On Vegetarianism The Great Kinship Of Humans And Fauna:

On Vegetarianism Elisee Reclus, 1996 Two short essays from the legendary anarchist geographer visionary texts first published in 1901 looking forward to the day when all the creatures of the earth can live in harmony with the earth with each other and with humanity taking its place alongside all other beings *Undoing Human Supremacy* Simon Springer, Jennifer Mateer, Martin Locret-Collet, Maleea Acker, 2021-10-15 The Earth is in crisis We know this We have known this for a long time In the throes of the unfolding nightmare we call capitalism it is not hard to see and hear the violence that is being enacted against the planet If we are to move beyond the idea that humanity is tasked with expressing our dominion over nature and towards a renewed integral understanding of humanity as firmly located within the biosphere as an anarchist political ecology demands then we have to start interrogating the privileges hierarchies and human centric frames that guide our ways of knowing and being in the world This volume centers around the idea that anarchism as a conceptual framework encourages us to contend with the multiple lines of difference the various iterations of privilege and the manifold set of archies that undergird our understandings of the world and crucially our place within it *The Practice of Freedom* Richard J. White, Simon Springer, Marcelo Lopes de Souza, 2016-09-29 The last two decades have seen a re birth of practices and principles that connect with the soul of left libertarianism although they may not explicitly engage with the anarchist tradition From practices of mapping and land use planning to local protests and transnational social movements this book explores a variety of case studies that trace the influences of and affinities between anarchist and geographic practice The chapters explore the vast possibilities of inventive exploratory libertarian practices from contemporary and historic contexts around the globe They examine the ways in which various spatial practices have been compatible with left libertarian principles and explore the extent to which anarchists neo anarchists and libertarian autonomists have animated these waves of protest and forms of resistance In an age that is desperately in need of critical new directions this volume shows that a serious re turn toward anarchist thought and practice can challenge and inspire geographers to travel beyond their traditional frontiers of geographical praxis *Geopolitics and Empire* Gerard Kearns, 2009-06-11 This book examines the long entanglement between ideas of Geopolitics and the ideology and practices of Empire tracing these matters back to the true founder of Geopolitics a British geographer of the early twentieth century Halford Mackinder *Teaching Liberation* Trzak, Agnes, 2019-10-15 As humankind moves deeper into the Anthropocene a period marked by climate disruption species extinction and profound challenges to human and animal welfare what and how we teach our children has never been of greater importance In this passionate incisive and diverse collection of thirteen interconnected essays educators at every level of education and from four continents call for a re imagined pedagogy that embeds respect for the other than human world encourages imagination and resilience and fosters open inquiry based on principles of justice fairness and equity By turns polemical visionary and practical *Teaching Liberation* is an essential book for critical animal studies scholars humane

educators and all those who practice pedagogy whether in the classroom or outside it *Making a Killing* Bob Torres,2007 Using Marxism anarchism and social ecology to explore domination power and hierarchy the author criticizes the use and abuse of animals in capitalist society and argues for the abolition of animal involvement in industry and as a human food source

Animal Oppression and Capitalism David Nibert,2017-09-08 This important two volume set unapologetically documents how capitalism results in the oppression of animals ranging from fish and chickens to dogs elephants and kangaroos as well as in environmental destruction vital resource depletion and climate change Most traditional narratives portray humanity s use of other animals as natural and necessary for human social development and present the idea that capitalism is generally a positive force in the world But is this worldview accurate or just a convenient easy to accept way to ignore what is really happening a systematic oppression of animals that simultaneously results in environmental destruction and places insurmountable obstacles in the path to a sustainable and peaceful future David Nibert s *Animal Oppression and Capitalism* is a timely two volume set that calls into question the capitalist system at a point in human history when inequality and the imbalance in the distribution of wealth are growing domestically and internationally Expert contributors show why the oppression of animals particularly the use of other animals as food is increasingly being linked to unfavorable climate change and the depletion of fresh water and other vital resources Readers will also learn about the tragic connections between the production of animal products and global hunger and expanded regional violence and warfare and they will understand how many common human health problems including heart attacks strokes and various forms of cancer develop as a result of consuming animal products
