Translated from the French and arranged for the service of the United States by R. Anderson (April 29, 1840). United States. War Department, 1839 **The ESP Enigma** Diane Hennacy Powell, M.D., 2009-07-01 Dr Diane Powell a nationally prominent Johns Hopkins trained neuropsychiatrist and former clinical instructor in psychiatry at Harvard Medical School examines the evidence for many types of psychic phenomena from telepathy and precognition to psychokinesis and finds several well designed and rigorously supervised studies that prove the existence of some psychic phenomena This raises the important question how is this possible Proven psychic phenomena don't fit into science's old model for the brain Dr Powell proposes a revolutionary model of the brain and the mind Consciousness may have properties similar to those of an energy field in physics A field is defined as a disturbance or condition in space that has the potential of producing a force much the way a magnetic field polarizes iron filings into a predictable pattern around it That and other aspects of her new paradigm for consciousness would explain how the mind of a mystic or psychic could have an organizational effect on the physical world Tests have shown that basically everyone has certain measurable psychic abilities such as experiencing a psychic connection with a loved one but the fact that psychic abilities are stronger among prodigies autistic savants some people who are bipolar or have suffered certain brain injuries has led to brain imaging and other research that can explain which parts of the brain are dominant in psychics and mystics The ESP Enigma is grounded in decades of reliable scientific research establishing a common ground among psi believers and skeptics Left Out Kimberley Reynolds, 2016-07-22 Left Out presents an alternative and corrective history of writing for children in the first half of the twentieth century Between 1910 and 1949 a number of British publishers writers and illustrators included children's literature in their efforts to make Britain a progressive egalitarian and modern society Some came from privileged backgrounds others from the poorest parts of the poorest cities in the land some belonged to the metropolitan intelligentsia or bohemia others were working class autodidacts but all sought to use writing for children and young people to create activists visionaries and leaders among the rising generation Together they produced a significant number of both politically and aesthetically radical publications for children

and young people This radical children s literature was designed to ignite and underpin the work of making a new Britain for a new kind of Briton While there are many dedicated studies of children s literature and childrens writers working in other periods the years 1910 1949 have previous received little critical attention In this study Kimberley Reynolds shows that the accepted characterisation of inter war children s literature as retreatist anti modernist and apolitical is too sweeping and that the relationship between children s literature and modernism left wing politics and progressive education has been neglected
