

Ecological Neuropsychology: An Alternative to the Deficit Model for Conceptualizing and Serving Students with Learning Disabilities

Rik Carl D'Amato,^{1,3} Franci Crepeau-Hobson,¹ Leesa V. Huang,² and Molly Geil¹

The present paper contends that children with learning disabilities are better served when assessment and intervention are conceptualized within an ecological neuropsychology perspective than within the traditional deficit model perspective, which is the predominant approach to intervention in medical and educational settings. The deficit method conceptualizes problems as within the child, and the major consequence of this approach is that little time is spent analyzing the learning environment or other systems that might impact the child's ability to be successful in an academic setting. Therefore, rehabilitation efforts have had limited success. In contrast, ecological neuropsychology is a strength-based approach that considers the child, as well as the systems within which he/she interacts, when assessing, diagnosing, and intervening with students who are experiencing learning difficulties.

KEY WORDS: ecological neuropsychology; medical model; learning disabilities; special education; strength-based models; rehabilitation.

Based on the premise that a neuropsychological model is more comprehensive than the traditional deficit model approach to serving students with learning disabilities (LD), this review analyzes the problems with the deficit or medical model approach to diagnosis and treatment of students with LD. Rationale is provided for developing and utilizing an ecological neuropsychological approach in the assessment and intervention of children experiencing learning difficulties in the classroom. Moreover, it will be obvious that educational personnel, especially school neuropsychologists, school psychologists, and pediatric neuropsychologists, must utilize an ecological approach to assessment and intervention with those students who have a specific LD in order for all students to be successful in the educational setting.

A specific LD was originally defined by the Public Law 94–142 (1975). Now, the Individuals with

Disabilities Education Improvement Act (IDEIA; Federal Register, 2004) defines it as:

a disorder in one or more of the basic psychological processes involved in understanding or in using language, spoken or written, which may manifest in an imperfect ability to listen, think, speak, read, write, spell, or to do mathematical calculations . . .

The definition goes on to specify disorders (e.g., dyslexia) included within the rubric of LD, as well as exclusionary criteria (as cited in Gutkin and Reynolds, 1999). According to the U.S. Department of Education (2000), children with LD comprise approximately 51% of all disabilities covered by IDEIA or about 5% of the school-age population. Referrals and placements of students with LD increased by over 100% from 1979 to 1999. Also noteworthy is the disproportionate representation of ethnic minority youth identified as LD and in special education (Donovan and Cross, 2002). This is also true of boys: They are referred significantly more often than girls for LD (Banks and Banks, 2001).

The discipline of special education developed from Lightner Witmer's model for treating children with difficulties that interfered with learning (D'Amato and Dean, 1989; Reynolds et al., 1984). Additionally, as

Reading Learning Disability An Ecological Approach:

