An Earthman on Mercury stumbles into a long lost colony in a hidden air filled valley ruled by harsh Sunstone wielding hawk controlling lords and of course an alien overlord behind them *The Survival Game* David P. Barash, 2004-09-01 From a zoologist and psychologist an astonishing look at the biological and strategic roots of human decisions Humans like bacteria woodchucks chimpanzees and other animals compete or cooperate in order to get food shelter territory and other resources to survive But how do they decide whether to muscle out or team up with the competition In *The Survival Game* David P Barash synthesizes the newest ideas from psychology economics and biology to explore and explain the roots of human strategy Drawing on game theory the study of how individuals make decisions he explores the give and take of spouses in determining an evening s plans the behavior of investors in a market bubble and the maneuvers of generals on a battlefield alongside the mating and fighting strategies of less rational animals Ultimately Barash s lively and clear examples shed light on what makes our decisions human and what we can glean from game theory and the natural world as we negotiate and compete every day **Of Men and Marshes** Paul Errington, 2012-10-15 Standing with such environmental classics as Loren Eiseley s *The Immense Journey* his friend and mentor Aldo Leopold s *A Sand County Almanac* and Joseph Wood Krutch s *The*

Voice of the Desert Paul Errington's *Of Men and Marshes* remains an evocative reminder of the great beauty and intrinsic value of the glacial marshland. Prescient and stirring, steeped in insights from Errington's biological fieldwork, his experiences as a hunter and trapper, and his days exploring the marshes of his rural South Dakota childhood, this vibrant work of nature writing reveals his deep knowledge of the marshland environments he championed. Examining the marsh from a dynamic range of perspectives, Errington begins by inviting us to consider how immense spans of time coupled with profound geological events shaped the unique marshland ecosystems of the Midwest. He then follows this wetland environment across seasons and over the years, creating a compelling portrait of a natural place too little appreciated and too often destroyed. Reminding us of the intricate relationships between the marsh and the animals who call it home, Errington records his experiences with hundreds of wetland creatures. He follows minks and muskrats, snapping turtles and white pelicans, red foxes and blue-winged teals, all the while underscoring our responsibility to preserve this remarkable and fragile environment and challenging us to change the way we think about and value marshlands. This classic of twentieth-century nature writing, a landmark work that is still a joy to read, offers a stirring portrait of the Midwest's endangered glacial marshland ecosystems by one of the most influential biologists of his day. A cautionary book whose advice has not been heeded, a must read of American environmental literature. *Of Men and Marshes* should inspire a new generation of conservationists. **Chapters**
