Guthrie, 2013-12-16 Based on research from the National Reading Research Center NRRRC at the Universities of Georgia and Maryland this issue presents the contributors synthesized work on reading motivation and engagement Articles are devoted to the following topics the general motivation constructs related to reading home influences on reading motivation readers responses to different types of text influences of classroom contexts and types of assessment on children's motivation Reading Achievement and Motivation in Boys and Girls Pelusa Orellana García, Paula Baldwin Lind, 2018-05-02

This volume links theoretical and instructional approaches on how reading is motivated and assessed and examines the interrelationship between reading motivation and achievement among boys and girls in culturally and geographically different settings. Much of the research on children's reading has focused on cognitive processes; however, reading is an activity that also requires interest and motivation. These attitudes are generally defined as readers' affect toward reading and their consequence is that children with more positive attitudes are more motivated to read. Taking into account the variability that exists within the notion of gender and age, this volume aims to examine and scrutinize previous research on the topic as well as test theories on how the different dimensions of reading motivation vary with gender in relation to cultural issues, motivational constructs such as engagement, and classroom climate, the role of emotions, interests, and attitudes towards reading, among others. The book will be of interest to researchers, educators, graduate students, and other professionals working in the area of literacy, reading motivation, reading achievement, and gender differences.

Handbook of Reading Research, Volume III Michael L. Kamil, Peter B. Mosenthal, P. David Pearson, Rebecca Barr, 2016-11-18. In Volume III, as in Volumes I and II, the classic topics of reading are included, from vocabulary and comprehension to reading instruction in the classroom, and in addition, each contributor was asked to include a brief history that chronicles the legacies within each of the volume's many topics. However, on the whole, Volume III is not about tradition. Rather, it explores the verges of reading research between the time Volume II was published in 1991 and the research conducted after this date. The editors identified two broad themes as representing the myriad of verges that have emerged since Volumes I and II were published: 1) broadening the definition of reading and 2) broadening the reading research program. The particulars of these new themes and topics are addressed.
