**Concord and Peace** Odd Magne Bakke,2001 Odd Magne Bakke presents the first in depth study of 1 Clement from the standpoint of the letter s rhetoric He bases his methodological analysis on tools from the Graeco Roman rhetorical tradition using both the handbooks as well as actual speeches and letters These are supplemented by tools from modern text linguistics which the author uses to do a compositional analysis of the letter and by the tools of modern semantics used to establish the language of concord in 1 Clement which it has in common with other relevant ancient literature The author s approach constitutes a fresh reading of 1 Clement and provides new suggestions on several important issues in the immense research on the letter He demonstrates both the thematic and argumentative unity of the letter Its macro structure reflects the conventional parts of the dispositio of ancient rhetoric exordium narratio probatio peroratio Also the sub texts on different levels of these parts are shown to be integrated into and to serve Clement s overall argument for re establishing concord and peace in the Corinthian church Odd Magne Bakke questions the traditional views that the conflict in this church was between spirit and office or was a matter of doctrine He argues that Clement primarily regarded it as a conflict between people of different socio economic statuses in which a struggle for honor appeared to be an important aspect

to this study which explores the interaction between the form of noun phrases their meaning and their use It shows how despite the need in linguistic analysis for strict categories many linguistic constructions in fact defy straightforward classification and concludes that in order to fully explain the internal structure of utterances we must first consider the communicative pragmatic and cognitive factors that come into play Drawing on a range of authentic examples this book sheds light not only on the noun phrase itself but also the nature of linguistic classification *The Works of John Milton* John Milton, 1994 poetry poets

**International Medievalisms** Mary Boyle, 2023

Identifies and investigates international medievalism through three distinct strands Internationally Nationalist Someone Else's Past and Activist Medievalism Medievalism the reception of the Middle Ages often invokes a set of tropes generally considered medieval rather than consciously engaging with medieval cultures and societies International medievalism offers

an additional interpretative layer by juxtaposing two or more national cultures at least one of which is medieval National can be aspirational it might refer to the area within agreed borders or to the people who live there but it might also describe the people who understand or imagine themselves to constitute a nation And once medieval becomes simply a collection of ideas it can be re formed as desired cast as more geographically than historically specific or function as a gateway to an even more nebulous past This collection explores medievalist media from the textual to the architectural Subjects range from The Green Children of Woolpit to Refugee Tales and from Viking metal to Joan of Arc As the contributors to each section make clear for centuries the medieval has provided material for countless competing causes and cannot be contained within historical political or national borders The essays show how the medieval is repeatedly co opted and recreated formed as much as formative inviting us to ask why and in service of what     *Inwrought with figures dim.
