## Once Out Of Nature:

*Once Out of Nature* Andrea Nightingale, 2011-06-01 *Once Out of Nature* offers an original interpretation of Augustine's theory of time and embodiment. Andrea Nightingale draws on philosophy, sociology, literary theory, and social history to analyze Augustine's conception of temporality, eternity, and the human and transhuman condition. In Nightingale's view, the notion of embodiment illuminates a set of problems much larger than the body itself; it captures the human experience of being an embodied soul dwelling on earth. In Augustine's writings, humans live both in and out of nature: exiled from Eden and punished by mortality, they are resident aliens on earth. While the human body is subject to earthly time, the human mind is governed by what Nightingale calls psychic time. For the human psyche, always stretches away from the present moment where the physical body persists into memories and expectations. As Nightingale explains, while the body is present in the here and now, the psyche cannot experience self-presence. Thus, for Augustine, the human being dwells in two distinct time zones: in earthly time and in psychic time. The human self, then, is a moving target. Adam, Eve, and the resurrected saints, by contrast, live outside of time and nature; these transhumans dwell in an everlasting present. Nightingale connects Augustine's views to contemporary debates about transhumans and suggests that Augustine's thought reflects our own ambivalent relationship with our bodies and the earth. *Once Out of Nature* offers a compelling invitation to ponder the boundaries of the human.

*Pierced by Love* Hans Boersma, 2023-04-19 Holy Scripture requires holy reading. Encounter an ancient but fresh way of reading the Bible. Learn from Augustine, Anselm of Canterbury, Bernard of Clairvaux, and others. Experience a structured and simple way to focus on Christ, listen to the Spirit, and rest in God's love. Jesus is the point of reading the Bible. Christians read Scripture to encounter Christ and be conformed to his image. Scripture is no mere human text; it is God's living word. So how should we read it? For Christians throughout the centuries, the answer has been *lectio divina*, divine reading. *Lectio divina* is a sacramental reading. It aims to take us more deeply into the life of God. Through practicing the four movements of *emlectio divina*: attentive reading, extended meditation, prayerful reflection, and silent resting, we have a structured and simple way to focus on Christ, listen to the Spirit, and rest in God's love. We no longer simply read the words of Scripture; instead, we read the face of God in the eternal Word.

**Nature Speaks** Kellie Robertson,2017-01-25 What does it mean to speak for nature Contemporary environmental critics warn that giving a voice to nonhuman nature reduces it to a mere echo of our own needs and desires they caution that it is a perverse form of anthropocentrism And yet nature s voice proved a powerful and durable ethical tool for premodern writers many of whom used it to explore what it meant to be an embodied creature or to ask whether human experience is independent of the natural world in which it is forged The history of the late medieval period can be retold as the story of how nature gained an authoritative voice only to lose it again at the onset of modernity This distinctive voice Kellie Robertson argues emerged from a novel historical confluence of physics and fiction writing Natural philosophers and poets shared a language for talking about physical inclination the inherent desire to pursue the good that was found in all things living and nonliving Moreover both natural philosophers and poets believed that representing the visible world was a problem of morality rather than mere description Based on readings of academic commentaries and scientific treatises as well as popular allegorical poetry Nature Speaks contends that controversy over Aristotle s natural philosophy gave birth to a philosophical poetics that sought to understand the extent to which the human will was necessarily determined by the same forces that shaped the rest of the material world Modern disciplinary divisions have largely discouraged shared imaginative responses to this problem among the contemporary sciences and humanities Robertson demonstrates that this earlier worldview can offer an alternative model of human nonhuman complementarity one premised neither on compulsory human exceptionalism nor on the simple reduction of one category to the other Most important Nature Speaks assesses what is gained and what is lost when nature s voice goes silent
