*Reading God's World* Angus J. L. Menuge, 2004 Book of essays explores vital connections between science Christian faith and vocation in the postmodern world      *Evidence for God* William A. Dembski, Michael R. Licona, 2010-07-01 There have always been challenges to belief in God as he is revealed in the Bible and each new year seems to add more questions to the doubter's arsenal In *Evidence for God* leading apologists provide compelling arguments that address the most pressing questions of the day about God science Jesus the Bible and more including Is Intelligent Design really a credible explanation of the origins of our world Did Jesus really exist Is Jesus really the only way to God What about those who have never heard the gospel Is the Bible today what was originally written What about recently publicized gospels that aren't in the Bible and much more      Whoever Controls the Schools Rules the World Gary DeMar, 2007      **Debating Design** William A.

Dembski, Michael Ruse, 2004-07-12 In this book first published in 2004 William Dembski Michael Ruse and other prominent philosophers provide a comprehensive balanced overview of the debate concerning biological origins a controversial dialectic since Darwin published *The Origin of Species* in 1859 Invariably the source of controversy has been design Is the appearance of design in organisms as exhibited in their functional complexity the result of purely natural forces acting without prevision or teleology Or does the appearance of design signify genuine prevision and teleology and if so is that design empirically detectable and thus open to scientific inquiry Four main positions have emerged in response to these questions Darwinism self organisation theistic evolution and intelligent design The contributors to this volume define their respective positions in an accessible style inviting readers to draw their own conclusions Two introductory essays furnish a historical overview of the debate      **Theologia et Apologia** Adam S. Francisco, Corey D. Maas, Steven P. Mueller, 2007-03-01 *Theologia et Apologia* gathers together eighteen essays written by a wide range of scholars on Reformation theology and its defense Orthodox theology grounded in the Scriptures calls humanity to believe This same theology must also be presented and defended to a world that has often not attended to its vital message Collectively these essays teach and defend the biblical theology articulated during the Reformation and still today They address topics including the inspiration canon and interpretation of Scripture Reformation era developments classic and modern apologetics and other topics This helpful book honoring Rod Rosenblatt a notable theologian and apologist is a welcome addition to the library of any thinking Christian

**Tough-Minded Christianity** William A. Theistic Evolution J. P. Moreland, Stephen C. Meyer, Christopher Shaw, Ann K. Gauger, Wayne Grudem, 2020-06-20 Winner of the ECPA Book of the Year Award for Bible Reference Works Many prominent Christians insist that the church must yield to contemporary evolutionary theory and therefore modify traditional biblical ideas about the creation of life They argue that God used albeit in an undetectable way evolutionary mechanisms to produce all forms of life Featuring two dozen highly credentialed scientists philosophers and theologians from Europe and North America this volume contests this proposal documenting evidential logical and theological problems with theistic evolution making it the most comprehensive critique of theistic evolution yet produced Explains why theistic evolution is not congruent with a biblical worldview Features nineteen essays written by well known experts in their fields Designed to be used as a textbook for courses on religion and evolution Accessible for those without expertise in the subject

Kepler's Cosmological Synthesis Patrick J. Boner, 2013-06-17 The cosmology of Johannes Kepler remains a mystery On the one hand Kepler's speculations on spiritual faculties are seen as the remnants of Renaissance philosophy On the other his comparison of the cosmos to a clock summons the mechanical metaphor that shaped modern science This book explores the inseparable connections between Kepler's vitalistic views and his more enduring accomplishments in astronomy The key argument is that Kepler's celestial biology served as a bridge between his revolutionary astronomy and other less scientific interests particularly astrology Kepler's Cosmological Synthesis sheds new light on one of the foundational figures of the Scientific

Revolution By uncovering a new form of coherence in Kepler's world picture it traces the unlikely intersections of mechanism and vitalism that transformed the fabric of the heavens [Like A Pelting Rain](#) Roland Cap Ehlke, 2018-04-10 When it comes to analyzing today's culture people talk about politics economics and even morals Like a Pelting Rain The Making of the Modern Mind goes deeper and looks at the spiritual condition of Western civilization How we arrived at where we are is the long and complex interplay of theology and culture Understanding the trends of the times does not necessitate accepting them God calls upon Christians to contend for the faith The Holy Spirit is still at work and the Gospel remains the power of God for the salvation of all who believe *The Fall of Man and the Foundations of Science* Peter Harrison, 2007-12-20 See

**Interpreting Kuhn** K. Brad Wray, 2021-07-08 One might wonder if there is anything new to say about Thomas Kuhn and his views on science Scholarship on Kuhn though has changed dramatically in the last 20 years This is so for a number reasons [Beyond Borders](#) Néstor Herrán, Tayra Lanuza-Navarro, Josep Simon, 2009-05-27 How does scientific knowledge circulate Does scientific communication shape the making of science Is the making of science a national endeavour or does it

have an international or transnational dimension Are teaching and research equally relevant in this endeavour How can history of science react to the challenges posed by the changing practices of science in historical context Beyond Borders is a book generated at the heart of these fundamental questions In the last decades the history of science has attained a high degree of disciplinary maturity and sophistication However perception of disciplinary crisis is apparent behind calls for the search of new big pictures and their implementation in teaching and communicating the history of science to wider audiences Temporal and narrative fragmentation are seen as major drawbacks hindering the development of the discipline In addition national linguistic and methodological division is increasingly afflicting its practice Like other areas in the humanities and in contrast to the sciences the history of science has nowadays a pronounced local character which clearly constrains its intellectual output Challenging this state of affairs is a major aim of this book which argues for a resolute call for intellectual and methodological pluralism and internationalism Through a broad diversity of subjects periods and geographies covering from studies of sixteenth century astrological texts to contextual analysis of twentieth century X ray spectroscopy this collection of papers and historiographical essays offers a fresh overview of the field and its major questions Beyond Borders revisits five major topics in history of science namely the early modern map of knowledge pedagogy and science science popularization science and the nation and the geography of scientific centres and peripheries Engaging with a broad diversity of historiographical and methodological approaches in an international perspective Beyond Borders is a rich and plural manifesto contributing to the reflective appraisal of history of science as a discipline
