioural economics tries to do for economics Just as behavioural economics is the economics of homo sapiens as distinct from the economics of an ideally rational and self homo economics so Cassam argues that philosophy should focus on the human predicament rather than on the reasoning and self knowledge of an idealized homo philosophicus A Way of

Self-Knowledge and Resentment Akeel Bilgrami,2012-03-05 In Self Knowledge and Resentment Akeel Bilgrami argues that self knowledge of our intentional states is special among all the knowledges we have because it is not an epistemological notion in the standard sense of that term but instead is a fallout of the radically normative nature of thought and agency

The Oxford Handbook of Social Epistemology Jennifer Lackey, Aidan McGlynn, 2025 How do we learn from one another on the internet How can we defend ourselves from propaganda and seek the truth How do our race gender and other aspects of our identity imbue how we learn and know things Social epistemology explores timely and urgent questions such as these which is why the field has seen an explosion of interest in recent years Having originated as a subfield social epistemology now permeates the agenda of mainstream epistemology even though it challenges epistemology's traditional focus on the individual The Oxford Handbook of Social Epistemology offers a collection of cutting edge essays on many of the most important issues in this rapidly growing area of philosophy It takes stock of recent developments in the field and reassesses topics that have been thought to fit comfortably within a more traditional approach to epistemology including our capacities to know our own minds to reason and to remember by examining the ways in which they might be significantly impacted by one's social environment Several chapters interrogate the boundaries of what social epistemology is by exploring its application to significant issues outside of philosophy such as psychology sociology and political theory as well as the ways it intersects with ethics the philosophies of language and mind political philosophy feminist philosophy and critical philosophy of race Divided into seven sections this handbook provides a comprehensive coverage of work in this exciting and fertile area of philosophy as it highlights the relevance and importance of social factors to some of the most pressing epistemological questions facing us as agents in the world

Self-Knowledge: A Critical Factor for Self-Transformation Abhaya Nath Tiwari, 2019-11-27 Self knowledge Why it matters to transform ourselves What makes us who we are Is it our intelligence talent or something else in life Not as much as we think Abhaya Tiwari argues our vision of life is fogged by superficiality It yearns granularity about our core constituents of self by plowing deeper into our inner self Self knowledge plays a critical role in accessing our true self that plays a far greater role in our understanding of our true self purpose success and happiness untangling us from the vicissitudes of life It matters even more in a disrupted world that is fragmented in our contemporary times where self knowledge and its application provide a distinctive edge for exponential growth Self knowledge is critical for self transformation It provides deeper understanding of self viz what it is and what it does how it regulates and provides common sense wisdom for its practical application in life It provides much needed clarity about our true self evaluation of world around our self our purpose and competencies requiring mastery to achieve self transformation This book will also touch upon deeper understanding of neuropsychology of self and its true nature for high performance and happiness giving insights into human nature and its behavior Abhaya Tiwari provides insights and guidance to parents students teachers and working professionals to achieve what we set out to be in life and to be content and happy

The First-Person Point of View Wolfgang Carl, 2014-07-28 The interest in a better understanding of what is constitutive for being a person is a concern

philosophy shares with some of the sciences The views currently discussed in evolutionary biology and in the neurosciences are very much influenced by traditional philosophical views about the self and self knowledge while contemporary philosophical accounts are not considered at all Such an account will be given by an analysis of three focal elements of the use of the first person pronoun These elements have something to do with the faculty of taking a first person point of view The conceptual structure of this point of view is explained by comparing it with a second and third person point of view There is an extensive discussion of various views about self knowledge Davidson Bilgrami Burge and a new conception of authoritative self knowledge is established The first person point of view is a reflexive attitude which includes various attitudes to one s past and future These attitudes are necessarily or contingently de se By bringing into focus the concern for one s future intentions will be discussed as an activity based attitude while there are other attitudes like hope or fear which are shaped by the acceptance of one s future situations which are not or not completely under one s control This view gives rise to a criticism of Frankfurt s notion of Caring

Aquinas on Human Self-Knowledge Therese Scarpelli Cory, 2014 A study of Aquinas s theory of self knowledge situated within the mid thirteenth century debate and his own maturing thought on human nature *Debating Self-Knowledge* Anthony Brueckner, Gary Ebbs, 2012-06-21 Language users ordinarily suppose that they know what thoughts their own utterances express We can call this supposed knowledge minimal self knowledge But what does it come to And do we actually have it Anti individualism implies that the thoughts which a person s utterances express are partly determined by facts about their social and physical environments If anti individualism is true then there are some apparently coherent sceptical hypotheses that conflict with our supposition that we have minimal self knowledge In this book Anthony Brueckner and Gary Ebbs debate how to characterize this problem and develop opposing views of what it shows Their discussion is the only sustained in depth debate about anti individualism scepticism and knowledge of one s own thoughts and will interest both scholars and graduate students in philosophy of language philosophy of mind and epistemology
