Direct Instruction (DI) is a powerful instructional approach designed to ensure that students master critical skills and content required for more advanced learning Although DI has existed since the late 1960s there are many common misconceptions about the approach its potential to enhance student learning and the way its proper implementation facilitates students academic success This book provides a systematic explanation of the Direct Instruction methodology and DI program design as it outlines a roadmap for teachers and school leaders on how to implement DI successfully Divided into three main sections the first section describes DI as a coherent and complete teaching and learning system that contrasts DI with lower case direct or explicit instruction which focuses on effective instructional delivery techniques The second section provides a step by step guide to implementing DI The third section is devoted to cautions about implementing DI This section reinforces the notion that the physical possession of the DI curricula does not by itself lead to student success Those who adopt DI need to ensure that it is implemented with fidelity for the benefit of their students who are reliant on them to provide them with the means to achieve their academic potential so they may lead healthy productive lives      *Handbook of Behavior Modification with the Mentally Retarded* Johnny L. Matson, 2013-11-22 The development of behavior modification principles and procedures and the ensuing research have had a dramatic impact on services for mentally retarded persons This book is the second edition of a volume that is designed to update readers on some of these many developments Although many of the chapter titles and authors from the first edition remain unchanged we have added additional chapters to reflect new areas of research The book is thus a critical review of this literature and as such provides essential and important notions about what we know and what can be done to expand our current knowledge The authors of the chapters are all recognized experts who have been active in publishing in the research areas they critique As a result they have a good understanding of what are the

major issues in the field And because they are also active in service provision to persons with identified handicaps their material will be especially useful to practitioners and it is hoped to those\_ professionals who are working in the field in establishing data based treatments One important change in the field has concerned the terminology used to We are aware that persons with mental retard describe handicapped persons dation are no longer referred to as the mentally retarded and although no disrespect is intended for the sake of continuity the original title has been retained on the advice of the publisher