Reading/Learning Disability Jill Bartoli, Morton Botel, 1988 Reading and Learning Difficulties Peter S. Westwood, 2001
This book is a guide to teaching reading more effectively to a wide range of children. It presents various research supported approaches to teaching, explains why learning problems sometimes occur, and what can be done to prevent or overcome these difficulties. Back cover ed. *Reading and Learning Difficulties* Peter Westwood, 2012-11-12. First Published in 2005. All teachers recognise how crucial is the acquisition of good reading skills. This book will help teachers understand how pupils learn and will help them to meet those pupils' different needs through appropriate intervention. It includes: Clear explanation of different learning difficulties; Guidelines on types of assessment; Advice on how to select the best type of intervention and support. For teachers, TAs, Numeracy Co-ordinators and SENCOs. **Learning Disabilities** Jennifer Pyke, 1998 *The Complete Theory-to-practice Handbook of Adult Literacy*, 1990. This work offers guidelines for curriculum design and teaching approaches for adult education programmes that are broader and more interactive than many existing programmes for undereducated adults. The authors describe ways in which classes can be organized and lessons developed around the specific needs and interests of adult learners rather than around pre-packaged materials. *Deeper Reading* Kelly Gallagher, 2023-10-10. Do your students often struggle with difficult novels and other challenging texts? Do you feel that you are doing more work teaching the novel than they are reading it? Building on twenty years of teaching language arts, Kelly Gallagher shows how students can be taught to successfully read a broad range of challenging and difficult texts with deeper levels of comprehension. In *Deeper Reading: Comprehending Challenging Texts* 4/12, he shares effective classroom-tested strategies that enable your students to accept the challenge of reading difficult books and move beyond a first-draft understanding. Consciously monitor their comprehension as they read and employ effective fix-it strategies when comprehension starts to falter. Use meaningful collaboration and metaphorical thinking to achieve deeper understanding of texts. Reflect on the relevance the book holds for themselves and their peers by using critical thinking skills to analyze real-world issues. Gallagher also provides guidance on effective lesson planning that incorporates strategies for deeper reading. Funny, poignant, and packed with practical ideas that work in real classrooms, *Deeper Reading* is a valuable resource for any teacher whose students need new tools to uncover the riches found in complex texts. *Literacy Disorders* Ula C. Manzo, Anthony V. Manzo, 1993. A holistic view of children's abilities in reading and language arts. Includes means for assessing and improving writing, spelling, and emotional well-being; a full chapter on how to promote higher-order literacy; and a full chapter and appendices devoted to the diagnosis and treatment of dyslexia or severe reading disorders. A Literate Community Carole Cook Freeman, 1995. A fourth-grade classroom and school library are the setting for this book that presents an in-depth and qualitative study of teaching and learning of reading and writing. The study's exploration is designed to identify and explain connections among the school and classroom as literate communities, teachers' classroom practices,

children's learning and the type of literacy that is jointly constructed. In contrast to the traditional focus on reading lessons, methods, materials, and standardized test scores, this study explores teaching by closely examining teacher-child interactions with texts across the school day.

Contents: Introduction, Early Indications of a Literate Community, Frameworks for Understanding a Literate Community, Culture and Teacher Thinking in a Literate Community, Opportunities to Become Literate, A Framework for Looking at Literacy Work, Common Threads and Unique Patterns.

Reading Process and Practice Constance Weaver, 1994. Updated and revised, this text begins with a discussion of the reading process. New to this edition are chapters on characterizing whole language principles and practices and growing into whole language teaching of writing, reading literature, and theme study.

Gaming Lives in the Twenty-First Century G. Hawisher, C. Selfe, 2016-06-07. This volume examines the claim that computer games can provide better literacy and learning environments than schools. Using case studies in the US at the beginning of the twenty-first century and the words and observations of individual gamers, the book offers historical and cultural analyses of their literacy development practices and values.

Literacy Development in A Multilingual Context Aydin Y. Durgunoglu, Ludo Verhoeven, 2013-12-16. During the past decades, literacy has gradually become a major concern all over the world. Though there is a great diversity in both the distribution and degree of literacy in different countries, there has been an increasing awareness of the number of illiterates and the consequences of being illiterate. However, literacy is no longer seen as a universal trait. When one focuses on culturally sensitive accounts of reading and writing practices, the concept of literacy as a single trait does not seem very feasible. A multiplicity of literacy practices can be distinguished, which are related to specific cultural contexts and associated with relations of power and ideology. As such, literacy can be seen as a lifelong context-bound set of practices in which an individual's needs vary with time and place. This volume explores the use of literacy outside the mainstream in different contexts throughout the world. It is divided into four sections. Section 1 presents an anthropological perspective analyzing the society and the individual in a society. Section 2 presents a psychological perspective focusing on the individuals themselves and analyzing the cognitive and affective development of young children as they acquire literacy in their first and second languages. Section 3 presents an educational perspective highlighting the variations in educational approaches in different societies as well as the outcomes of these approaches. Section 4 summarizes the studies presented in this volume. Both theoretical issues and educational implications related to the development of literacy in two languages are discussed. An attempt is also made to open up new directions in the study of literacy development in multilingual contexts by bringing these various disciplinary perspectives together.
